☞ This word and its companion *favour*, the two ſervile attendants on cards and notes of faſhion, have ſo generally dropped the *u*, that to ſpell theſe words with that letter is looked upon as *gauche* and ruſtic in the extreme. In vain did Dr. Johnſon enter his proteſt againſt the innovation; in vain did he tell us, that the ſound of the word required the *u* as well as its derivation from the Latin through the French: the ſentence ſeems to have been paſſed, and we now hardly ever find theſe words with this vowel but in our Dictionaries. But though I am a declared enemy to all needleſs innovation, I ſee no inconvenience in ſpelling theſe words in the faſhionable manner; there is no reaſon for preſerving the *u* in *honour* and *favour*, that does not hold good for the preſervation of the ſame letter in *errour*, *authour*, and a hundred others: and with reſpect to the pronunciation of theſe words without the *u*, while we have ſo many words where the *o* ſounds *u*, even when the accent is on it, as *honey*, *money*, &c., we need not be in much pain for the ſound of *u* in words of this termination, where the final *r* brings all the unaccented vowels to the ſame level; that is, to the ſhort ſound of *u*. See Principles, No. 418.

☞ This word was, till of late years, univerſally pronounced, in proſe, with the accent on the firſt ſyllable; and Shakeſpeare, ſays Dr. Johnſon, has improperly placed it ſo in verſe:

—"When the morning ſun ſhall raiſe his car
"Above the borders of this *horizon*,
"We'll forwards towards Warwick and his
"mates."

With reſpect to the propriety of this pronunciation it may be obſerved, that there is ſcarcely any thing more agreeable to the genuine analogy of Engliſh orthöepy than placing the accent on the firſt ſyllable of a triſſyllable when the middle ſyllable does not end with a conſonant. (503). But another rule almoſt as conſtantly counteracts this analogy when the word is perfectly Latin or Greek, and the accent is on the penultimate: then we generally follow the accentuation of thoſe languages. Poets have ſo univerſally placed the accent on the ſecond ſyllable of this word, and this pronunciation has ſo claſſical an air as to render the other accentuation vulgar.

☞ Mr. Sheridan and Dr. Aſh accent this word on the ſecond ſyllable; but Dr. Johnſon, Dr. Kenrick, Mr. Barclay, Bailey, and Buchanan, on the laſt. Theſe authorities induced me in the firſt edition of this Dictionary to place the accent on the laſt ſyllable, but upon farther enquiry I found the beſt uſage decidedly in favour of the antepenultimate accent; and as the ſecondary accent is on the ſecond ſyllable of the Latin *Hypotenuſa*, this accentuation ſeems moſt agreeable to analogy. See ACADEMY and INCOMPARABLE.

To pronounce the *y* long before double *s* is contrary to every rule in ſpelling; and therefore if the mode I have adopted be not the beſt, the orthography ought neceſſarily to be changed.

☞ It may be remarked, that the frequent uſe of this letter in our old darmatic writers inſtead of *Ay*, is a proof that our anceſtors pronounced *I* much broader than we do at preſent, and ſomewhat approaching to the ſound it has at this day in the north of England. See *Directions to Foreigners* prefixed to this Dictionary.

☞ It is highly probable, that when this word was firſt adopted it was pronounced as cloſe to the French *gentile* as poſſible; but as we have no letter in our language equivalent to the French ſoft *g*; and as the naſal vowel *en*, when not followed by hard *g*, *c*, or *k*, is not to be pronounced by a mere Engliſh ſpeaker, (ſee *Encore*,) it is no wonder that the word was angliciſed in its ſound, as well as in its orthography. Mr. Sheridan has preſerved the French ſound of the vowel in this word and its compound *jauntineſs*, as if written *jawnty* and *jawntineſs*; but Dr. Kenrick, Mr. Scott, and Mr. Perry, give the *a* the Italian ſound, as heard in *aunt*, *father*, &c. and this, I imagine, it ought to have. The latter is, in my opinion, the more faſhionable, but the former more analogical. We have too many of theſe French ſounding words; and if the number cannot be diminiſhed, they ſhould, at leaſt, not be ſuffered to increaſe.

This word, ſays Dr. Johnſon, is corruptly written *embezzle*. This corruption, however, is too well eſtabliſhed to be altered; and, as it is appropriated to a particular ſpecies of deficiency, the corruption is leſs to be regretted.

☞ The ſecond ſyllable of this and the foregoing word is frequently pronounced as in the verb to *import*. The beſt uſage however, is on the ſide of the firſt pronunciation, which ſeems to ſuppoſe that it is not a word formed from *import*, but an adoption of the French *importance*, and therefore that it ought not to be pronounced as a compound, but as a ſimple. The authorities for this pronunciation are, Mr. Sheridan, Dr. Kenrick, Dr. Aſh, W. Johnſton, Mr. Perry, and Mr. Buchanan. Mr. Scott is for either, but gives the firſt the preference.

To IMPUGN, im-pūne'. v. a.
To attack, to aſſault.

☞ Notwithſtanding the clear analogy there is for pronouncing this word in the manner it is marked, there is a repugnance at leaving out the *g*, which nothing but frequent uſe will take away. If *ſign* were in as little uſe as *impugn* we ſhould feel the ſame repugnance at pronouncing it in the manner we do. But as language is aſſociation, no wonder aſſociation ſhould have ſuch power over it. For the analogies that lead us to this pronunciation, ſee Principles, No. 385.

Mr. Sheridan, Mr. Nares, and Mr. Scott, pronounce the word as I have marked it; that is, with the *g* ſilent, and the *u* long; but Dr. Kenrick, Mr. Perry, and Buchanan, though they ſuppreſs the *g*, pronounce the *u* ſhort. That this ſhort ſound is contrary to analogy cannot be doubted, when we take a view of the words of this termination; and the only plea for it is, the ſhort ſound of the vowels before *gm* in *phlegm*, *diaphragm*, *parapegm*, *apophthegm*, and *paradigm*, (389): but as the accent is not on any of theſe ſyllables, except *phlegm*, which is irregular, (389), it is no wonder the vowel ſhould ſhorten, as it ſo frequently does in the numerous terminations in *ile*, *ine*, *ite*, &c. (147).

IMPUGNER, im-pū'nŭr. ſ.
One that attacks or invades.

☞ In judging of the propriety of this pronunciation we muſt not confound the participles *impugning*, *impugned*, and the verbal noun *impugner*, with ſuch words as we do not form ourſelves, as *repugnant*, *malignant*, &c. The former are mere branches of the verb *impugn*, and therefore make no alteration in the root; the latter we receive already formed from the Latin or the French, and pronounce the *g* as we do in *ſignify* and *ſignet*, though it is ſilent in *ſigned*, *ſigning*, or *ſigner*. For it muſt be carefully obſerved, that the analogy of pronunciation admits of no alteration in the ſound of the verb upon its being formed into a participle or verbal noun; nor in the ſound of the adjective, upon its acquiring a comparative or ſuperlative termination. See Principles, No. 409.

INCOMPARABLE, in-kom'pa-ra-bl. a.

☞ This is among ſome of the words in our language, whoſe accentuation aſtoniſhes foreigners, and ſometimes puzzles natives. What can be the reaſon, ſay they, that *comparable* and *incomparable* have not the ſame accent as the verb *compare*. To which it may be anſwered: one reaſon is, that the Engliſh are fond of appearing in the borrowed robes of other languages; and as *comparable* and *incomparable* may poſſibly be derived from *comparabilis* and *incomparabilis*, they ſeem deſirous of laying the ſtreſs on the firſt ſyllable, both to ſhow their affinity to the Latin words *(ſee Academy)*, and to diſtinguiſh them from the homeſpun words formed from our own verb. When this diſtinction is once adopted, the mind, which is always labouring to expreſs its ideas diſtinctly and forcibly, finds a ſort of propriety in annexing different ideas to the different accentuation; and thus the diſtinction becomes accurate and claſſical. If we may compare ſmall things with great, it may be obſerved, that the evils of language, like other evils in nature, produce ſome good. But it may be likewiſe obſerved, that producing different meanings, by a different accentuation of words, is but a bungling way of promoting the copiouſneſs of languages, and ought as much as poſſible to be diſcouraged; eſpecially when it adds to the difficulty, and takes away from the harmony of pronunciation. Beſides, there is a petty criticiſm which always induces coxcombs in pronunciation to carry theſe diſtinctions farther than they ought to go. Not content with accenting *acceptable*, *admirable*, *commendable*, *comparable*, *lamentable*, &c. on the firſt ſyllable, which implies not a mere capacity of being *accepted*, *admired*, &c. but a worthineſs of being *accepted*, *admired*, &c.: *corruptible* and *ſuſceptible* are ſometimes accented in this manner, without the leaſt neceſſity from a difference of ſignification. In ſhort, all theſe refinements in language, which are difficult to be underſtood, and productive of perplexity, ought to be conſidered rather as evils than advantages, and to be reſtrained within as narrow bounds as poſſible. See BOWL.

☞ Nothing can ſhow more with what ſervility we ſometimes follow the Latin accentuation than pronouncing this word with the accent on the penultimate. In the Latin *decorus* the *o* is long, and therefore has the accent; but in *dedecorus* the *o* is ſhort, and the accent is conſequently removed to the antepenultimate; this alteration of accent obtains likewiſe when the word is uſed in Engliſh, and this accentuation is perfectly agreeable to our own analogy; but becauſe the Latin adjective *indecorus* has the penultimate long, and conſequently the accent on it, we muſt deſert our own analogy, and ſervilely follow the Latin accentuation, though that accentuation has no regard to analogy; for why *dedecorus* and *indecorus*, words which have a ſimilar derivation and meaning, ſhould have the penultimate of different quantities, can be reſolved into nothing but the caprice of cuſtom; but that ſo clear an analogy of our own language ſhould be ſubſervient to the capricious uſages of the Latin, is a ſatire upon the good ſenſe and taſte of Engliſhmen. Dr. Aſh is the only one who places the accent on the antepenultimate of this word; but his ſingle authority ought to be deciſive when there is ſo much analogy on his ſide. See Principles, No. 512.

☞ This word and all its relatives have the *o* ſo differently pronounced by our beſt orthöepiſts, that the ſhorteſt way to ſhow the difference will be to exhibit them at one view:

Dŏcile. Sheridan, Scott, Buchanan, W. Johnſton, Entick, Nares, Smith.
Dōcile. Kenrick, Perry.
Indŏcile. Sheridan, Scott, Buchanan, W. Johnſton, Perry, Entick.
Indōcile.
Dŏcible. Sheridan, Scott, Entick.
Dōcible. Kenrick, Perry.
Indŏcible. Sheridan, Scott, Buchanan, W. Johnſton, Entick.
Indōcible. Perry.

We here ſee the great preponderance of authority for the ſhort ſound of *o* in all theſe words; not becauſe this letter is ſhort in the Latin words whence they are derived; for *risible* and *visible*, which have the *i* ſhort, with us are *rīsibilis* and *vīsibilis* in Latin; but becauſe the accent in our Engliſh word is antepenultimate, and becauſe this accent has a ſhortening power in all words of this form, which may be called ſimples (503), unleſs the antepenultimate vowel be *u*, and then it is always long, (509) (511) (537). Thus the antepenultimate vowels in *credible*, *clavicle*, *veſicle*, &c. are ſhort, though derived from *credibilis*, *clāvicula*, *vēſicula*, &c.; but the *a* in *tamable*, *debatable*, &c. is long, becauſe they are formatives of our own, from *tame*, *debate*, &c.

This view of the authorities and analogies obliges me to retract my former opinion with reſpect to *docible* and *indocible*; the former of which muſt be placed among the *Errata*.

Inimical, in-ĭm'ĕ-kăl, or in-ē-mĭ'-kăl. a.
Hoſtile, contrary, repugnant.
☞ This word ſprung up in the Houſe of Commons about ten years ago, and has ſince been ſo much in uſe as to make us wonder how we did ſo long without it. It had, indeed, one great recommendation, which was, that it was pronounced in direct oppoſition to the rules of our own language. An Engliſhman, who had never heard it pronounced, would, at firſt ſight, have placed the accent on the antepenultimate, and have pronounced the penultimate *i* ſhort; but the vanity of ſhowing its derivation from the Latin *inimicus*, where the penultimate *i* is long; and the very oddity of pronouncing this *i* long in *inimical* made this pronunciation faſhionable. I know it may be urged, that this word, with reſpect to ſound, was as great an oddity in the Latin language as it is in ours; and that the reaſon for making the *i* long was its derivation from *amicus*. It will be ſaid too, that, in other words, ſuch as *aromaticus*, *tyrannicus*, *rhetoricus*, &c. the *i* was only terminational; but in *inimicus* it was radical, and therefore intitled to the quantity of its original *amicus*. In anſwer to this, it may be obſerved, that this was no reaſon for placing the accent on that ſyllable in Latin. In that language, whenever the penultimate ſyllable was long, whether radical or terminational, it had always the accent on it. Thus the numerous terminations in *alis* and *ator*, by having the penultimate *a* long, had always the accent on that letter, while the *i* in the termination *ilis* and *itas* ſeldom had the accent, becauſe that vowel was generally ſhort. But allowing for a moment that we ought ſervilely to follow the Latin accent and quantity in words which we derive from that language; this rule, at leaſt, ought to be reſtricted to ſuch words as have preſerved their Latin from, as *orator*, *ſenator*, *character*, &c. yet in theſe words we find the Latin penultimate accent entirely neglected, and the Engliſh antepenultimate adopted. But if this Latin accent and quantity ſhould extend to words from the Latin that are angliciſed, then we ought to pronounce *divinity*, *de-vĭne-e-ty*; *ſeverity*, *ſe-vĕre-e-ty*; and *urbanity*, *ur-băne-e-ty*, In ſhort, the whole language would be metamorphoſed, and we ſhould neither pronounce Engliſh nor Latin, but a Babyloniſh dialect between both.

☞ A corrupt pronunciation of this word prevails chiefly in the capital, as if it were written *inſtid*. ☞ Dr. Johnſon has given this word from Shakeſpeare, who formed it as if derived from the Latin: but as that language has no nearer relation to it than *teneo*, it muſt be derived from the French *tenable*, and therefore cannot have been compounded of *in* and *tenible*, as Dr. Johnſon tells us, becauſe there is no ſuch word.

INTERCALAR, ĭn-tĕr'kā-lăr.
INTERCALARY, ĭn-tĕr-kăl'ā-rē. } a.
Inſerted out of the common order to preſerve the equation of time, as the twenty-ninth of February in a leap-year is an Intercalary day.

☞ All our orthöepiſts agree in placing the accent on the ſecond ſyllable of *intercalar* and *intercalate*, and Mr. Sheridan, Dr. Aſh, Mr. Perry, Buchanan, Barclay, and Entick, place it on the ſame ſyllable in *intercalary*; but Dr. Kenrick, W. Johnſton, and Bailey, on the third. This latter pronunciation is certainly more agreeable to the ear; and as it is derived from the Latin *intercalaris*, a word of the ſame number of ſyllables with the penultimate long, it ſhould ſeem we ought to place the accent on the ſame ſyllable in the Engliſh word, (503); but as our language abſolutely forbids us to lay the ſtreſs on the *a* in this termination (512), I ſee no reaſon why we ſhould not place it on the preceding ſyllable, eſpecially as the termination is not enclitical (513), and therefore does not require the accent on the conjunctive part of the word, (ſee ACADEMY). The accent on the third ſyllable therefore, as it claſhes with no analogy, and is ſo much more agreeable to the ear, ought, in my opinion, to be adopted.

☞ There is a perfectly new pronunciation of this word by placing the accent on the ſecond ſyllable, which, from its ſingularity, bids fair for a reception among the minor critics in pronunciation, eſpecially when there are at firſt ſight a few plauſible analogies in its favour. Why, theſe critics will ſay, ſhould we not pronounce this word with the accent on the antepenultimate ſyllable as well as *conference*, *deference*, *preference*, *inference*, and *circumference*, which it is evident are not formed from our verbs to *confer*, *defer*, &c. but from the Latin *conferens*, *deferens*, &c. It may be anſwered, that as there is no Latin verb *interfero*, there is not the ſame reaſon for accenting this word on the antepenultimate ſyllable, as there is for the other words: and therefore forming *interference* from our own verb to *interfere*, ſeems preferable to the forming of a mungrel Latin word merely to avoid a formative of our own; eſpecially when we have ſo many words in a ſimilar termination deriving their accent from the verb: as *defiance* from *defy*; *reliance* from *rely*; *aſſurance* from *aſſure*, &c.; and even in this termination *condolence* from *condole*: and why not *interference* from *interfere*? Entick's is the only Dictionary in which I have found this very common and uſeful word; but as Dr. Johnſon has not got it, this omiſſion is eaſily accounted for.

☞ So great is the tendency of our language to the enclitical accent, that this word, though perfectly Latin, and having the penultimate *u* long, has not been able to preſerve the accent on that ſyllable. Mr. Nares is the only orthöepiſt who places the accent on *u*; Mr. Sheridan, Dr. Johnſon, Dr. Aſh, Dr. Kenrick, Mr. Scott, Mr. Perry, Mr. Barclay, and Entick, accent the antepenultimate ſyllable. ☞ Mr. Sheridan, Dr. Kenrick, Mr. Nares, Buchanan, W. Johnſton, Mr. Perry, and Mr. Barclay, place the accent on the ſecond ſyllable of this word; and Dr. Johnſon, Dr. Aſh, Mr. Scott, Bailey, and Entick, on the firſt. I do not heſitate a moment to pronounce this the beſt accentuation: for as this word muſt be derived from the noun *interſtitium*, and not from the verb *interſto*, the rule ſo often mentioned of changing the ſecondary accent of the Latin word when ſhortened into the principal accent of the Engliſh word muſt take place here. See ACADEMY and INCOMPARABLE.

It is not eaſy to conjecture what could be the reaſon why this majority of orthöepiſts ſhould be found on the ſide of the penultimate pronunciation of this word. It is certain that the greateſt part do but copy from former Dictionaries; but when an uncooth and uncommon pronunciation is adopted, it is generally for ſome learned reaſon from the dead languages, which the common inſpector is utterly incapable of conceiving. In the preſent inſtance, however, there is not the ſhadow of a reaſon from the original Latin why we ſhould place the accent on the ſecond ſyllable of *interſtice*, which would not oblige us to lay the ſtreſs on the ſame ſyllable of *interfere*, *intervene*, *intercourſe*, *interval*, *ſuperflux*, &c.

☞ Mr. Sheridan, Dr. Aſh, Mr. Nares, Mr. Scott, W. Johnſton, Mr. Perry, Buchanan, Entick, and Bailey, pronounce this word with the accent on the firſt ſyllable; and Dr. Johnſon, Dr. Kenrick, and Mr. Barclay, on the ſecond. Dr. Kenrick indeed tells us, that the accent is ſometimes placed on the firſt; which is indeed very apparent from the number of writers I have produced for that accentuation. But the propriety of this pronunciation is not better ſupported by authority than by analogy. For if we have an Engliſh word from which a word of this kind might be formed, as *declaratory*, *defamatory*, &c. the accent will generally be found to be on the ſame ſyllable as in *declare*, *defame*, &c.; but if we have no ſuch correſponding Engliſh word, and the word of this termination comes from the Latin, as *promontory*, *deſultory*, &c. the word then takes the ſecondary accent we give the Latin words *prŏmontŏrium*, *dĕſultŏrius*, &c. Now though our Engliſh verb to *invent* comes from the ſame parent *invenio* as *inventory*, it is in ſo different a ſenſe as to have no claim to the offſpring. As therefore *inventarium* or *inventorium* (for it is ſpelled with the *a* in the folio edition, and with the *o* in the quarto) had the ſecondary accent on the firſt ſyllable in our pronunciation of Latin, ſo *inventory* muſt have the principal accent in the ſame ſyllable in Engliſh. See ACADEMY, INCOMPARABLE, &c. Dr. Johnſon indeed furniſhes us with an authority from Shakeſpeare againſt himſelf:

"I found
"Forſooth an *inventory* thus importing
"The ſeveral parcels of his plate."

☞ If we might judge by the uniformity we find in our Dictionaries, there would be no great difficulty in ſettling the accentuation of this word. Dr. Johnſon, Dr. Aſh, Dr. Kenrick, Bailey, Entick, W. Johnſton, Perry, Barclay, and Buchanan, place the accent on the third ſyllable; Mr. Scott either on the ſecond or third, with a preference to the latter; and Mr. Sheridan alone places it excluſively on the ſecond. But notwithſtanding Mr. Sheridan's accentuation ſtands ſingle, I am much miſtaken if it has not only the beſt uſage on its ſide, but the cleareſt analogy to ſupport it. It were, indeed, to be wiſhed, for the ſake of harmony, that, like the Greeks and Romans, we had no accent higher than the antepenultimate; but language is the *vox populi*. Our accent, in a thouſand inſtances, tranſgreſſes theſe claſſic bounds, and who ſhall confine it? In compounds of our own, with the utmoſt propriety, we place the accent on the fourth ſyllable from the laſt, as in *wearifomeneſs ſerviceableneſs*, &c. (501); and a probable reaſon is given under the word *Academy* why we accent ſo many words from the Latin in the ſame manner; but be the reaſon what it will, certain it is, that this cuſtom has prevailed. This prevalence of cuſtom is ſufficiently exemplified in the poſitive of the word in queſtion; *Refragable* is accented by Johnſon, Aſh and Bailey on the firſt ſyllable, and would probably have been accented in the ſame manner by the reſt if they had inſerted the word. Buchanan and Barlcay, indeed, have the word, and accent it on the ſecond; but their authority is greatly outweighed by the three others. Convinced, therefore, that pronouncing this word with the accent on the ſecond ſyllable is following that path which the beſt uſage has pointed out, I do not heſitate to diſſent from ſo many authorities, eſpecially when I find the beſt of theſe authorities inconſiſtent; for if we are to place the accent on the firſt ſyllable of *Refragable*, why we ſhould remove the accent in *Irrefragable* I cannot conceive. See ACADEMY and DISPUTABLE.

IRREFRAGABLY, ĭr-rĕf'frā-gă-blē. ad.
With force above confutation.

IRREFUTABLE, ĭr-rē-fū'tă-bl. a.
Not to be overthrown by argument.

☞ All our Dictionaries place the accent on the third ſyllable of this word; nor do I mean to affront ſuch reſpectable authority, by placing it on the ſecond, as in *irrefragable*, though there is exactly the ſame reaſon for both. Let it not be pleaded that we have the verb *refute* in favour of the firſt pronunciation; this has not the leaſt influence on the words *indiſputable*, *irrevocable*, *incomparable*, &c. The reaſon why *Corruptible* and *Refractory* ought not to have the accent on the firſt ſyllable, ariſes from the difficulty of pronouncing the uncombinable conſonants *pt* and *ct* in ſyllables not under the ſtreſs. See *Principles*, No. 517; alſo the words ACCEPTABLE and REFRACTORY.

☞ This is one of the annual productions of The Houſe of Commons, (where new words and money bills naturally originate) but it certainly deſerves reception, as it conveys a new idea; which is, that the object to which it relates is ſuppoſed to be in a fallen and abject ſtate, and incapable of relief; whereas *Unaſſiſting* may relate to an object which, indeed, wants aſſiſtance, but which is ſtill in a militant ſtate, and not overcome. Every new ſhade of thought, however nice, enriches a language, and may be conſidered as a real acquiſition to it. See RELEVANT.

☞ This word and its ſimple *Reparable* come from the Latin *Reparabilis* and *Irreparabilis*, and are pronounced with the accent on the pre-antepenultimate ſyllable according to the analogy of words angliciſed from the Latin by dropping a ſyllable; which is, to place the accent on that ſyllable which had a ſecondary ſtreſs in our own Engliſh pronunciation of the Latin words. See ACADEMY and INCOMPARABLE.

☞ This word is in no Dictionary that I have met with; but it appears to me to deſerve a place, as it is the only ſingle word that expreſſes imperceptible intruſion. Mr. Elphinſton ſeems to uſe it with preciſion, where he tells us, in his Principles of the Engliſh Language, "that etymology counts the *b* in *crumb* "irreptitious, for, not having found it in "foreign ſources, ſhe cannot ſee its uſe at "home." ☞ Scarcely any word has occaſioned more altercation among verbal critics than this. A great appearance of propriety ſeems to favour the ſecond pronunciation, till we obſerve a great number of ſimilar words, where the long vowel in the ſimple is ſhortened in the compound, and then we perceive ſomething like an idiom of pronunciation, which, to correct, would, in ſome meaſure, obſtruct the current of the language. To preſerve the ſimple without alteration in the compound, is certainly a deſirable thing in the language; but when the general tune of the language, as it may be called, croſſes this analogy, we may depend on the rectitude of general cuſtom, and ought to acquieſce in it. That the ſecondary accent ſhortens the vowel, which was long in the original, appears throughout the language in *proclamation*, *provocation*, &c. (530). That the primary accent does the ſame in *prĕface*, *prĕlate*, *prĕlude*, &c. is evident; and as *ledge* is no general termination of our own, which is applicable to ſeveral words, why ſhould we not conſider *knowledge* as a ſimple, and pronounce it independently on its original quantity? See Principles, No. 328, 515. The patrons for the firſt pronunciation are, Mr. Sheridan, Dr. Kenrick, Mr. Nares, Mr. Barclay, Mr. Elphinſton, and Mr. Scott; and for the ſecond, W. Johnſton and Mr. Buchanan. Mr. Perry gives both, but ſeems to allow the firſt the preference. See Principles, No. 328, 515.

TO LEAP, lēpe. v. n. (239).
To jump, to move upward or progreſſively without change of the feet; toruſh with vehemence; to bound, to ſpring; to fly, to ſtart.

☞ The paſſed time (367) of this verb is generally heard with the diphthong ſhort; and if ſo, it ought to be ſpelled *lept*, rhyming with *kept*. See Principles, No. 369. Dr. Kenrick, Mr. Scott, W. Johnſton, Mr. Perry, Mr. Barclay, Mr. Nares, Mr. Smith, and Mr. Elphinſton, pronounce the diphthong in the preſent tenſe of this word long as I have done; and Mr. Elphinſton and Mr. Nares make it ſhort in the preterit and participle. Mr. Sheridan alone makes the preſent tenſe ſhort, which, if I recollect juſtly, is a pronunciation peculiar to Ireland.

☞ This word is ſometimes pronounced with the vowel in the firſt ſyllable ſhort, as if written *lĕd-jend*. This has the feeble plea of the Latin word *Lego*, to produce; but with what propriety can we make this plea for a ſhort vowel in Engliſh, when we pronounce that very vowel long in the Latin word we derive it from? The genuine and ancient analogy of our language, as Dr. Wallis obſerves, is, when a word of two ſyllables has the accent on the firſt, and the vowel is followed by a ſingle conſonant to pronounce the vowel long. It is thus we pronounce all Latin words of this kind; and in this manner we ſhould certainly have pronounced all our Engliſh words, if an affectation of following Latin quantity had not diſturbed the natural progreſs of pronunciation. See DRAMA. But beſides this analogy the word in queſtion has the authority of Mr. Sheridan, Mr. Scott, W. Johnſton, Bailey, Entick, Perry, and Buchanan, on its ſide. Dr. Kenrick and Dr. Aſh are the only abettors of the ſhort ſound.

LEGENDARY, lĕd'jĕn-dă-rē. ſ.
Pertaining to a legend.

☞ As the preceding word has, by the cleareſt analogy, the vowel in the firſt ſyllable long, ſo this word, by having the accent higher than the antepenultimate, has as clear an analogy for having the ſame vowel ſhort (530) (535). This analogy, however, is contradicted by Dr. Aſh, W. Johnſton, Mr. Scott, Entick, Buchanan, and Perry. As Mr. Sheridan has not got the word, his opinion cannot be produced either way.

☞ Some reſpectable ſpeakers in the Houſe of Commons pronounce the *e* in the firſt ſyllable of this word long, as if written *Leegiſlature*, and think they are wonderfully correct in doing ſo, becauſe the firſt ſyllable of all Latin words, compounded of *Lex*, is long. They do not know that, in pronouncing the word, in this manner, they are contradicting one of the cleareſt analogies of the language; which is, that the antepenultimate, and ſecondary accent, ſhorten every vowel they fall upon, except *u*, unleſs they are followed by a diphthong. (534) (535). This analogy is evident in a numerous catalogue of words ending in *ity*, where the antepenultimate vowel is ſhort in Engliſh, though long in the Latin words, whence they are derived, as *ſerenity*, *divinity*, *globoſity*, &c. The ſame may be obſerved of the words *declamatory*, *deliberative*, &c. where the two ſecond ſyllables are ſhort in Engliſh, though long in the Latin *declamatorius*, *deliberativus*, &c. Even the words *liberal* and *liberty*, if pronounced with their firſt ſyllables long, as in the Latin words *liberalis* and *libertas*, ought to be ſounded *lye'beral* and *lye'berty*. If, therefore, we conſider the accent on the firſt ſyllable of *legiſlator*, *legiſlature*, or *legiſlative*, either as primary or ſecondary, we find a clear analogy for ſhortening the vowel; nor can we have the leaſt reaſon for lengthening it, which will not oblige us in the ſame manner to lengthen the firſt vowel of *lenitive*, *pedagogue*, *pacification*, and a thouſand others. See Principles, No. 530, 535. Mr. Sheridan, Dr. Kenrick, Mr. Scott, and Mr. Perry, mark the *e* in the firſt ſyllable of this word and its relatives ſhort. W. Johnſton only marks them long. From Entick we can gather the quantity of this vowel in no word but *legiſlate*, where he makes it long; and Aſh, Bailey, and Buchanan, do not mark it either way. Theſe authorities ſufficiently ſhow us the general current of cuſtom; and the analogies of the language ſufficiently ſhow the propriety of it.

Leporine, lĕp'pō-rine. a. Belonging to a hare, having the nature of a hare.

☞ Mr. Sheridan has marked the *e* in the firſt ſyllable of this word long, without even the flimſy plea of Latin quantity to ſupport it. Mr. Perry, Entick, and Dr. Aſh, are the only orthoepiſts from whom we can gather the pronunciation of this letter. The two firſt are for the ſhort ſound, and the laſt for the long one. But the ſhort ſound is ſo agreeable to analogy as to want no authorities to ſupport it. See Principles, No. 530, 535.

LEST, lĕſt, or lēēſt. conj.

☞ Almoſt all our orthöepiſts pronounce this word both ways; but the former ſeems to be by much the moſt general. This word is derived from the adjective *leaſt:* but it is not uncommon for words to change their form when they change their claſs. Dr. Wallis's advice to ſpell the ſuperlative of little *leſſeſt*, has not yet been followed, and probably never will; and therefore there is no neceſſity for Dr. Lowth's expedient to diſtinguiſh theſe words by ſpelling the conjunction with *a*. But why we ſhould ſound the *e* long, contrary to the analogy of ſpelling, while ſuch a pronunciation confounds the conjunction and the adjective, cannot be conceived. The ſecond pronunciation, therefore, ought to be exploded.

☞ I have given the firſt ſyllable of this and the ſucceeding words, compounded of *male*, the long ſound of *a*, becauſe I look upon *male* as a prefix, not alterable in its ſound in words of our own compoſition any more than *arch*, *fore*, *mis*, *pre*, or *vice*: *arch* and *fore* are uſed ſeparately as adjectives, which is not the caſe with *male*; but *mis*, *pre*, and *vice*, are never uſed out of compoſition, and are therefore exactly under the ſame predicament. *Dis* not being a prefix of our own which we can apply to words at pleaſure, alters the ſound of *s* according to the preſence or abſence of the accent, or the nature of the ſucceeding conſonants, (ſee DIS); but *mis* being applicable to any words, never alters the ſound of *s*, (426). *Pre*, when prefixed to words of our own, as *pre-conceived*, *pre-ſuppoſed*, &c. never ſhortens the vowel, (530) (531) (532); and *vice* in *vice-preſident*, *vice-admiral*, &c. might as well be changed into *vis-preſident* and *vis-admiral*, as *malecontent* and *male-practice* into *malcontent* and *malpractice*. But though all our pronouncing dictionaries adopt the ſhort ſound of *a*, and ſome even leave out the *e*, yet as analogy is ſo decidedly in favour of the long ſound, and cuſtom is not quite unanimous, the long ſound ought certainly to have preference with all who aim at correctneſs and conſiſtency. W. Johnſton is the only one who adopts this pronunciation; and Barclay, by putting a hyphen after *male*, ſeems to favour it. If cuſtom has decided in favour of the ſhort ſound of *a*, the *e* ought to be omitted in writing, and then the ſpelling and ſound would not be at variance; but as this would lead to incurable evils in language, the pronunciation ought rather to conform to the orthography.

MALL, măl. f.
A stroke, a blow. Obsolete. A kind of beater or hammer; a walk where they formerly played with malls and balls.

☞ This word is a whimsical instance of the caprice of custom. Nothing can be more uniform than the sound we give to *a* before double *l* in the same syllable; and yet this word, when it signifies a wooden hammer, has not only changed its deep sound of *a* in *all* into the *a* in *alley*, but has dwindled into the short sound of *e* in *Mall*, a walk in St. James's Park, where they formerly played with malls and balls, and from whence it had its name; and to crown the absurdity, a street parallel to this walk is spelt *Pall Mall*, and pronounced *Pellmell*, which confounds its origin with the French adverb *pêle mêle*. For Bailey appears to derive the name of the street justly from *pellere malleo*, to strike with a mallet. That this word was justly pronounced formerly we can scarcely doubt from the rhymes to it:

"————With mighty *mall*
"The monster mercileſs him made to fall."
SPENCER.

"And give that reverend head a *mall*
"Or two or three against a wall."
HUDIBRAS.

As a corroboration of this, we find a large wooden club used for killing swine, called and spelt a *maul*; and the word signifying to beat or bruise is spelt and pronounced in the same manner. The word *mallet*, where the latter *l* is separated from the former, is under a different predicament, and is pronounced regularly.

"*Paduaſoy* is a ſimilar falſification of *Po-* "*deſoy*, the Engliſh offspring of the French "*Poudeſoie*. The Italian cities are much "obliged to affectation for having ſo long "complimented them at her own expence. "Guided by etymology, ſhe had no buſineſs "with the ſound; and a ſtranger to analogy "was not likely to know, that a *mantel*, "*mantoe*, or *cloke*, was probably the firſt "ſilken taſk of the Engliſh *Mantoemaker*."

MATRONAL, măt'rō-năl, or mă-trō'-năl. a.
Suitable to a matron, conſtituting a matron.
☞ I have excluded Mr. Sheridan's pronunciation, which makes the two firſt ſyllables of this word exactly like *matron*, becauſe the word is a primitive in our language, derived from the Latin *matronalis*, and therefore, according to Engliſh analogy, when reduced to three ſyllables, ought to have the accent on the antepenultimate, (ſee ACADEMY); and this accent has, in ſimples, always a ſhortening power, (509) (535); The ſecond pronunciation, though not ſo ſtrictly agreeable to analogy as the firſt, is ſtill preferable to Mr. Sheridan's. *Matroniſh* and *matronly* ought to have the firſt vowel and the accent as in *matron*, becauſe they are compounds of our own; but we do not ſubjoin *al* to words as we do *iſh* and *ly*, and therefore words of that termination are under a different predicament. Something like this ſeems to have ſtruck Mr. Sheridan and Dr. Johnſon when they accented the word *Patronal*: for though this word is exactly of the ſame form, and is perfectly ſimilar in the quantity of the Latin vowels, we find *matronal* marked with the accent upon the firſt ſyllable, and *patronal* on the ſecond. From Dr. Johnſon's accentuation we cannot collect the quantity of the vowel; his authority therefore, in the word in queſtion, is only for the accent on the firſt ſyllable. To him may be added, Mr. Scott, Mr. Perry, and Entick, who accent and ſound the *a* as Mr. Sheridan has done. Dr. Aſh alone ſeems to favour the pronunciation I have given.

MAXILLAR, mâg-zil'lâr. (478).
MAXILLARY, mâks'il-lâr-é. (477). } a.
Belonging to the jaw-bone.

☞ There is a diverſity in the pronunciation of this word which makes it neceſſary to recur to principles to decide which is beſt. Dr. Johnſon, Mr. Sheridan, and Mr. Barclay, accent it on the firſt ſyllable; and Dr. Aſh, Dr. Kenrick, W. Johnſton, Bailey, and Entick, on the ſecond: and notwithſtanding this majority, I am of opinion that the firſt manner is right. For though *Maxillary* and the other ſimilar words of this termination are of the ſame number of ſyllables with the Latin words from which they are derived, as *Maxillaris*, *Capillaris*, &c. (503), yet as our language has an averſion to the accent on the *a* in theſe terminations which has the accent in the Latin words (512), it ſeems agreeable to our own analogy to place the ſtreſs on that ſyllable to which we give a ſecondary ſtreſs in the original word, and that is the firſt. ☞ All our orthöepiſts but Bailey pronounce this word with the accent on the firſt ſyllable; but my judgment much fails me if the true pronunciation ought not to be with the accent on the ſecond, as in *Predicament*. My reaſon is, that this is the ſyllable on which we place the ſecondary accent in pronouncing the Latin words *medicamentum* and *predicamentum*; and it has often been obſerved, that this is our guide for accenting Engliſh words formed from the Latin by dropping a ſyllable. See ACADEMY.

☞ Dr. Johnſon tells us, that this word is now commonly pronounced *medicinal*, with the accent on the ſecond ſyllable, but more properly and more agreeably to the beſt authorities *medicinal*. If by the beſt authorities Dr. Johnſon means the Poets, the queſtion is decided; but I look upon Poets to be the worſt authorities in this caſe, as, by the very rules of their art, a licence is given them to depart from the general pronunciation; and that they often avail themſelves of this licence, cannot be diſputed. But if by more properly Dr. Johnſon alludes to the long *i* in the Latin *medicīnus* or *medicīnalis*, nothing can be more inconcluſive. If the word be perfectly Latin, as well as Engliſh, we generally place the accent on the ſame ſyllable as in the original, as *acumen*, *decorum*, &c. but frequently otherwiſe, as *orator*, *ſenator*, *character*, &c. But if this Latin accentuation were to be ſervilely followed in Latin words angliciſed, we ſhould overturn the whole fabric of our pronunciation. Thus *doctrinal*, *paſtoral*, &c. &c. muſt have the accent on the ſecond ſyllable inſtead of the firſt, and nothing but confuſion would enſue. The truth is, the ſtrong tendency of our language is to an antepenultimate accent, (503); and it is with reluctance we ever place it lower, except in words of our own compoſition, or where the latter ſyllables have either an aſſemblage of conſonants or a diphthong; yet even in this caſe we find the antepenultimate accent ſometimes prevail, as *anceſtor*, *amneſty*, *magiſtrate*, &c. and *counterpoiſe*, *porcelain*, *chamberlain*, *interreign*, &c. So that by attempting to bring our pronunciation under the laws of the Latin language, we diſturb and pervert it. Let Poets, therefore, who have, and, perhaps, in ſome caſes, ought to have, a language different from proſe, enjoy the privilege of their art, and while we are reading them let us conform to their rules; but let us not ſtrive againſt the general current of proſaic pronunciation, which is always right, and which is equally negligent of the peculiarities of poets, and the pedantry of ancient derivation. The antipenultimate accentuation of this word is ſupported by Dr. Aſh, Dr. Kenrick, Mr. Perry, Mr. Smith, W. Johnſton, Barclay, Bailey, Fenning, and Entick. Mr. Sheridan gives both, and, by placing this accentuation firſt, ſeems to prefer it to the other. See INDECOROUS and INIMICAL.

MEDICINALLY, mē-dĭs'ē-năl-lē. ad.
Phyſically.

MEDICINE, mĕd'dē-sĭn. ſ.
Any remedy adminiſtered by a phyſician.

☞ All our orthöepiſts tell us that this word is generally pronounced in two ſyllables, as if written *medcine*. That ſo groſs a vulgariſm ſhould gain ground in our language, is an imputation on our national taſte. Our Poets, who when tortured for a word, often torture a word to eaſe themſelves, are generally guilty of one part only of the cruelty of Procruſtes, and that is of ſhortening ſuch words as are too long for their verſe; and theſe mutilations too often ſlide into our proſaic pronunciation: but againſt this abuſe every accurate ſpeaker ought to be on his guard. Nay, Cowley, as Mr. Nares informs us, cruſhes *medicinal* into two ſyllables; and inſtances from Milton of this kind are innumerable.

Mr. Elphinſton adopts the diſſyllabic pronunciation as more agreeable to its immediate origin, the French *medecine:* but as we preſerve the *i* in this word, the Latin *medicina* ſeems its moſt authentic original, and demands the ſound of the *i* in *medicine* as much as in *ominous*, *mutinous*, and *original*, which Shakeſpeare and Milton ſink in the ſame manner as the word in queſtion.

☞ This word was univerſally, till of late, pronounced with the accent on the ſecond ſyllable, as Dr. Johnſon, W. Johnſton, Dr. Kenrick, Barclay, Bailey, Buchanan, Fenning, and Perry, have marked it. Some ſpeakers have endeavoured to pronounce it with the accent on the firſt, as we find it marked in Mr. Nares, Dr. Aſh, Scott, and Entick: but this is an innovation unſuitable to the genius of our pronunciation; which in diſſyllables, having a diphthong in the laſt, inclines us to place the accent on that ſyllable, as much as in *devoir*; which we find accented on the laſt by all our orthöepiſts without exception.

☞ Mr. Sheridan pronounces the *e* in the firſt ſyllable of this word, like the *a* in *march*; and it is certain that, about thirty years ago, this was the general pronunciation; but ſince that time the ſound of *a* has been gradually wearing away; and the ſound of *e* is ſo fully eſtabliſhed, that the former is now become groſs and vulgar, and is only to be heard among the lower orders of the people. It is, highly probable, that, however coarſe this ſound of *e* may now ſeem, it was once, not only the common pronunciation, but the moſt agreeable to analogy. We ſtill find, that the vowel *i* before *r*, followed by another conſonant, ſinks into a broader ſound by taking the ſhort ſound of *e*, which is really the ſhort ſound of ſlender *a*, as *virgin*, *virtue*, &c.; and it is a ſimilar alteration which takes place in the *e* before *r*, followed by another conſonant, in *clerk*, *ſerjeant*, *Derby*, &c. where this vowel falls into the broader ſound of the Italian *a*. *Sermon*, *ſervice*, *vermin*, &c. are ſtill pronounced by the vulgar, as if written *farmon*, *farvice*, *varment*, &c.; and this was probably the ancient manner of pronouncing every *e* in the ſame ſituation. This analogy is now totally exploded; and, except *clerk*, *ſerjeant*, and a few proper names, we have ſcarcely another word in the language where this *e* has not its true ſound. But inſtead of ſaying with Mr. Nares, that *Merchant* has returned to the proper ſound of *e*, we may with greater probability aſſert, that this and every other word of the ſame form have acquired a ſound of *e*, which they never had before; and which, though a feebler, and a ſhorter ſound, conduces to the ſimplicity and regularity of our pronunciation. Dr. Kenrick concurs, in my opinion, that pronouncing the *e* in this word like *a* is vulgar, and every other orthoëpiſt, who gives the ſound of the vowels, marks it as I have done.

Some have added *mercury* or quickſilver to the number of metals; but as it wants malleability, the criterion of metals, it is more properly ranked among the *ſemi-metals*. Courage, ſpirit.

☞ As the metaphorical ſenſe of this word, *courage* and *ſpirit* has paſſed into a different orthography, *mettle*; ſo the orthography of this ſenſe has corrupted the pronunciation of the original word, and made it perfectly ſimilar to the metaphorical one. It is the only inſtance in the language where *al* is pronounced in this manner, and the impropriety is ſo ſtriking as to encourage an accurate ſpeaker to reſtore the *a* to its ſound, as heard in *medal*.

☞ Mr. Sheridan, Dr. Johnſon, Dr. Aſh, and Bailey, accent the ſecond ſyllable of this word; but Dr. Kenrick, W. Johnſton, Mr. Scott, Buchanan, Barclay, Fenning, and Entick, the firſt. I do not heſitate to pronounce the latter mode the more correct; firſt, as it is a ſimple in our language, and, having three ſyllables, requires the accent on the antepenultimate, notwithſtanding the double *l* (ſee *Medicinal*). In the next place, though there is no *metallinus* in Latin, it ought to follow the analogy of words of that termination derived from Latin, as *Cryſtallinus*, *Serpentinus*, &c. which, when angliciſed, loſe the laſt ſyllable, and remove the accent to the firſt. See ACADEMY. For the *i* in the laſt ſyllable, ſee Principles, No. 148, 149.

☞ This word is accented three different ways by different orthöepiſts. Dr. Johnſon, Barclay, Fenning, and Perry, accent it on the ſecond ſyllable; Sheridan, Buchanan, and Bailey, on the third; and Aſh, Scott, Nares, and Entick, on the firſt; and Kenrick on the firſt and third. The accent on the firſt ſeems to me the moſt correct. Bailey derives this word from the Greek μεταλ-λουργία; and words of this form, upon dropping a ſyllable when angliciſed, remove the accent higher, as *philoſophy*, *philology*, &c. from φιλοσοφία, φιλολογία. The accent thus removed, in enclitical terminations, (513), generally falls upon the antepenultimate ſyllable, unleſs in the two ſucceeding ſyllables there are uncombinable conſonants, as *chiromancy*, *oligarchy*; and in this caſe, for the eaſe of pronunciation, the accent generally riſes to the next ſyllable, which throws a ſecondary or alternate accent on the penultimate, and by this means gives the organs a greater force to pronounce the uncombinable conſonants than if they immediately followed the principal ſtreſs. See Principles, No. 517, 519.

A rhetorical figure, by which one word is put for another, as the matter for the materiate; He died by ſteel, that is, by a ſword.

☞ Authorities for the two different ways of accenting this word are ſo nearly balanced, that it is hard to ſay which preponderates. Dr. Johnſon, Dr. Kenrick, Dr. Aſh, Mr. Perry, Buchanan, and Bailey, are for the firſt; and Mr. Sheridan, Mr. Nares, W. Johnſton, Mr. Scott, Mr. Barclay, Entick, and Gibbon the author of the Rhetorick, for the laſt. In this caſe the ear and analogy ought to decide. I have no doubt but the accent on the firſt ſyllable was the ancient mode of pronouncing this word, as we find it ſo accented in almoſt all the ſyſtems of Rhetorick publiſhed ſeveral years ago for the uſe of ſchools: and as theſe words from the Greek were generally pro-

nounced in the Latin manner; that is, the accent on the antepenultimate in *Metonymia*, and not on the penultimate, as in Μετωνυμία, the ſecondary accent naturally fell on the firſt ſyllable, which as naturally became the principal of the Engliſh *Metonymy*, (503). (See ACADEMY). But that the ear is pleaſed with the antepenultimate accent cannot be doubted; and that this word has as great a right to that accent as *lipothymy*, *homonymy*, *ſynonymy*, &c. is unqueſtionable. Beſides, the enclitical accent, as this may be called, is ſo agreeable to the ear, that, without evident reaſons to the contrary, it ought always to be preferred. See Principles, No. 513, 518, 519.

☞ This word, and the verb from which it is derived, is in Ireland pronounced with the ſhort *i*, as Mr. Sheridan has marked it; but I am much miſtaken if it is not in England pronounced with the long *i*, as more agreeable to the orthography. ☞ The former pronunciation of this word is adopted by Dr. Johnſon, Dr. Kenrick, Mr. Sheridan, Mr. Scott, and Entick; and the latter by Mr. Nares, W. Johnſton, Buchanan, and Perry. That the latter is the more faſhionable cannot be denied; but that the former is the more correct is evident, from ſimilar words which have been angliciſed; thus *Bipeds* and *Quadrupeds* have dropped their Latin final ſyllable; and why the word in queſtion ſhould retain it cannot be conceived. Beſides, though ſeldom uſed in the ſingular, there is no reaſon why it ſhould not be ſo uſed; and then it muſt neceſſarily become a *Milliped*. *Centipede*, properly *Centiped*, is adopted; and by forming *Centipeds* in the plural, ſhows us how we ought to form and pronounce the word in queſtion; and if *Antipodes* has not yet ſubmitted to this analogy, it is becauſe, like *Cantharides*, *Caryatides*, *Manes*, &c. it is never uſed in the ſingular. See ANTIPODES.

MIMETIC, mē-mĕt'ĭk. a. (129).
Apt to imitate; having a tendency to imitation.

☞ This word is in no dictionary that I have met with; but as it is regularly derived from the Greek μιμητικὸς, and is adopted by good ſpeakers, there is no reaſon why it ſhould not be inſerted, eſpecially as it ſeems to convey a different idea from ſimilar words; for the adjective *mimick* ſeems to imply the act of imitating; and *imitative*, the power, capability, or habit, of imitating; while *mimetic* ſignifies a proneneſs or tendency to imitation. Beſides, *mimetic* ſeems to imply a ludicrous imitation of the actions and paſſions of living creatures; but *imitative* is applied to any objects, and generally implies ſerious and reſpectable imitation. Thus we ſay: "Painting is "an *imitative* art, and that apes are very "*mimetic*;" and "it is obſervable, that thoſe "who are very *mimetic* are ſeldom *imitative* "of grand and noble objects." Harris, therefore, ſeems to have uſed this word rather inaccurately, when he ſays, "The *mimetic* art "of poety has been hitherto conſidered, as "fetching its imitation from mere natural reſemblance. In this it has been ſhown much "inferior to painting, and nearly equal to "muſick." *Harris's Three Treatiſes*, ch. iv,

An inſeparable particle uſed in compoſition to mark an ill ſenſe, or depravation of the meaning, as chance, luck, miſchance, ill luck, to like, to be pleaſed, to miſlike, to be offended. It is derived from *mes*, in Teutonick and French, uſed in the ſame ſenſe.

☞ What is remarkable in the pronunciation of this inſeparable prepoſition is, that the *s*, whether the accent be on it or not, or whether it be followed by a ſharp or flat conſonant, it always retains its ſharp hiſſing ſound, and never goes into *z*, like *dis* and *ex*. The reaſon ſeems to be, that the latter come to us compounded, and have their meaning ſo mingled with the word as to coaleſce with it, while *mis* remains a diſtinct prefix, and has but one uniform meaning.

☞ The accent on the firſt ſyllable of this word, which is the accentuation of all our orthoepiſts, except Dr. Kenrick, is a proof of the tendency to follow the ſecondary accent of the original Latin word, notwithſtanding the double conſonant in the middle. Thus *Miſcellanea*, in our pronunciation of it, having a ſtreſs on the firſt, becomes the accent when the word is angliciſed by dropping a ſyllable. See ACADEMY, MAMILLARY, and MEDULLARY.

☞ There is an accentuation of this word upon the ſecond ſyllable, chiefly confined to the vulgar, which, from its agreeableneſs to analogy, is well worthy of being adopted by the learned. Analogy certainly requires that the verb formed from the noun *miſchief* ſhould be *miſchieve*, as from *thief*, *thieve*; *grief*, *grieve*; *belief*, *believe*, &c. with the accent on the ſecond ſyllable, (492); and from ſuch a verb would naturally be formed the adjective in queſtion. But what analogy can give ſanction to a vulgariſm? What Pope obſerves of the learned in another caſe, is but too applicable in this:

"So much they ſcorn the crowd, that if the throng
"By chance go right, they purpoſely go wrong."

To which we may add, that in language, as in many other caſes, it is ſafer to be wrong with the polite than right with the vulgar.

☞ Dr. Johnſon ſays this word has a kind of reciprocal ſenſe. *I miſtake* is like the French *Je me trompe: I am miſtaken*, means *I miſconceive, I am in an error*, more frequently than *I am ill underſtood*; but, *my opinion is miſtaken*, means *my opinion is not rightly underſtood*. Whatever may have been the cauſe of this irregularity, it has long been an eyeſore to our Grammarians, but has got ſuch poſſeſſion of the language as to render it almoſt incurable. Let us avoid it as much as we will in ſpeaking and writing, it will ſtill remain upon our books as a part of the language. *Miſtaken wretch* for *miſtaking wretch* is an apoſtrophe that occurs every where among our poets, particularly thoſe of the ſtage; the moſt incorrigible of all, and the moſt likely to fix and diſſemmate an error of this kind. Our old writers were ignorant of Grammar, and thought all phraſes good that did not quarrel with the ear; but that is not the caſe ſince the labours of Johnſon and Lowth. The beſt way therefore to remedy theſe abuſes, is to avoid them in future. With reſpect to Dr. Johnſon's opinion, that this verb is uſed in a reciprocal ſenſe, it may be obſerved, that this is the caſe with all neuter verbs of action; or as Dr. Lowth calls them, *intranſitively active*, or *tranſitively neuter*; but the verb in queſtion, *I am miſtaken* for *I am miſtaking*, ſeems rather to be what the Latins call a verb *Deponent*; an active verb with a paſſive form: an irregularity which is no recommendation to the Latin language, and is a blemiſh in ours. I recollect but one verb more of this kind; and that is, to *ſpeed* in the ſenſe of to *ſucceed well or ill*, which as a verb neuter ought to have no paſſive form; and yet Pope ſays,

"A dire dilemma! either way I'm *ſped*;
If foes, they write; if friends, they read me dead."

And Otway in the Orphan ſays,

"——I'm marry'd—Death, I'm *ſped*."

☞ The ſame haſte and neceſſity of diſpatch, which has corrupted *Maſter* into *Miſter*, has, when it is a title of civility only, contracted *Miſtreſs* into *Miſſis*. Thus *Mrs. Montague*, *Mrs. Carter*, &c. are pronounced *Miſſis Montague*, *Miſſis Carter*, &c. To pronounce the word as it is written would, in theſe caſes, appear quaint and pedantick.

☞ Tollet tells us, that in the latter end of the reign of King Charles II. the rabble that attended the Earl of Shaftſbury's partiſans was firſt called *mobile vulgus*, and afterwards by contraction the *mob*; and ever ſince the word has become proper Engliſh. To which we may add, that in Mr. Addiſon's time this word was not adopted; for he ſays, (Spectator, No. 135), "I dare not anſwer that *mob*, *rep*, "*pos*, *incog*, and the like," will not in time be looked upon as a part of our tongue.

To MOB, mŏb. v. a.

☞ This word now exiſts as ſpoken, no where but in the Hamlet of Shakeſpeare:

"But who, alas! had ſeen the *mobled* queen!

This is always pronounced *mobbled* upon the ſtage; and this reading appears more correct than *mabled* and *mob-led*, which ſome critics have ſubſtituted; for Dr. Farmer tells us, he has met with this word in *Shirley's Gentleman of Venice*:

"The moon does *mobble* up her ſelf."

This ſeems to receive confirmation from the name women give to a cap, which is little more than a piece of linen drawn together with ſtrings round the head. The learned Mr. Upton's ſuppoſition, that this word ſignifies *led by the mob*, is an anachroniſm, as this word was not in uſe in the time of Shakeſpeare.

☞ Why Mr. Sheridan ſhould pronounce *Dialogue* with the laſt ſyllable like *log*, *Prologue* with the ſame ſyllable like *lug*, and *Monologue*, rhyming with *vogue*, I cannot conceive. The final ſyllable of all words of this termination, when unaccented, are, in my opinion, uniformly like that in *Dialogue*. Mr. Scott has marked it in the ſame manner as I have done, but Mr. Barclay has followed Mr. Sheridan.

MONOME, mŏn'nōme. ſ.
In algebra, a quantity that has but one denomination or name.

MONOMACHY, mō-nŏm'ă-kē.
A duel; a ſingle combat.

☞ Nothing can more ſhow the uncertainty of our orthöepiſts in the pronunciation of unuſual words than the accentuation of this, and thoſe of a ſimilar form. The only words of this termination we have in Johnſon's Dictionary are, *Logomachy*, *Monomachy*, *Sciomachy*, and *Theomachy*. The two firſt of which he accents on the firſt ſyllable, and the two laſt on the ſecond. Mr. Sheridan has but two of them, *Logomachy* and *Sciomachy*; the firſt of which he accents on the firſt ſyllable, and the laſt on the ſecond. Mr. Scott has none of them. Dr. Aſh has them all, and accents *Logomachy*, *Monomachy* and *Theomachy*, on the firſt ſyllable; and *Sciomachy* on the ſecond. Bailey accents *Monomachy* and *Sciomachy* on the firſt ſyllable, and *Logomachy* and *Theomachy* on the third. W. Johnſton has only *Logomachy*, which he accents on the ſecond ſyllable. Mr. Perry has only *Theomachy*, which he accents on the ſecond likewiſe. Entick has them all, and accents them on the firſt; and Dr. Kenrick accents them all on the ſecond ſyllable.

This confuſion among our orthöepiſts plainly ſhews the little attention which is paid to analogy; for this would have informed them, that theſe words are under the ſame predicament as thoſe ending in *graphy*, *logy*, &c. and therefore ought all to have the penultimate accent. An obſcure idea of this induced them to accent ſome of theſe words one way, and ſome another; but nothing can be more evident than the neceſſity of accenting all of them uniformly on the ſame ſyllable. See Principles, No. 513, 518, &c.

As to Dr. Johnſon's obſervation, which is repeated by Dr. Kenrick and Mr. Nares, that *Sciomachy* ought to be written *Skiamachy*, I have only to obſerve at preſent, that writing *a* inſtead of *o* is more agreeable to etymology; but changing *c* into *k*, either in writing or pronouncing, is an irregularity of the moſt pernicious kind, as it has a tendency to overturn the moſt ſettled rules of the language. See SCEPTICK and Principles, No. 350.

Is a noun uſed only in ſome one oblique caſe.

☞ The ſecond pronunciation, which is Dr. Johnſon's, Dr. Aſh's, Mr. Barclay's, and Entick's, is the moſt uſual; but the firſt, which is Mr. Sheridan's, is more agreeable to analogy; for the word is derived from *monoptōton*, which we pronounce with two accents, one on the firſt, and another on the third; and when we ſhorten the word by angliciſing it, we generally place the accent on the ſyllable we accented in the original. See HETEROCLITE.

☞ There is an incorrect pronunciation of this and ſimilar words, chiefly among the vulgar, which is, ſounding the word as if it were written *mo-oold*. This ſound is often heard among incorrect ſpeakers, where there is no diphthong, as in *cold*, *bold*, *ſold*, &c. pronounced *co-oold*, *bo-oold*, *ſo-oold*, &c. while the true pronunciation of theſe words has nothing of the *u* or *oo* in it, but is exactly like *foal'd*, *ſol'd*, *cajol'd*, &c. the preterits of the verbs to *foal*, to *ſole*, and to *cajole*, &c. For there is no middle ſound between *owl* and *hole*; and the words in queſtion muſt either rhyme with *howl'd* or *foal'd*; but the laſt is clearly the true pronunciation.

This word, before Dr. Johnſton wrote his Dictionary, was frequently written *mold*, which was perfectly agreeable to its Saxon derivation, and was leſs liable to miſpronunciation than the preſent ſpelling. The word has three ſignifications, *Mould*, concretions occaſioned by decay; from whence to *moulder*, to waſte away: *mould* or earth; that to which decay reduces bodies: and a *mould*; a form to caſt metals in. A diverſity of pronunciation has endeavoured to diſtinguiſh the firſt of theſe ſenſes from the reſt by ſounding it ſo as to rhyme with *howl'd*; but theſe diſtinctions of ſound under the ſame ſpelling ought to be as much as poſſible avoided. For the reaſons, ſee BOWL.

☞ The vowel *u*, in the firſt ſyllable of this and ſimilar words, forms a remarkable exception to the ſhortening power of the antepenultimate and ſecondary accent; any other vowel but *u*, unleſs followed by a diphthong, would have been ſhort. This ariſes from no regard to the Latin quantity in the word *Muculentus*, for the *u* in *Culinary*, and *Mutilate*, &c. is long in Engliſh, though ſhort in the Latin *Culinarius*, *Mutilo*, &c. So that the long *u* in this and ſimilar words is an idiom of our own pronunciation, (508) (511) (530).

☞ It is highly probable that this word is a corruption of *Murky*, which Johnſon and other writers explain by dark, cloudy, &c. but Skinner tells us it is uſed in Lincolnſhire to ſignify darkneſs, accompanied by heat; and as this temperament of the weather is commonly accompanied by moiſture, the word is generally uſed to ſignify a dark, cloſe, warm, and moiſt, ſtate of the air. As this word is not very legitimately derived, it is ſeldom heard among the learned and polite; but as it affords us a new complex idea, and is in much uſe among the middle ranks of life, it ſeems not unworthy of being adopted.

MY, mī, or mē. pronoun poſſeſſive.

☞ There is a puzzling diverſity to foreigners in the pronunciation of this word, and ſometimes to natives, when they read, which ought to be explained. It is certain that the pronoun *my*, when it is contradiſtinguiſhed from any other poſſeſſive pronoun, and conſequently emphatical, is always pronounced with its full, open ſound, rhyming with *fly*; but when there is no ſuch emphaſis, it falls exactly into the ſound of *me*, the oblique caſe of *I*. Thus if I were to ſay, *My pen is as bad as my paper*, I ſhould neceſſarily pronounce *my* like *me*, as in this ſentence pen and paper are the emphatical words; but if I were to ſay, *My pen is worſe than yours*, here *my* is in oppoſition to *yours*, and muſt, as it is emphatical, be pronounced ſo as to rhyme with *high*, *nigh*, &c.

☞ Dr. Johnſon ſays this word is only uſed in Scotland; but as it is regularly derived from the Latin *narro*, and has a ſpecific meaning to diſtinguiſh it from every other word, it ought to be conſidered as a neceſſary part of the language. To *tell* ſeems to imply communication in the moſt general ſenſe: as to *tell a ſtory*, to *tell a ſecret*, &c. To *relate*, is to tell at ſome length, and in ſome order, as to *relate the particulars of a tranſaction*: but to *narrate* ſeems to relate a tranſaction in order from beginning to end; which often becomes inſipid and tireſome. Hence the beauty of Pope's——*narrative* old age:
"The poor, the rich, the valiant, and the ſage,
"And boaſting youth, and *narrative* old age."

☞ There is a vulgar pronunciation of this word as if written *na-ter*, which cannot be too careſully avoided. Some critics have contended, that it ought to be pronounced as if written *nate-yure*; but this pronunciation comes ſo near to that here adopted as ſcarcely to be diſtinguiſhable from it. *T* before *y*, which is the letter long *u* begins with (8), approaches ſo near to *ſh*, as, in the abſence of

accent, naturally to fall into it, in the ſame manner as *s* becomes *zh* in *leiſure*, *pleaſure*, &c. The ſibilation and aſpiration of *t* in this and ſimilar words, provided they are not too coarſely pronounced, are ſo far from being a deformity in our language, by increaſing the number of hiſſing ſounds, as ſome have inſinuated, that they are a real beauty; and by a certain coaleſcence and flow of ſound, contribute greatly to the ſmoothneſs and volubility of pronunciation. See Principles, No. 459, 460, 461, &c.

This is a proof how much mere ſimilitude of ſound often operates in fixing pronunciation. The termination *ty*, being almoſt always preceded by *e* or *i* in words of Latin or French formation, where theſe vowels form a diſtinct ſyllable, as *variety*, *gayety*, *anxiety*, *ſociety*, &c. Words of mere Engliſh formation that approach to them are thus carried into the ſame pronunciation by bare likeneſs of ſound only.

☞ W. Johnſton and Entick are the only orthöepiſts who adopt the firſt mode of accenting this word; while Dr. Johnſon, Dr. Aſh, Mr. Sheridan, Dr. Kenrick, Buchanan, Perry, and Barclay, adopt the laſt. Mr. Scott adopts both, but ſeems to give the latter the preference by placing it firſt. The accentuation of this word muſt be determined by that of *obdurate*, from which it is derived. It ſeems, however, to follow the example of *accuracy*, *procuracy*, &c. in throwing the accent on the firſt ſyllable. As there are ſome terminations which ſeem to attract the accent to the latter ſyllables, as *ator*, *end*, &c. as *ſpectator*, *obſervator*, &c. *comprehend*, *apprehend*, &c. ſo there are others that ſeem to repel it to the beginning of the word, as *ary*, *acy*, &c. as *efficacy*, *optimacy*, *contumacy*, &c. *ſalutary*, *tributary*, *adverſary*, &c.. The word in queſtion ſeems to be of the latter claſs, and therefore more analogically pronounced with the accent on the firſt than on the ſecond ſyllable. See OBDURATE.

OBDURATE, ŏb'jū-rāte, or ŏb-dū'rāte a. (91) (293) (294) (503). Hard of heart, inflexibly obſtinate in ill, hardened; firm, ſtubborn; harſh, rugged.

☞ This word is pronounced with the accent on the ſecond ſyllable by Dr. Johnſon, Mr. Sheridan, Dr. Kenrick, Dr. Aſh, Mr. Nares, Mr. Elphinſton, Mr. Barclay, Buchanan, and Mr. Perry; and on the firſt by Bailey, Entick, and W. Johnſton. Mr. Scott accents it either on the firſt or ſecond, but ſeems to give the preference to the latter. The Poets are decidedly in favour of the penultimate accent; and when the uſage of poetry does not contradict any plain analogy of proſaic pronunciation, it certainly has a reſpectable authority. But the verb to *indurate* is a word of exactly the ſame form, and has the ſame derivation; and yet Dr. Johnſon, Mr. Sheridan, Dr. Kenrick, Mr. Scott, W. Johnſton, Barclay, and Entick, place the accent on the firſt ſyllable: and my obſervation fails me if there is not a ſtrong propenſity in cuſtom to place the accent on the firſt ſyllable of the word in queſtion. This propenſity, as there is a plain analogy in favour of it, ought, in my opinion, to be indulged. To *indurate* is a verb, derived from the Latin *induro*, forming its participle in *atus*; and words of this kind are generally anglicized by the termination *ate*, and have the accent at leaſt as high as the antepenultimate: thus from *depuro*, *propago*, *deſolo*, &c. are formed to *depurate*, to *propagate*, to *deſolate*, &c.; and, without recurring to the Latin *induratus*, we form the regular participle *indurated* from the verb to *indurate*. But though there is the Latin verb *obduro*, we have not formed an Engliſh verb from it in *ate* as in the former caſe, but derive the adjective *obdurate* from the Latin participial adjective *obduratus*; and no analogy can be more uniform than that of removing the accent two ſyllables higher than in the original: thus *deſperate*, *profligate*, and *defecate*, have the accent on the firſt ſyllable; and *deſperatus*, *profligatus*, and *defæcatus*, on the third. Agreeably, therefore, to every analogy of derivation, *obdurate* ought to have the accent on the firſt ſyllable; and as poets have adopted the other accentuation, we muſt, as in *medicinal*, and ſome other words, admit of a poetical and a proſaic pronunciation rather than croſs ſo clear an analogy in favour of poetry; which is ſo frequently at variance with proſe, and ſometimes with itſelf. See ACADEMY and INCOMPARABLE.

Obedience, ō-bē'jĕ-ĕnſe. ſ. (293) (376). Obſequiouſneſs, ſubmiſſion to authority.

☞ The *o* which forms the firſt ſyllable of this word, though not under the accent, may occaſionally be pronounced as long and open as the *o* in *oval*, *over*, &c. (ſee Efface); and though in rapid pronunciation it admits of a ſhort obſcure ſound, common to ſome of the other vowels when unaccented, yet its radical ſound, or that which it acquires on the leaſt diſtinctneſs or ſolemnity, is undoubtedly the long open *o* before mentioned. Thus in that fugitive pronunciation which has no exiſtence but in the ear, and can hardly be expreſſed to the eye by a correſpondent ſound, we perceive very little difference in the ſound of the initial vowels of *abound*, *upbraid*, and *obedience*; yet the moment we dwell with the leaſt diſtinctneſs on theſe letters, the *a* in *abound* verges to the *a* in *Father*; the *u* has the ſhort ſound we hear in the preposition *up*; and the *o* in *obedience* becomes open, as the firſt ſound of that letter in the alphabet. The ſame may be obſerved of the *o* in *opaque*, *opinion*, and every initial *o* ending a ſyllable immediately before the accent. See Principles, No. 98.

Obeisance, ō-bā'ſănſe. ſ. (250).

☞ I muſt retract my former pronunciation of this word which made the diphthong *ei* like *e* in *obedience*, and adopt the ſound of *a* as in the *ey* of *obey*. For the former ſound we have Mr. Sheridan, Dr. Kenrick, and Mr. Perry; and for the latter, Mr. Nares, Mr. Elphinſton, Mr. Scott, and W. Johnſton. But if the authorities for this pronunciation were leſs weighty than they are, analogy would be clearly on the ſide I have adopted, as *ei*, when under the accent, is much more frequently pronounced like *ey* in *obey* than like *ey* in *key*: the latter word being the only exception to the general rule of pronouncing *ey* when accented; and theſe letters we know are perfectly equivalent to *ei*.

☞ What was obſerved of the *e* in *Efface* is applicable to the *o* in the firſt ſyllable of this word. From the tendency of the vowel to open, when immediately preceeding the accent, we find elegant ſpeakers ſometimes pronounce the *o* in *occaſion*, *offend*, *officious*, &c. as if written *o-caſion*, *o-fend*, *o-ficious*, &c. This ſeems to be one of thoſe "faults true "critics dare not mend." But as it is an evident deviation from the orthography, I have not dared to mark theſe words in this manner. See *Efface*. It muſt, however, be remarked, that this deviation only takes place before double *c* in the word *occaſion* and its compounds.

OPHTHALMICK, ŏp-*th*ȧl'mĭk. n.
Relating to the eye.

☞ Two aſpirations in ſucceſſion, ſays Mr. Elphinſton, ſeem diſagreeable to an Engliſh ear, and therefore one of them is generally ſunk. Thus *diphthong* and *triphthong* are pronounced *dipthong* and *tripthong*. *P* is loſt as well as *b* in *apophthegm*; and therefore it is no wonder we hear the firſt *b* dropped in *ophthalmy* and *ophthalmick*, which is the pronunciation I have adopted as agreeable to analogy. Nay, ſuch an averſion do we ſeem to have to a ſucceſſion of aſpirates, that the *h* is ſunk in *Iſthmus*, *Eſther*, and *Demoſthenes*, becauſe the *s*, which is akin to the aſpiration, immediately precedes. Mr. Sheridan pronounces the firſt ſyllable of this word like *off*, but the firſt of *diphthong* and *triphthong*, like *dip* and *trip*. Mr. Scott, W. Johnſton, and Mr. Perry, have not got this word, but pronounce *diphthong* and *triphthong* in the ſame manner as Mr. Sheridan. Dr. Kenrick alſo wants the word; he gives no pronunciation to *diphthong*, but makes the *h* ſilent in *triphthong*; while Bartlay pronounces the *h* in *ophthalmick*, makes it either way in *diphthong* and ſilent in *triphthong*. It may be remarked, that Dr. Jones, who wrote a ſpelling Dictionary in Queen Anne's time, makes the *h* in theſe two words ſilent.

That the laſt is more general, particularly in Grammar ſchools, will be readily acknowledged, but that the firſt is more correct and agreeable to analogy cannot be denied: for this word is not ſo naturally derived from the claſſical *optatus* as the lower Latin *optativus*: and why this word ſhould transfer its penultimate accent to the firſt ſyllable of the Engliſh word, may be ſeen under the words ACADEMY, INCOMPARABLE, &c.

☞ I have inſerted this word, though omitted by almoſt all our lexicographers, becauſe I have met with it in authors of reputation. Dr. Forſter in his Treatiſe on Accent and Quantity, ſays: "The connexion of this, "which may be called the *oratorial* accent, "with the ſyllable, and the ſubordination of "them to each other, however difficult it "may appear, is yet eaſy in practice." page 23. Other good authorities for this word might have been adduced, but the other adjective *oratorical*, though not ſo juſtly formed, ſeems generally to be preferred. I have ſometimes made the experiment on people, whoſe ears were nicely ſet to pure Engliſh pronunciation, by propoſing to them for their choice the adjectives *oratorial* or *oratorical*, and have always found them prefer the latter. This may, in ſome meaſure, ariſe from ſuppoſing the former might be conſidered as the adjective of *oratorio*, but ſeems rather to be occaſioned by too great a plenitude and rotundity of ſound, which is not agreeable to the genius of our language: for if we regard derivation only, the adjective ought to be *oratorial*, as derived immediately from the Latin *oratorius*, in the ſame manner as from *rhetoricus*, is formed *rhetorical*.

☞ This word is accented on the firſt ſyllable by Dr. Johnſon, Mr. Sheridan, Dr. Aſh, Mr. Scott, Mr. Nares, Buchanan, Entick, Perry, and Barclay; and by Bailey and W. Johnſton on the ſecond; and by Dr. Kenrick on either. The firſt mode has not only the majority of votes in its favour, but is agreeable to the general analogy of words of three ſyllables, which, when not of our own formation, commonly adopt the antepenultimate accent. The exception to this rule will be found under the next word.

ORCHESTRA, ŏr-kĕs'trā. (503).
A part of the theatre appropriated to the muſicians.

☞ Dr. Johnſon has preferred the French *orcheſtre*, to the Latin *orcheſtra*, and the Greek ὀρχηστρα; but as we find the latter ſpelling and pronunciation univerſally adopted; and as we take almoſt every other term of art rather from the Greek than any other language, I have ventured to inſert it in that dreſs after Chambers, and ſome other very reſpectable authors.

This word is accented on the firſt ſyllable by Dr. Aſh, Mr. Scott, Mr. Perry, Entick, and Barclay; but Mr. Nares ſays it is accented on the ſecond, as I have given it. For notwithſtanding the numbers againſt me, the very general rule is on my ſide; which is, that when we adopt a word whole from the Latin or Greek, it ought to have the ſame accent as in thoſe languages. See Principles, No. 503.

☞ Mr. Sheridan has adopted the other ſpelling from the French *oraiſon*; but Dr. Johnſon, and all the writers he quotes, ſpell the word in the manner I have done. Dr. Johnſon tells us this word is variouſly accented; that Shakeſpeare has the accent both on the firſt and ſecond ſyllables, Milton and Craſhaw on the firſt, and others on the ſecond.

"The fair Ophelia! Nymph in thy *oriſons*,
"Be all my ſins remembered." *Hamlet.*

"Alas! your too much love and care of me
"Are heavy *oriſons* 'gainſt this poor wretch."
Henry the Fifth.

"My wakeful lay ſhall knock
"At th' oriental gates, and duly mock
"The early lark's ſhrill *oriſons* to be
"An anthem at the day's nativity."
Craſhaw.

"His daily *oriſons* attract our ears."
Sandys.

"Lowly they bow'd adoring, and began
"Their *oriſons* each morning duly paid."
Milton.

"So went he on with his *oriſons*;
"Which, if you mark them well, were wiſe
"ones." *Cotton.*

"Here, at dead of night,
"The hermit oft 'mid his *oriſons* hears
"Agaſt the voice of time diſparting tow'rs."
Dyer.

"The midnight clock atteſts my fervent pray'rs,
"The riſing ſun my *oriſons* declares."
Harte.

Mr. Nares tells us he has no doubt that Milton's accentuation is right. This too is my opinion. Poets are not the beſt authorities, even when they are unanimous; but much worſe when they differ from others, and even from themſelves. We muſt therefore leave them the liberty of accenting both ways, either for the ſake of the verſe, the rhyme, the humour, or the affectation of ſingularity, and bring our reaſon for accenting this word in proſe on the firſt ſyllable, from the very general rule in Principles, No. 503. Accordingly Mr. Elphinſton, Mr. Sheridan, Mr. Scott, Dr. Kenrick, Buchanan, W. Johnſton, Barclay, Bailey, Perry, and Entick, uniformly place the accent on the firſt ſyllable; and Dr. Aſh ſays it is ſometimes accented on the ſecond.

☞ There is a ſet of words of ſimilar derivation and termination, which muſt be neceſſarily accented in the ſame way: theſe are *Axillary*, *Maxillary*, *Capillary*, *Papillary*, *Pupillary*, *Armillary*, *Mammillary*, and *Medullary*. All theſe, except the laſt which was not inſerted, I had accented on the firſt ſyllable in a Rhyming and Pronouncing Dictionary, publiſhed twenty years ago. This accentuation I ſtill think the moſt agreeable to analogy; and that the inſpector may judge of the uſage, I have ſubjoined the ſeveral different modes of accentuation of the different orthöepiſts:

Ax'illary,	Johnſon, Kenrick.
Axil'lary,	Sheridan, Aſh, Bailey.

Med'ullary,	No examples.
Medul'lary,	Johnſon, Sheridan, Aſh, Kenrick, W. Johnſton, Buchanan, Bailey, Barclay, Fenning, Entick.

This extract ſufficiently ſhows how uncertain uſage is, and the neceſſity of recurring to principles: and that theſe are on the ſide I have adopted, may be gathered from No. 512. See MAMMILLARY, and MAXILLARY.

PAPILLOUS, pā-pil'lūs.
The ſame with PAPILLARY.

☞ There is ſome diverſity in the accentuation of this word as well as the former; Dr. Johnſon and Barclay place the accent on the firſt ſyllable; and Mr. Sheridan, Dr. Kenrick, Dr. Aſh, and Mr. Perry, on the ſecond, as I have done.

☞ All our orthöepiſts agree in accenting this word on the firſt ſyllable. Mr. Nares ſays, Dr. Johnſon has improperly accented this word on the laſt; but both in the folio edition of his Dictionary and the quarto printed ſince his death, the accent is on the firſt. There is not the ſame uniformity in the accentuation of the companion to this word *artiſan*; for though Mr. Nares, Mr. Perry, Dr. Aſh, W. Johnſton, Buchanan, Bailey, Fenning, and Entick, accent the firſt ſyllable, Dr. Johnſon, in both editions of his Dictionary, Mr. She-

ridan, Mr. Scott, and Mr. Barclay, accent the laſt: and Dr. Kenrick places an accent on both firſt and laſt. The ſame diverſity appears in the accentuation of *courteſan*, a word of exactly the ſame form; which is accented by Mr. Sheridan, Mr. Scott, W. Johnſton, Mr. Nares, Fenning, and Entick, on the laſt ſyllable; and by Dr. Aſh, Dr. Kenrick, Buchanan, Barclay, Bailey, and Fenning, on the firſt; and by Mr. Perry both on the firſt and laſt. The truth is, theſe three words are among thoſe which admit of the accent either on the firſt or laſt ſyllable, and this has produced the diverſity we find in our dictionaries (524). The accent on the firſt ſyllable ſeems the moſt agreeable to our own analogy, and ought to be preferred (503).

But when the word is a substantive, it is pronounced with the *a* short by Mr. Nares and all these orthoepists, except Buchanan. Love of one's country, zeal for one's country.

PATROL, pă-trōle'. s.
The act of going the rounds in a garrison to observe that orders are kept; those that go the rounds.

☞ All our orthoepists give this word, both as noun and verb, the accent on the last syllable, except Mr. Nares, who wishes to reduce it to the accentual distinction so often observed (492). Johnson's folio edition has the accent of both words on the first, but the quarto accents both on the last: and this accentuation, it is certain, is the most received among the polite world.

To PATROL, pă-trōle'. v. n.
To go the rounds in a camp or garrison.

PATRON, pā'trŭn. s. (166).
One who countenances, supports, or protects; a guardian saint; advocate, defender, vindicator; one who has donation of ecclesiastical preferment.

PATRONAGE, păt'trŭn-ĭdje. s. (90).
Support, protection; guardianship of saints; donation of a benefice, right of conferring a benefice.

☞ That the first syllable of this word is short, and that of *patron* long, is owing to the shortening power of the antepenultimate accent (509).

PATRONAL, păt'rō-năl. a.
Protecting, supporting, guarding, defending.

☞ This word, like *Matronal*, has a diversity of pronunciation in our Dictionaries, which shows the necessity of recurring to principles in order to fix its true sound. Buchanan places the accent on the first syllable of this word; but whether he makes the *a* long or short cannot be known. Dr. Ash places the accent on the same syllable; and though he makes the *a* in *Matronal* short, makes the same letter in this word long as in *Patron*. Barclay and Fenning lay the stress upon the first of *Matronal*, and on the second of *Patronal*: Perry and Entick place the accent on the first of both these words, but make the *a* in *Matronal* long, and the same letter in *Patronal* short. Bailey accents the second syllable of this word.

PATRONESS, pā'trŭn-ĕs. s.
A female that defends, countenances, or supports; a female guardian saint.

☞ I am well aware of the shortening power of the antepenultimate accent in *Patronage*, *Patronise*, &c. but cannot, as Mr. Sheridan, Mr. Scott, W. Johnston, Dr. Kenrick, and Mr. Perry, have done, allow it that power in *Patroness*, because the feminine termination *ess* is as much a subjunctive of our own as the participial terminations *ing* or *ed*, or the plural number, and therefore never ought to

alter the accent or quantity of the original word. See Principles, No. 386, 409.

☞ Mr. Nares tells us that this word throws the accent back to the fourth ſyllable from the end, though the derivation demands it otherwiſe. I am ſorry to differ from ſo judicious an orthöepiſt; but cannot conceive that derivation requires the ſame accent as on *durable*, ſince this word is, like many others, conſidered as a ſimple derived from the Latin *perdurabilis*, which, though not a claſſical word, is formed in the Latin analogy, and has the ſame effect on Engliſh pronunciation as if it came to us whole; which effect is to place the accent in the angliciſed word on that ſyllable which had a ſecondary accent in Latin, and that is the firſt. See ACADEMY and INCOMPARABLE.

The reaſon why ſuch a formative as *perdurabilis* may be admitted as the parent of *perdurable*, and not *interferio* that of *interference*, is, that we form *interference* from the verb to *interfere*, rather than from *interferio*, which is not a Latin word, though perhaps in the Latin analogy of formation; but we have no verb to *perdure* from whence to form *perdurable*, and therefore allowably follow the Latin analogy of formation, and the Engliſh analogy of pronouncing ſuch formatives. See INTERFERENCE. Poetical authorities are decidedly in favour of this accentuation.

"O *perdurable* ſhame! let's ſtab ourſelves."
Shakeſpeare.

"——— the vig'rous ſweat
"Doth lend the lively ſprings their *perdurable*
"heat." *Drayton.*

"Why would he, for the momentary trick,
"Be *perdurably* fin'd?" *Shakeſpeare.*

Dogmatical, abſolute, ſuch as deſtroys all farther expoſtulation. For the *o*, ſee DOMESTICK.

☞ If we conſult our orthöepiſts, there can ſcarcely be any two pronunciations more equally balanced than thoſe that are given to this word. Mr. Sheridan, Mr Nares, Mr. Smith, Dr. Aſh, W. Johnſton, Mr. Scott, and Entick, are for the firſt; and Dr. Johnſon, Dr. Kenrick, Bailey, Buchanan, Barclay, Fenning, and Perry, for the laſt; but notwithſtanding the laſt has theſe authorities to ſupport it, I am much miſtaken if the firſt has not obtained a compleat victory. That there is a ſtrong tendency in words of this kind to draw the accent high, is evident; it is as evident likewiſe, that thoſe polyſyllables, which we derive from the Latin, incline to accent that ſyllable on which we place a ſecondary accent in pronouncing the original, (ſee ACADEMY and DISPUTABLE); and provided there are no cluſters of uncombinable conſonants in the latter ſyllables, there is no reaſon why this accentuation ſhould be checked. This is the caſe with the word in queſtion; the *p* is mute, *t* is eaſily pronounced after *em*, and the whole termination is ſufficiently ſmooth and voluble; but in *Perfunctory* the caſe is different; the uncombinable conſonants *nct* are not to be pronounced without conſiderable difficulty, if we place the accent on the firſt ſyllable; and therefore this accentuation ought to be avoided as much as in *Corruptible*, which ſee. The Poets incline to the ſide I have adopted:

"To-morrow be in readineſs to go,
"Excuſe it not, for I am *peremptory*."
Shakeſpeare.

"If I entertaine
"As *peremptorie* a deſire, to level with the
"plaine
"A citie, where they lov'd to live; ſtand
"not betwixt my ire
"And what he aims at." *Chapman.*

To PERFORM, pĕr-fȯrm′, or pĕr-fȯrm′. v. a.
To execute, to do, to discharge, to achieve an undertaking.

☞ There is a wanton deviation from rule in the pronunciation of this word and its derivatives, which calls aloud for reformation. Pronouncing the last syllable like *form*, a feat, is a gross departure from analogy; as will appear by comparing it with the same syllable in *reform*, *conform*, *inform*, *deform*, *transform*, &c. This error seems chiefly confined to the stage, where it probably originated. It is not unlikely that some affected actor, to give the word a foreign air, first pronounced it in this manner; though, in justice to the stage, it ought to be observed, that it has less affectation than any theatre of elocution in the kingdom.

☞ I have differed from Mr. Sheridan and W. Johnston, who accent this word on the first syllable, but have Dr. Johnson, Dr. Ash, Mr. Nares, Barclay, Fenning, Bailey, Buchanan, and Entick, on my side for accenting the second; and this pronunciation, without any authority, would be more eligible than the other, from the difficulty of pronouncing the uncombinable consonants in the last syllables without the assistance of accent, especially when we consider that the adverb *perfunctorily* and the possible abstract noun *perfunctoriness* must necessarily have the same accent as the adjective. See PEREMPTORY, IRREFRAGABLE and CORRUPTIBLE.

☞ Mr. Nares obſerves, that this word was anciently written *perſever*, and accented on the ſecond ſyllable.

" ———ſay thou art mine.
" My love, as it begins ſo ſhall *perſever*."
All's well, &c. Act IV.

" *Perſever* not, but hear me, mighty kings."
King John, Act II.

" But in her pride ſhe doth *perſever* ſtill."
Spencer.

But that before the time of Milton the ſpelling and accentuation had been changed.

" Whence heavy perſecution ſhall ariſe
" Of all who in the worſhip *perſevere*
" Of ſpirit and truth."———
Par. Loſt, xii. v. 532.

As this word is written at preſent there can be no doubt of its pronunciation; and that it is very properly written ſo, appears from other words of the ſame form. *Declare*, *reſpire*, *explore*, *procure*, &c. from *declaro*, *reſpiro*, *exploro*, *procuro*, &c. and conſequently from *perſevero* ought to be formed *perſevere*; not one of our orthöepiſts place the accent on the ſecond ſyllable; yet ſuch is the force of preſcription, that the old pronunciation is not entirely rooted out, eſpecially in Ireland, where this pronunciation is ſtill prevalent.

See **Parson**.

Personable, pĕr′sŭn-ā-bl. a.
Handſome, graceful, of good appearance.

☞ As the *o* in *perſon* is ſunk, as in *ſeaſon*, *treaſon*, &c. ſo this word being a compound of our own, and *perſonage* coming to us from the French, we generally ſuppreſs the *o*; but as *perſonal*, *perſonate*, &c. come to us from the Latin, we generally preſerve the *o*. This is the beſt reaſon I can give for the ſlight difference we find in the pronunciation of theſe words; and if any one is inclined to think we ought to preſerve the *o* diſtinctly in all of them, except *perſon*, and even in this, on ſolemn occaſions, I have not the leaſt objection.

☞ This word, as may be ſeen in Johnſon, was generally accented by the poets on the firſt ſyllable; but the harſhneſs of this pronunciation ariſing from the uncombinable conſonants in the latter ſyllables, has prevented this pronunciation from gaining any ground in proſe; and it were much to be wiſhed that the ſame reaſon had prevented the initial accentuation of ſimilar words. See **Irrefragable**, **Corruptible**, **Acceptable**, &c.

☞ I muſt retract my former pronunciation of the firſt ſyllable of this word with Mr. Sheriden and Mr. Perry, and join Dr. Kenrick and Mr. Scott, who make the *e* long. In all words of this form we ought to incline to this pronunciation from its being ſo agreeable to analogy. Let it not be pretended that the *e* in

the Latin *petalum* is ſhort; ſo is the *a* in *labellum*, and the *i* in *libellus*, which yet in the Engliſh *label* and *libel* we pronounce long. But however right the long ſound of *e* may be in analogy, I am apprehenſive that, as in *Pedals*, the ſhort ſound is in more general uſe. See PEDALS.

☞ The ſecond manner of pronouncing this word is more general; but the firſt is more analogical. If, when we pronounce a Latin or Greek word of two ſyllables, having a ſingle conſonant between two vowels, we always make the firſt vowel long; it is very natural, when ſuch a word is tranſplanted whole into our own language, to pronounce it in the ſame manner. That the quantity of the original has very little to do in this caſe may be ſeen under the word *Drama* (544); and yet nothing but an abſurd regard to this could have influenced the generality of ſpeakers to pronounce this word with the firſt vowel ſhort, contrary to the old genuine analogy of our own language, as Dr. Wallis calls it, and contrary to the manner in which we pronounce the word in the original; for though *local*, *favour*, and *labour*, have the firſt vowel ſhort in the Latin *localis*, *favor*, and *labor*, we pronounce them both in Latin and Engliſh according to our own analogy, with the *o* and *a* long and open. The ſame may be obſerved of words from the Greek. In the word in queſtion, therefore, the authority of Mr. Sheridan, Mr. Scott, and Dr. Aſh, who make the firſt vowel long, ought to outweigh that of Dr. Kenrick, Mr. Perry, Entick, and Buchanan, who make it ſhort.

☞ Profeſſors of every art think they add to its dignity, not only by deriving the terms of it from the Greek, but by pronouncing theſe terms contrary to the analogy of our own language. For this reaſon our pronunciation becomes full of anomalies, and the profeſſors of an art ſpeak one language, and the reſt of the world, another. Thoſe, therefore, who are not chemiſts ought, in my opinion, to enter their proteſt againſt the irregular ſound of the *g* in this and ſimilar words. Pronouncing the *g* ſoft would only hurt the pride of the profeſſor; but pronouncing it hard would hurt the genius of the language. See HETEROGENEOUS.

PHRENETICK, frē-nĕt'ĭk. a. Mad, inflamed in the brain, frantick.

☞ This word, as well as *Frenetick*, is pronounced by Mr. Sheridan with the accent on the firſt ſyllable; in which, though he is contrary to analogy, he is conſiſtent. But Dr. Johnſon, Dr. Kenrick, and Mr. Barclay, pronounce *Frenetick* with the accent on the firſt ſyllable, and *Phrenetick* with the accent on the ſecond. That the latter is the true pronunciation can ſcarcely be doubted, if we conſult analogy (509); and that it is moſt in uſe, may appear from the additional ſuffrages of Dr. Aſh, Mr. Nares, Mr. Scott, Mr. Perry, W. Johnſton, Entick, Bailey, and Fenning.

PHYSIOGNOMIST, fĭzh-ē-ŏg'nō-mĭſt. (518). }
One who judges of the temper or future fortune by the features of the face.

☞ For the propriety of pronouncing the *s* in theſe words like *zh*, we need only appeal to analogy. *S* before a diphthong beginning with *i*, and having the accent before it, either primary or ſecondary, always goes into *zh*, as may be ſeen, Principles, No. 451. The ſecondary accent on the firſt ſyllable of theſe words gives a feebleneſs to the ſecond, which occaſions the aſpiration of *s* as much as in *evaſion*, *adheſion*, &c. where the *s* is preceded by the primary accent. It muſt, however, be acknowledged, that this is far from being the moſt general pronunciation. See ECCLESIASTICK.

PHYSIOGNOMY, fĭzh-ē-ŏg'nō-mē. ſ. The art of diſcovering the temper and foreknowing the fortune by the features of the face; the face, the caſt of the look.

☞ There is a prevailing miſpronunciation of this word by leaving out the *g* as if the word were French. If this ariſes from ignorance of the common rules of ſpelling, it may be obſerved, that *g* is always pronounced before *n* when it is not in the ſame ſyllable; as *ſig-nify*, *indig-nity*, &c.; but if affectation be the cauſe of this error, Dr. Young's *Love of Fame* will be the beſt cure for it. See PATHOGNOMONICK.

Mr. Scott marks it both ways, but ſeems to give the ſhort ſound the preference by placing it firſt. This, from the ſhortening power of the antepenultimate accent, it muſt be confeſſed, is the moſt analogical (585): but this word and its companion, *capable*, ſeem immoveably fixed in the long ſound of the antepenultimate, though the *o* in the ſame ſituation in *docible* and *indocible* evidently inclines to the ſhort ſound. Johnſton, and Entick, mark it with the *a* long, as if written *play-jary*: and to know which is the true pronunciation, we need only recur to analogy, which tells us, that every vowel, except *i*, having the accent, and, being followed by a diphthong, is long. ☞ The firſt pronunciation of this word is adopted by Dr. Aſh, Dr. Kenrick, W. Johnſton, Mr. Perry, and Entick; and the laſt by Mr. Sheridan, Mr. Elphinſton, and Mr. Scott. Mr. Elphinſton is in this word conſiſtent with his pronunciation of *primacy*;

but my ear and obſervation greatly fail me if the firſt mode of pronouncing this word is not the moſt agreeable to polite as well as general uſage. It ſeems to retain the ſound of its primitive *private*, as *piracy* does of *pirate*; which word *piracy* Mr. Elphinſton, in oppoſition to all our orthöepiſts, pronounces with the *i* ſhort.

☞ Mr. Sheridan, Dr. Kenrick, Dr. Aſh, Mr. Scott, W. Johnſton, and Entick, make the firſt ſyllable of this word ſhort as I have done; and Mr. Perry and Buchanan make it long. In defence of the firſt pronunciation it may be obſerved, that this word is not like *primacy* and *primary*; the firſt of which is a formative of our own; and the ſecond, derived from the Latin *primarius*, which in our pronunciation of the Latin does not ſhorten the *i* in the firſt ſyllable as *privativus* does, (ſee ACADEMY and INCOMPARABLE); and therefore theſe words are no rule for the pronunciation of this; which, beſides the general tendency of the penultimate accent to ſhorten every vowel it falls on, but *u* (535) ſeems to have another claim to the ſhort vowel from its termination; thus *sănative*, *dŏnative*, *prĭmitive*, *derĭvative*, &c. all plead for the ſhort ſound.

☞ Mr. Sheridan, Mr. Nares, Dr. Johnſon, Dr. Aſh, Mr. Scott, W. Johnſton, and Mr. Perry, place the accent on the firſt ſyllable of this word; and thoſe who give the quantity of the vowels, make it ſhort. Buchanan alone, though he places the accent on the firſt ſyllable, makes it long.

Mr. Nares ſuſpects the accentuation of this word on the ſecond ſyllable to be the moſt ancient, though Shakeſpeare ſo frequently places the accent on the firſt;

"Tell her the *proceſs* of Antonio's end."
Merchant of Venice.

"In brief, to ſet the needleſs *proceſs* by."
Meaſure for Meaſure.

"In *proceſs* of the ſeaſons I have ſeen."
Shakeſpeare's Sonnets.

But Milton accents the ſecond ſyllable:

"Cannot without *proceſs* of ſpeech be told."
Par. Loſt, vii. 178.

"———— which might riſe
"By policy and long *proceſs* of time."
Ib. ii. 297.

There is a phraſe, as Mr. Nares obſerves, *in proceſs of time*, where we oftener hear the accent on the ſecond ſyllable of this word than the firſt. This is undoubtedly a proof of the juſtneſs of his obſervation reſpecting the antiquity of this pronunciation; but as it is now antiquated in other phraſes, it ought not to be uſed in this.

☞ There are few words more frequently miſpronounced than this. A mere Engliſh ſcholar, who conſiders the verb to *pronounce* as the root of it, cannot eaſily conceive why the *o* is thrown out of the ſecond ſyllable, and therefore, to correct the miſtake, ſounds the word as if written *Pronounciation*: Thoſe who are ſufficiently learned to eſcape this error, by underſtanding that the word comes to us either from the Latin *pronunciatio*, or the French *prononciation*, are very apt to fall into another, by ſinking the firſt aſpiration, and prononncing the third ſyllable like the noun *ſea*. But theſe ſpeakers ought to take notice, that, throughout the whole language, *c*, *ſ*, and *t*, preceded by the accent, either primary or ſecondary, and followed by *ia*, *ia*, *io*, or any ſimilar diphthong, always become aſpirated, and are pronounced as if written *ſhe*. Thus the very ſame reaſons that oblige us to pronounce *partiality*, *propitiation*, *eſpecially*, &c. as if written *parſhēality*, *propiſhēation*, *eſpeſhēally*, &c. oblige us to pronounce *pronunciation* as if written *pronunſheaſhŭn*. See Principles, No. 357, 456, 461, and the word Ecclesiastick.

But though Mr. Sheridan avoids the vulgar error of ſinking the aſpiration, in my opinion, he falls into one full as exceptionable; which is, that of pronouncing the word in four ſyllables, as if written *Pro-nun-ſha-ſhun*. I am groſsly miſtaken if correct ſpeakers do not always pronounce this and ſimilar words in the manner I have marked them: and, indeed, Mr. Sheridan himſelf ſeems dubious with reſpect to ſome of them; for though he pronounces *glaciate*, *glaciation*, *aſſociation*, &c. *gla-ſhate*, *gla-ſha-ſhun*, *as-so-ſha-ſhun*, &c. yet he ſpells *conglaciate*, *conglaciation*, and *aſſociation*,—*con-gla-ſyate*, *con-gla-ſya-ſhun*, and *con-ſo-ſya-ſhun*. See Principles, No. 542, 543.

A ſolemn declaration of opinion againſt ſomething.

☞ The firſt pronunciation of this word is adopted by Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Smith, Mr. Perry, Buchanan, Barclay, Bailey, and Fenning; and the ſecond by Mr. Nares, Dr. Aſh, Dr. Johnſon, and Entick. As this ſubſtantive was derived from the verb, it had formerly the accent of the verb: and that this accent was the moſt prevailing, appears from the majority of authorities in its favour. But the reſpectable authorities for the

second pronunciation, and the pretence of diſtinguiſhing it from the verb, may very probably eſtabliſh it, to the detriment of the ſound of the language, without any advantage to its ſignification. See BOWL.

To PROWL, prŏul, or prōle. v. a. To wander for prey, to prey, to plunder.

☞ This word, among many others compoſed of the diphthong *ow*, is ſubject to a double pronunciation; the one rhyming with *cowl*, and the other with *ſtroll*. That the former is more agreeable to analogy may be ſeen from the more numerous inſtances of this ſound of the *ow* than of the other; that the latter pronunciation, however, was very prevalent, may be gathered from the mode of ſpelling this word in Philips's Paſtorals. edit. 1748. Tonſon and Draper.

" I, only with the *proling* wolf, conſtrain'd
" All night to wake: with hunger he is
" pain'd,
" And I with love. His hunger he may tame;
" But who can quench, O cruel Love, thy
" flame?"

The authorities for the firſt pronunciation are Mr. Sheridan, Mr. Smith, Mr. Scott, Buchanan, and W. Johnſton; and for the ſecond, Dr. Kenrick, Mr. Nares, and Mr. Perry: and analogy muſt decide as in the two foregoing words. See Principles, No. 325.

W. Johnſton has adopted this ſound, and Mr. Perry gives it both ways, but ſeems to prefer the regular ſound. Mr. Nares is decidedly in favour of this ſound; and as the other ſenſe of this word is always ſo pronounced, it ſeems a needleſs departure from rule, and embarraſſing the language, to have the ſame word differently pronounced. This is an inconvenience to which perhaps all languages are ſubject; but it ought in all languages to be avoided as much as poſſible. See BOWL.
Mr. Sheridan, Mr. Scott, Dr. Kenrick, and Mr. Smith, adopt the firſt ſound.

The firſt is the analogical pronunciation; for as it is derived from the Greek πυρίτης and the Latin *Pyrites*, both with the accent on the penultimate, and preſerving the form of its originals, it ought to have the accent on the ſame ſyllables. See Principles, No. 503.

The fourth part, the quarter; the quarter of a circle; an inſtrument with which latitudes are taken.

☞ It has been obſerved in the Principles, No. 85, 86, &c. that *w*, by articulating the *a*, gives it the deep broad ſound equivalent to the diphthong *au*, and that *u*, preceded by *q*, has exactly the ſame effect. (414). This is evident from the ſound of *a* in this and ſimilar words, which, till lately, was always pronounced broad. Some innovators have attempted to give the *a* in this word its ſlender ſound; but the publick ear ſeems in oppoſition to it, nor ought it to be admitted. The broad ſound is the genuine Engliſh pronunciation, as appears in every word where it is ſucceeded by *r*. As this conſonant, when final, or followed by another conſonant, gives every *a* that precedes it the Italian ſound heard in *father*; ſo when theſe letters are preceded by *qu*, or *w*, the *a* falls into the broad ſound heard in *water*. Thus as we hear *bar*, *dart*, *barrel*, with the ſound of the Italian *a*, ſo we hear *war*, *quart*, and *quarrel*, with the German *a*. *Equator*, *quæver*, and words ending with hard *c*, *g*, and *f*, have departed from this rule; but a ſufficient number of words are left to indicate plainly what is the analogy, and to direct us where uſage is doubtful.

RAILLERY, ral'ler-e. ſ.
Slight ſatire, ſatirical merriment.

☞ We muſt not ſuppoſe this word to be the offspring of the Engliſh word to *rail*, however nearly they may be ſometimes allied in practice. *Raillery* comes directly from the French word *raillerie*; and, in compliment to that language for the aſſiſtance it ſo often affords us, we pronounce the firſt ſyllable nearly as in the original. This, however, is not a mere compliment like the generality of thoſe we pay the French; for were we to pronounce the firſt ſyllable like *rail*, it might obſcure and pervert the meaning. Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Nares, W. Johnſton, Mr. Perry, and Mr. Smith, pronounce it as I have marked it.

☞ If antiquity can give a ſanction to the pronunciation of a word, this may be traced as far back as the days of Queen Elizabeth. Falſtaff, in the firſt part of Henry the Fourth, being urged by the Prince to give *reaſons* for his conduct, tells him, that if *raiſins* were as plenty as *blackberries*, he would not give him one upon compulſion. This pun evidently ſhews theſe words were pronounced exactly alike in Shakeſpeare's time, and that Mr. Sheridan's pronunciation of this word, as if written *ray-sn*, is not only contrary to the moſt ſettled uſage, but deſtructive of the wit of Shakeſpeare. Mr. Sheridan has Mr. Scott, Mr. Perry, and W. Johnſton, on his ſide; and I have Dr. Kenrick and Mr. Nares on mine.

☞ The difference in the pronunciation of theſe words is not only neceſſary to convey their different ſignification, but to ſhow their different etymology. The firſt comes to us from the French *rareté*, and the laſt from the Latin *raritas*; which therefore, according to the moſt ſeuled analogy of our language, ought to have the antepenultimate ſyllable ſhort. See Principles, No. 511; alſo the word CHASTITY.

To RASE, rāze, or rāce, v. a. See *Raze*,
To ſkim, to ſtrike on the ſurface; to overthrow, to deſtroy, to root up; to blot out by raſure, to eraſe.

☞ There ſeems to be no ſmall difficulty in ſettling the orthography and pronunciation of this word. Dr. Johnſon adviſes, when it ſignifies to ſtrike ſlightly, to write it *raſe*; and when it ſignifies to ruin, *raze*. Whatever may be the utility of this diſtinction to the eye, the ear ſeems to have made no ſuch diſtinction in the ſound of the *s*; as *graze*, which is evidently formed from this word, and ſeems to have been adopted for the purpoſe of ſignifying to ſtrike ſlightly, has preſerved the *z*; while *eraſe*, which means to deſtroy, to expunge, to take away entirely, is by all our orthöepiſts, except Dr. Kenrick, pronounced with the *s* pure. But *raſe*, whether ſignifying to ſtrike ſlightly, or to overthrow, has been ſo generally pronounced with the *s* like *z*, that moſt of our writers have adopted the latter character; and this ſound, it may be obſerved, ſeems more agreeable to the analogy of verbs in this termination than that in *eraſe*, (437) (467). But as nothing ſeems to be more fixed in the language than the ſharp hiſſing ſound of *s* in *eraſe*, ſo if analogy and uſage were to compound the difference, perhaps it would be eaſier to bring *raſe* to the ſound of *race* as Mr. Elphinſton has done, than *eraſe* to the ſound of *eraze*, as Dr. Kenrick has done; but to ſound it with the hiſſing *s* when it is written *raze* as Mr. Sheridan has done, is a ſoleciſm in pronunciation: for though *s* often goes into the ſound of *z*, *z* never goes into that of *s*.

The confuſion obſervable among our authors in this word ſufficiently ſhows how inconvenient it is to make the ſame letters ſound differently when a different ſenſe is conveyed. Dr. Johnſon ſeems aware of this when he recommends a different orthography for this word, as it acquires a different meaning; but he does not tell us whether *raſe* is to be pronounced like *race* or *raze*; nor do any of our orthöepiſts make this diſtinction of ſound according to the ſenſe. With great deference to Dr. Johnſon, perhaps ſuch a diſtinction, both in ſound and ſpelling, is unneceſſary and embarraſſing. The beſt way therefore, in my opinion, will be always to ſpell this word with the *z* as in *razor*, and to pronounce it with the *z* when it is written *raſe*. See BOWL.

More willingly, with better liking; preferably to the other, with better reaſon; in a greater degree than otherwiſe; more properly; eſpecially; to have Rather, to deſire in preference, a bad expreſſion; it ſhould be, Will Rather.

☞ Dr. Johnſon tells us, that this word is the comparative of *rath*, a Saxon word, ſignifying *ſoon*, and that it ſtill retains its original ſignification; as we may ſay, "I would *ſooner* "do a thing," with as much propriety as "I would *rather* do it." Some very reſpectable ſpeakers pronounce this word with the firſt ſyllable like that in *Rā-ven*; and Mr. Nares has adopted this pronunciation. Dr. Aſh and Bailey ſeem to be of the ſame opinion; but all the other orthöepiſts, from whom we can certainly know the quantity of the vowel, as Mr. Sheridan, Mr. Elphinſton, Mr. Scott, Dr. Kenrick, W. Johnſton, Mr. Perry, Buchanan, and Entick, make it ſhort. There is a pronunciation of this, and ſome few other words, which may not improperly be called diminutive. Thus in familiar converſation, when we wiſh to expreſs very little,

we ſometimes lengthen the vowel, and pronounce the word as if written *leetle*. In the ſame manner, when *rather* ſignifies juſt preferably, we lengthen the firſt vowel, and pronounce it long and ſlender, as if written *raythe*r; and this, perhaps, may be the reaſon why the long ſlender ſound of the vowel has ſo much obtained, for uſage ſeems to be clearly on the ſide of the other pronunciation, and analogy requires it, as this word is but the old comparative of the word *rath*, ſoon.

☞ This word is frequently, but corruptly, pronounced as if written *rare*. But though *rare*, rhyming with *fear*, is the true pronunciation, we muſt not ſuppoſe it to have the leaſt affinity in ſignification with *rear* (behind). Junius and Skinner derive this word from the Saxon word *hrere*, ſignifying *fluent* or *trembling* like the white or yolk of an egg when unconcocted; hence Junius explains the phraſe a *Reer-egg*, a trembling egg; and Skinner imagines that this word may come from the Greek word Ῥέω, to flow, becauſe unconcocted eggs eaſily flow or move about; or he ſuppoſes that our word *rear*, and the Saxon *hrere*, may poſſibly come from the Latin *rarus*, as oppoſed to *denſe*, becauſe eggs, when boiled, loſe their fluidity, and grow thick. This derivation of Skinner ſeems a little too far fetched. Whatever may be its origin in the Saxon, it ſeems to have been uſed in that language for *crude* and *unconcocted*; from the Saxon it comes to us in that ſenſe, and, in my opinion, ought to be written as well as pronounced *Rere*.

☞ The firſt of theſe pronunciations is by far the moſt faſhionable, but the ſecond moſt agreeable to analogy and the ear. So many mutes in the latter ſyllables require the aid of the antepenultimate accent to pronounce them with eaſe, and they ought always to have it. See ACCEPTABLE and CORRUPTIBLE.

The beſt way to ſhow what is the general uſage in the accentuation of this word, will be to give it as accented by different orthöepiſts:

Rec'eptacle, Mr. Sheridan, W. Johnſton.

☞ Dr. Johnſon and Mr. Sheridan place the accent on the firſt ſyllable of this word, and on the ſecond of *Deceptory*; but as theſe words are both of the ſame form, till ſome reaſon can be given for accenting them differently, I ſhall conſider them both as accented on the firſt ſyllable, as that accentuation appears to be not only moſt agreeable to polite uſage, but to the general analogy of words of this termination. See PEREMPTORY.

A view of the diverſity of accentuation among our orthöepiſts will enable the inſpector to judge of the propriety of that which I have adopted:

Rec'eptary, Mr. Sheridan, Dr. Johnſon, folio and quarto, and Barclay.

☞ Though Dr. Johnſon and Mr. Sheridan have written *Reconcileable*, *Unreconcileable*, and *Reconcileableneſs*, with the mute *e* in the middle of theſe words, they have omitted it in *Irreconcilable*, *Irreconcilably*, and *Irreconcilableneſs*. This has ſometimes occaſioned an impropriety in the pronunciation of theſe words, by ſounding the preceding *i* ſhort, as in *ſilver*, and giving the words a ſyllable more than they ought to have, as if divided into *Rec-on-ſil-e-a-ble*, &c.; but as the orthography is wrong, ſo is the pronunciation. The mute *e* ought to have no place, when followed by a vowel, in words of our own compoſition, where the preceding vowel has its general ſound; and therefore, as it is *Inclinable*, *Deſirable*, &c. ſo it ought to be *Reconcilable*, *Reconcilably*, &c. See MOVEABLE.

Secret, profound, abſtruſe.

☞ Dr. Johnſon, Dr. Aſh, Dr. Kenrick, Mr. Barclay, Mr. Nares, Mr. Scott, Mr. Fry, and Entick, accent this word on the ſecond ſyllable; Mr. Sheridan and Bailey on the laſt; and Fenning only on the firſt. But notwithſtanding ſo many authorities are againſt me, I am much deceived if the analogy of pronunciation be not decidedly in favour of that accentuation which I have given. We have but few inſtances in the language where we receive a word from the Latin, by dropping a ſyllable, that we do not remove the accent higher than in the original, (503). Thus *recondite* derived from *reconditus* may with as much propriety remove the accent from the long penultimate, as *carbuncle* from *carbunculus*; *calumny* from *calumnia*, *detriment* from *detrimentum*, *innocency* from *innocentia*, *controverſy* from *controverſia*, and a thouſand others. Beſides, it may be obſerved, that Mr. Sheridan and Bailey, by accenting this word on the laſt ſyllable, do not decide againſt the accent on the firſt; for all words of three ſyllables which may be accented on the laſt, may alſo have an accent on the firſt, though not inverſely, (524). The antepenultimate accent to which our language has ſuch a tendency ought, in my opinion, to be indulged in this word, notwithſtanding the numerous authorities againſt it. The word *Incondite* muſt certainly follow the fortunes of the preſent word; and we find thoſe orthöepiſts who have the word accent it as they do *recondite*, Mr. Sheridan on the laſt ſyllable, but Mr. Fenning inconſiſtently on the ſecond.

RECORD, rĕk'ŏrd, or rē-kŏrd'. ſ.
Regiſter, authentick memorial.

☞ The noun *record* was anciently, as well as at preſent, pronounced with the accent either on the firſt or ſecond ſyllable; till lately, however, it generally conformed to the analogy of other words of this kind; and we ſeldom heard the accent on the ſecond ſyllable, till a great luminary of the law, as remarkable for the juſtneſs of his elocution as his legal abilities, revived the claim this word anciently had to the ultimate accent; and ſince his time this pronunciation, eſpecially in our courts of juſtice, ſeems to have been the moſt general. We ought, however, to recollect, that this is overturning one of the moſt ſettled analogies of our language in the pronunciation of diſſyllable nouns and verbs of the ſame form. See Principles, No. 492.

☞ I muſt in this word retract my former opinion, and give the preference to the accent on the ſecond ſyllable. Mr. Sheridan and W. ☞ Almoſt all the Dictionaries I have conſulted, except Mr. Sheridan's, place the accent on the ſecond ſyllable of this word; and yet ſo prevalent has the latter accentuation been of late years, that Mr. Nares is reduced to hope it is not fixed beyond recovery. There is, indeed, one reaſon why this word ought not to have the accent on the firſt ſyllable, and that is, the two mutes in the ſecond and third, which are not ſo eaſily pronounced when the accent is removed from them, as the mutes and liquids in *acceſſory*, *conſiſtory*, *defultory*, &c.; and therefore I am decidedly in favour of the accentuation adopted by Dr. Johnſon, Dr. Aſh, Dr. Kenrick, W. Johnſton, Mr. Nares, Buchanan, Perry, Scott, Bailey, Barclay, and Entick, as all words of this termination have the accent on the ſame ſyllable. ☞ In the firſt edition of this Dictionary I apprehended that this word was a new coinage of the Houſe of Commons; but upon conſulting Mr. Elphinſton, a compleat judge in this caſe, I find it has long been a juriſprudential word, as he calls it, in Scotland, meaning *inferential* or *concluſive*; and that it has only been transferred from the Scotch Bar to the Britiſh Parliament. But that this is not the ſenſe of the French *relevant* or the Latin *relevo*, is certain; and that *relevant* in this ſenſe ſeems nearly the ſame as *relative* or *related*. To ſay nothing of the impropriety of introducing technical words in a general aſſembly of the nation, it may be obſerved, that uſing the word in this ſenſe, which is that it generally has in our parliamentary debates, tends to overturn the moſt ſettled meaning of words, and, inſtead of preciſion and accuracy, to create obſcurity and confuſion.

☞ This word, like ſeveral others of the ſame form, is frequently diſtorted by an accent on the firſt ſyllable. When there are no uncombinable conſonants in the latter ſyllable, this accentuation is not improper, as *deſpicable*, *diſputable*, *preferable*, &c.; but when conſonants of ſo different an organ as *ct* and *pt* occur in the penultimate and antepenultimate ſyllables of words without the accent, the difficulty of pronouncing them is a ſufficient reaſon for placing the accent on them in order to aſſiſt the pronunciation; and accordingly we find almoſt every word of this form has the accent upon theſe letters, as *delectable*, *deſtructible*, *perceptible*, *ſuſceptible*, *diſcerptible*, &c.; beſides; as it contributes greatly to the clearneſs and force of the language to place the accent on the moſt ſignificant part of the word, when other reaſons do not forbid, this ought to determine us to lay the ſtreſs upon the ſecond ſyllable of the word in queſtion. This is the accentuation of Mr. Scott, Mr. Buchanan, W. Johnſton, Bailey, and Entick; and if Dr. Johnſon, Mr. Sheridan, Dr. Aſh, Dr. Kenrick, Barclay, Fenning, and Perry, had inſerted the word in their Dictionaries, they would, in all probability, have accented the word in the ſame manner. Since the firſt edition of this Dictionary I ſee this is the caſe with the quarto edition of Dr. Johnſon. See ACCEPTABLE, CORRUPTIBLE, and IRREFRAGABLE.

☞ This word was formerly always accented on the ſecond ſyllable; but the antepenultimate accent, to which our language is ſo prone in ſimples of three ſyllables, has ſo generally obtained as to make it doubtful to which ſide the beſt uſage inclines. Dr. Johnſon, Sheridan, Aſh, Kenrick, Nares, Bailey, and Fenning, accent the ſecond ſyllable; and Buchanan, W. Johnſton, Perry, Barclay, and Entick, on the firſt. Scott on both, but prefers the firſt. In this caſe then, analogy ought to decide for placing the accent on the firſt ſyllable. See Principles, No. 535, and the word REVENUE.

☞ This word ſeems as nearly balanced between the accent on the firſt and ſecond ſyllable as poſſible; but as it is of the ſame form and origin as *avenue* and *retinue*, it ought to follow the ſame fortune. *Retinue* ſeems to have been long inclining to accent the firſt ſyllable, and *avenue* has decidedly done ſo, ſince Dr. Watts obſerved that it was ſometimes accented on the ſecond; and by this retroceſſion of accent, as it may be called, we may eaſily foreſee that theſe three words will uniformly yield to the antepenultimate accent, the favourite accent of our language, conformably to the general rule, which accents ſimples of three ſyllables upon the firſt. Dr. Johnſon, Mr. Nares, and Bailey, are for the accent on the ſecond ſyllable; but Dr. Aſh, Dr. Kenrick, Buchanan, W. Johnſton, Perry, Barclay, Fenning, and Entick, accent the firſt. Mr. Sheridan gives both, but the antepenultimate accent firſt, (503). See CONVERSANT and RETINUE.

☞ This word ſeems to have been ſome years floating between the accent on the firſt and laſt ſyllable, but to have ſettled at laſt on the former. It may ſtill, however, be reckoned among thoſe words, which, if occaſion require, admit of either. See Principles, No. 528. It may, perhaps, be neceſſary to obſerve that ſome Lexicographers have written this word *Reverie* inſtead of *Revery*, and that while it is thus written we may place the accent either on the firſt or laſt ſyllable; but if we place the accent on the laſt of *Revery*, and pronounce the *y* like *e*, there ariſes an irregularity which forbids it; for *y*, with the accent on it, is never ſo pronounced. Dr. Johnſon's orthography, therefore, with *y* in the laſt ſyllable, and Mr. Sheridan's accent on the firſt, ſeem to be the moſt correct mode of writing and pronouncing this word.

A view of the different orthography and accentuation of this word may contribute to confirm that which I have choſen:

Re'very, Sheridan, W. Johnſton, Barclay.
Revery', Johnſon's quarto, Entick.
Reverie', Buchanan.
Reve'ry, Kenrick, Johnſon's folio.
Reve'ries, Bailey.
Reverie', Barclay, Fenning, Entick.

☞ The *o* in this word is irrevocably fixed in the Engliſh ſound of that letter in *move*, *prove*, &c. Pope, indeed, rhymes it with *dome*,

"Thus when we view ſome well-proportion'd *dome*,
"The world's juſt wonder, and ev'n thine, O *Rome!*——

But, as Mr. Nares obſerves, it is moſt probable that he pronounced this word as if written *doom*, as he rhymes *Rome* with *doom* afterwards in the ſame poem.

"From the ſame foes at laſt both felt their *doom*;
"And the ſame age ſaw learning fall and *Rome*."
Eſſay on Criticiſm, v. 685.

The truth is, nothing certain can be concluded from the rhyming of Poets. It may ſerve to confirm an eſtabliſhed uſage, but can never direct us where uſage is various and uncertain. But the pun which Shakeſpeare puts into the mouth of Caſſius in Julius Cæſar decidedly ſhows what was the pronunciation of this word in his time:

"Now it is *Rome*, indeed, and *room* enough,
"When there is in it but one only man."

And the Grammar in Queen Anne's time, recommended by Steele, ſays, the city *Rome* is pronounced like *Room*.

A method of cure much practiſed in venereal caſes.

SALIVOUS, să-lī'vŭs, or săl'ĭ-vŭs. a.
Conſiſting of ſpittle, having the nature of ſpittle.

☞ As this word has ſomewhat more of a Latin aſpect than *ſalival*, and is probably derived from *ſaliveſus*, the learnedly polite, or the politely learned, ſnatch at the ſhadow of Latin quantity to diſtinguiſh themſelves from mere Engliſh ſpeakers. Hence in all the words of this termination they preſerve the penultimate *i* long, and place the accent on it; and thus we are obliged to do the ſame in this word under pain of appearing illiterate. This penalty, however, Dr. Aſh and Mr. Perry have incurred, by placing the accent on the firſt ſyllable; but Dr. Johnſon, Mr. Sheridan, Mr. Scott, Barclay, Fenning, and Entick, follow the learned majority.

☞ As this word comes immediately from the Latin, and the *t* is carried off to commence

the ſecond ſyllable, the *a* has not the broad ſound as in *ſalt*, but goes into the general ſound of that letter in the ſame manner as the *u* in *fulminate*, is not pronounced like the peculiar ſound of that letter in *full*, but like the *u* in dull. (177).

SALVE, sâlv. ſ. (78).

☞ Dr. Johnſton tells us, that this word is originally and properly *ſalf*; which having *ſalves* in the plural, the ſingular, in time, was borrowed from it: *ſealf*, Saxon, undoubtedly from *ſalvus*, Latin. There is ſome diverſity among our orthöepiſts about the *l* in this word and its verb. Mr. Sheridan marks it to be pronounced; Mr. Smith, W. Johnſton, and Barclay, make it mute; Mr. Scott and Mr. Perry give it both ways; and Mr. Nares ſays it is mute in the noun, but ſounded in the verb. The mute *l* is certainly countenanced in this word by *calve* and *halve*; but as they are very irregular, and as no other vowel is ſilent in this ſituation, and as this word is of Latin original, the *l* ought certainly to be preſerved in both words: for to have the ſame word ſounded differently, to ſignify different things, is a defect in language that ought as much as poſſible to be avoided. See BOWL and FAULT.

☞ Mr. Nares, Buchanan, and W. Johnſton, pronounce the *a* in the firſt ſyllable of this word long; but Mr. Sheridan, Mr. Scott, and Entick, more properly, ſhort. Buchanan only makes the ſame *a* in *ſanative* long; but Mr. Sheridan, Scott, W. Johnſton, Perry, and Entick, ſhort. Mr. Sheridan and Buchanan are the only orthöepiſts from whom we can gather the ſound of this vowel in *inſanable*, which the latter marks long, and the former ſhort as it ought to be, from the ſhortening power of the antepenultimate accent. ☞ This word is frequently pronounced as if written *Sattan*; but making the firſt ſyllable long is ſo agreeable to analogy that it ought to be indulged wherever cuſtom will permit; and particularly in proper names. *Cato*, *Plato*, &c. have now univerſally the penultimate *a* long and ſlender; and no good reaſon can be given why the word in queſtion ſhould not join this claſs: if the ſhort quantity of the *a* in the original be alleged, for an anſwer to this, ſee Principles, No. 544, and the word SATIRE. Mr. Nares and Buchanan only adopt the ſecond ſound; and Mr. Elphinſton, Mr. Sheridan, Dr. Kenrick, Mr. Scott, W. Johnſton, Mr. Perry, Entick, and, if we may judge by the poſition of the accent, Dr. Aſh and Bailey the firſt.

☞ Pope has, by the licence of his art, accented the plural of this word upon the ſecond ſyllable, and, like the Latin plural, has given it four ſyllables:

" Or aſk of yonder argent fields above,
" Why Jove's *Satellites*, are leſs than Jove."
Eſſay on Man.

This, however, is only pardonable in poetry, and, it may be added, in good poetry. See ANTIPODES and MILLEPEDES.

SATIETY, să-tī'ĕ-tē. s. (460).
Fulneſs beyond deſire or pleaſure, more than enough, ſtate of being palled.

☞ The ſound of the ſecond ſyllable of this word has been groſsly miſtaken by the generality of ſpeakers; nor is it much to be wondered at. *Ti*, with the accent on it, ſucceeded by a vowel, is a very uncommon predicament for an Engliſh ſyllable to be under; and therefore it is not ſurpriſing that it has been almoſt univerſally confounded with an apparently ſimilar, but really different, aſſemblage of accent, vowels and conſonants. So accuſtomed is the ear to the aſpirated ſound of *t*, when followed by two vowels, that whenever theſe appear we are apt to annex the very ſame ſound to that letter, without attending to an eſſential circumſtance in this word, which diſtinguiſhes it from every other in the language. There is no Engliſh word of exactly the ſame form with *ſatiety*, and therefore it cannot, like moſt other words, be tried by its peers; but analogy, that grand reſource of reaſon, will as clearly determine, in this caſe, as if the moſt poſitive evidence were produced.

In the firſt place then, the ſound commonly given to the ſecond ſyllable of this word, which is that of the firſt of *ſi-lence*, as if written *ſa-ſi-e-ty*, is never found annexed to the ſame letters throughout the whole language. *Ti*, when ſucceeded by two vowels, in every inſtance but the word in queſtion, ſounds exactly like *ſh*; thus *ſatiate*, *expatiate*, &c. are pronounced as if written *ſa-ſhe-ate*, *ex-pa-ſhe-ate*, &c. and not *ſa-ſe-ate*, *ex-pa-ſe-ate*, &c.; and therefore if the *t* muſt be aſpirated in this word, it ought at leaſt to aſſume that aſpiration which is found among ſimilar aſſemblages of letters, and inſtead of *ſa-ſi-e-ty*, it ought to be ſounded *ſa-ſhi-e-ty*: in this mode of pronunciation a greater parity might be pleaded; nor ſhould we introduce a new aſpiration to reproach our language with needleſs irregularity. But if we once caſt an eye on thoſe conditions, on which we give an aſpirated ſound to the dentals (26), we ſhall find both theſe methods of pronouncing this word equally remote from analogy. In almoſt every termination where the conſonants, *t*, *d*, *c*, and *s*, precede the vowels *ea*, *ia*, *ie*, *io*, &c. as in *martial*, *ſoldier*, *ſuſpicion*, *confuſion*, *anxious*, *preſcience*, &c. the accent is on the ſyllable immediately before theſe conſonants, and they all aſſume the aſpiration; but in *elephantiaſis*, *hendiadis*, *ſociety*, *anxiety*, *ſcience*, &c. the accent is immediately after theſe conſonants, and the *t*, *d*, *c*, and *x*, are pronounced as free from aſpiration as the ſame letters in *tiar*, *diet*, *cion*, *Ixion*, &c. the poſition of the accent makes the whole difference. But if analogy in our own language were ſilent, the uniform pronunciation of words from the learned languages, where theſe letters occur, would be ſufficient to decide the diſpute. Thus in *elephantiaſis*, *Miltiades*, *ſatietas*, &c. the antepenultimate ſyllable *ti* is always pronounced like the Engliſh noun *tie*; nor ſhould we dream of giving *ti* the aſpirated ſound in theſe words, though there would be exactly the ſame reaſon for it as in *ſatiety*: for, except in very few inſtances, as we pronounce Latin in the analogy of our own language, no reaſon can be given why we ſhould pronounce the antepenultimate ſyllable in *ſatietas* one way, and that in *ſatiety* another.

I ſhould have thought my time thrown away in ſo minute an inveſtigation of the pronunciation of this word if I had not found the beſt judges diſagree about it. That Mr. Sheridan ſuppoſed it ought to be pronounced *ſa-ſi-e-ty*, is evident from his giving this word as an inſtance of the various ſounds of *t*, and telling us that here it ſounds *s*. Mr. Garrick, whom I conſulted on this word, told me, if there were any rules for pronunciation, I was certainly right in mine; but that he and his literary acquaintance pronounced it in the other manner. Dr. Johnſon likewiſe thought I was right, but that the greater number of ſpeakers were againſt me; and Dr. Lowth told me, he was clearly of my opinion, but that he could get nobody to follow him. I was much flattered to find my ſentiments confirmed by ſo great a judge, and much more flattered when I found my reaſons were entirely new to him.

But, notwithſtanding the tide of opinion was ſome years ago ſo much againſt me, I have ſince had the pleaſure of finding ſome of the moſt judicious philologiſts on my ſide. Mr. Elphinſton, Dr. Kenrick, and Mr. Perry, mark the word as I have done; and Mr. Nares is of

opinion it ought to be ſo pronounced, though for a reaſon very different from thoſe I have produced, namely, in order to keep it as diſtinct as may be from the word *ſociety*. While Mr. Fry frankly owns, it is very difficult to determine the proper pronunciation of this word.

Thus I have ventured to decide where "Doctors "diſagree," and have been induced to ſpend ſo much time on the correction of this word, as the improper pronunciation of it does not, as in moſt other caſes, proceed from an evident caprice of cuſtom, as in *buſy* and *bury*, or from a deſire of drawing nearer to the original language, but from an abſolute miſtake of the principles on which we pronounce our own.

SATIN, săt'tĭn. ſ.
A ſoft, cloſe, and ſhining, ſilk.

SATIRE, să'tūr, sāt'ūr, sā'tīre, or sāt'īre. ſ.
A poem in which wickedneſs or folly are cenſured.

☞ The firſt mode of pronouncing this word is adopted by Mr. Sheridan, Mr. Scout, and Mr. Smith. The ſhort quantity of the firſt vowel is adopted by Mr. Nares, Mr. Elphinſton, Buchanan, and Entick; but the quantity of the ſecond ſyllable they have not marked. The third is adopted by Mr. Perry and Dr. Kenrick; and for the fourth we have no authorities.

But though the firſt mode of pronouncing this word is the moſt general, and the moſt agreeable to an Engliſh ear, the ſecond ſeems to be that which is moſt favoured by the learned; becauſe, ſay they, the firſt ſyllable in the Latin *Satyra* is ſhort. But if this reaſoning were to hold good, we ought to pronounce the firſt ſyllable of *ſilence*, *local*, *label*, *libel*, *locuſt*, *paper*, and many others ſhort, becauſe *ſilentium*, *localis*, *labellum*, *libellus*, *locuſta*, *papirus*, &c. have all the firſt ſyllable ſhort in Latin. But to furniſh the learned with an argument which, perhaps, may not immediately occur to them: It may be ſaid, that in the inſtances I have adduced none of the Latin words have the initial ſyllable *accented* as well as ſhort, which is the caſe with the word *ſatyra*: but it may be anſwered, if we were to follow the quantity of the Latin accented vowel, we muſt pronounce *foetid*, *mimic*, *frigid*, *ſqualid*, *comic*, *reſin*, *credit*, *ſpirit*, and *lily*, with the firſt vowel long, becauſe it is the caſe in the Latin words *foetidus*, *mimicus*, *frigidus*, *ſqualidus*, *comicus*, *reſina*, *creditus*, *ſpiritus*, and *lilium*. The only ſhadow of an argument therefore that remains is, that though we do not adopt the Latin quantity of the accented antepenultimate vowel when it is long, we do when it is ſhort. For though we have ſeveral inſtances where an Engliſh word of two ſyllables has the firſt ſhort, though derived from a Latin word where the two firſt ſyllables are long; as *civil*, *legate*, *ſolemn*, &c. from *civilis*, *legatus*, *ſolemnis*, &c.; yet we have no inſtance in the language where a word of three ſyllables in Latin with the two firſt vowels ſhort, becomes an Engliſh diſſyllable with the firſt ſyllable long. Hence the ſhortneſs of the firſt ſyllables of *platane*, *zephyr*, *atom*, &c. from *platanus*, *zephyrus*, *atomus*, &c. which are ſhort, not only from the cuſtom of carrying the ſhort ſound we give to the Latin antepenultimate vowel into the penultimate of the Engliſh word derived from it, but from the affectation of ſhortening the initial vowel which this cuſtom has introduced, in order to give our pronunciation a Latin air, and furniſh us with an opportunity of ſhowing our learning by appealing to Latin quantity; which, when applied to Engliſh, is ſo vague and uncertain, as to put us out of all fear of detection if we happen to be wrong. The abſurd cuſtom, therefore, of ſhortening our vowels ought to be diſcountenanced as much as poſſible, ſince it is ſupported by ſuch weak and deſultory arguments; and our own analogy in this, as well as in ſimilar words, ought to be preferred to ſuch a ſhadow of analogy to the quantity of the Latin language. See Principles, No. 544.

With reſpect to the quantity of the laſt ſyllable, though cuſtom ſeems to have decided it in this word, it is not ſo certain in other words of a ſimilar form. Theſe we purpoſe to conſider under the word UMPIRE, which ſee.

☞ This was ſuppoſed to be the remoteſt planet when Dr. Johnſon wrote his Dictionary; but Mr. Herſhal has ſince diſcovered a planet ſtill more remote, which will undoubtedly be called hereafter by his own name. The firſt pronunciation of this word is not the moſt general, but by far the moſt analogical; and for the ſame reaſon as in *Satan*: but there is an additional reaſon in this word, which will weigh greatly with the learned, and that is, the *a* is long in the original. Mr. Elphinſton, Dr. Kenrick, Perry, and Entick, adopt the ſecond pronunciation of this word; and Mr. Sheridan, Scott, Buchanan, W. Johnſton, and, if we may gueſs by the poſition of the accent, Dr. Aſh and Bailey the firſt.

☞ The firſt mode of pronouncing this word is the moſt agreeable to analogy, if not in the moſt general uſe; but where uſe has formed ſo clear a rule as in words of this form, it is wrong not to follow it. See Principles, No. 214.

Mr. Elphinſton, Dr. Kenrick, Mr. Nares, and Mr. Scott, are for the firſt pronunciation; and Mr. Sheridan and W. Johnſton for the laſt. Mr. Perry gives both; but by placing them as I have done, ſeems to give the preference to the firſt.

In this opinion I am confirmed by Mr. Nares, who ſays it is commonly pronounced in the ſecond manner. See Principles, No. 218.

☞ From the general tendency of the antepenultimate accent to ſhorten the vowel, and the particular propenſity to contract every vowel but *u* before the termination in *ical*, we find thoſe in *ic*, which may be looked upon as abbreviations of the other, preſerve the ſame ſhortening power with reſpect to the vowels which precede: and though the word in queſtion might plead the long ſound of the *e* in the Latin *ſcenicus*, yet, if this plea were admitted, we ought for the ſame reaſons to alter the ſound of *o* in *comic*; nor ſhould we know where to ſtop. As a plain analogy, therefore, is formed by *epic*, *topic*, *tropic*, *tonic*, &c. it would be abſurd to break in upon it, under pretence of conforming to Latin quantity; as this would diſturb our moſt ſettled uſages, and quite unhinge the language. See Principles, No. 544.

☞ In the pronounciation of this word we ſeem to depart both from the Latin *ſchedula* and the French *ſchedule*. If we follow the firſt, we ought to pronounce the word *ſkedule* (353); if the laſt, *ſhedule*; but entirely ſinking the *ch* in *ſedule* ſeems to be the prevailing mode, and too firmly fixed by cuſtom to be altered in favour of either of its original words. Dr. Kenrick, Mr. Perry, and Buchanan, pronounce it *ſkedule*; but Mr. Elphinſton, Mr. Sheridan, Mr. Scott, Mr. Nares, Barclay, Fenning, and Shaw, *ſedule*: though if we may believe Dr. Jones, it was pronounced *ſkedule* in Queen Anne's time.

SCHISM, sizm. ſ.
A ſeparation or diviſion in the church.

☞ The common pronunciation of this word is contrary to every rule for pronouncing words from the learned languages, and ought to be altered. *Ch* in Engliſh words, coming from Greek words with χ, ought always to be pronounced like *k*; and I believe the word in queſtion is almoſt the only exception throughout the language. However ſtrange, therefore, *ſkizm* may ſound, it is the only true and analogical pronunciation; and we might as well pronounce *ſcheme*, *ſeme*, as *ſchiſm*, *ſizm*, there being exactly the ſame reaſon for both. But when once a falſe pronunciation is fixed as this is, it requires ſome daring ſpirit to begin the reformation: but when once begun, as it has, what ſeldom happens, truth, novelty, and the appearance of Greek erudition on its ſide, there is no doubt of its ſucceſs. Whatever,

therefore, may be the fate of its pronunciation, it ought ſtill to retain its ſpelling. This muſt be held ſacred, or the whole language will be metamorphoſed: for the very ſame reaſon that induced Dr. Johnſon to ſpell *Sceptick*, *Skeptick*, ought to have made him ſpell *ſchiſm*, *ſizm*, and *ſchedule*, *ſedule*. All our orthöepiſts pronounce the word as I have marked it.

☞ Mr. Nares queſtions whether the *c* ſhould not be pronounced hard in this word, (or as it ought rather to be *ſciamachy*); and if ſo, he ſays, ought we not to write *ſkiamachy* for the ſame reaſon as *ſkeptick*? I anſwer, exactly. See SCIRRHUS and SKEPTICK.

SCIRRHUS, skĭr'rŭs. ſ. (109). An indurated gland.

☞ This word is ſometimes, but improperly, written *ſchirrus*, with the *h* in the firſt ſyllable inſtead of the laſt; and Bailey and Fenning have given us two aſpirations, and ſpelt it *ſchirrhus*; both of which modes of ſpelling the word are contrary to the general analogy of orthography; for as the word comes from the Greek σκίῤῥος, the latter *r* only can have the aſpiration, as the firſt of theſe double letters has always the *ſpiritus lene*: and the *c* in the firſt ſyllable, ariſing from the Greek κ, and not the χ, no more reaſon can be given for placing the *h* after it, by ſpelling it *ſchirrus*, than there is for ſpelling *ſcene* from σκηνὴ, *ſchene*; or *ſceptre* from σκηπτρον, *ſcheptre*. The moſt correct Latin orthography confirms this opinion, by ſpelling the word in queſtion *ſcirrhus*; and, according to the moſt ſettled analogy of our own language, and the conſtant method of pronouncing words from the Greek and Latin, the *c* ought to be ſoft before the *i* in this word, and the firſt ſyllable ſhould be pronounced like the firſt of *ſyr-inge*, *Sir-i-us*, &c.

Whatever might have been the occaſion of the falſe orthography of this word, its falſe pronunciation ſeems fixed beyond recovery: and Dr. Johnſon tells us it ought to be written *ſkirrhus*, not merely becauſe it comes from σκίῤῥος, but becauſe *c* in Engliſh has before *e* and *i* the ſound of *s*. Dr. Johnſon is the laſt man that I ſhould have ſuſpected of giving this advice. What! becauſe a falſe orthography has obtained, and a falſe pronunciation in conſequence of it, muſt both theſe errors be confirmed by a ſtill groſſer departure from analogy? A little reflection on the conſequences of ſo pernicious a practice would, I doubt not, have made Dr. Johnſon retract his advice. While a true orthography remains, there is ſome hope that a falſe pronunciation may be reclaimed; but when once the orthography is altered, pronunciation is incorrigible; and we muſt bow to the tyrant, however falſe may be his title. See Principles, No. 350, and the word SKEPTICK.

Mr. Sheridan pronounces this word *ſkirrous*; Mr. Scott, Mr. Perry, and W. Johnſton, have omitted it; neither Dr. Kenrick nor Buchanan take any notice of the ſound of *c*, and according to them it might be pronounced *s*; but Barclay writes it to be pronounced *ſkirrus*.

SEPULCHRE, sĕp'pŭl-kŭr. f. (416).
A grave, a tomb.

☞ I conſider this word as having altered its original accent on the ſecond ſyllable, either by the neceſſity or caprice of the poets, or by its ſimilitude to the generality of words of this form and number of ſyllables (503), which generally have the accent on the firſt ſyllable. Dr. Johnſon tells us it is accented by Shakeſpeare and Milton on the ſecond ſyllable, but by Jonſon and Prior more properly on the firſt; and he might have added, as Shakeſpeare has ſometimes done:

" Go to thy lady's grave and call her thence;
" Or at the leaſt in hers, *ſepulchre* thine."
Shakeſpeare.

" Ah me! this ſight of death is as a bell
" That warns my old age to its *ſepulchre*."
Ibid.

" I am glad to ſee that time ſurvive,
" Where merit is not *ſepulchred* alive."
Ben. Jonſon.

" Thou ſo *ſepulchred* in ſuch pomp doſt lie,
" That kings for ſuch a tomb would wiſh to die.'
Milton.

To accent this word on the ſecond ſyllable as Shakeſpeare and Milton have done, is agreeable to a very general rule, that when we introduce into our own language a word from the Greek or Latin, and either preſerve it entire, or the ſame number of ſyllables; in this caſe we preſerve the accent on the ſame ſyllable as in the original word. This rule has ſome exceptions, but has ſtill a very great extent. Now *ſepulchrum*, from which this word is derived, has the accent on the ſecond ſyllable; and *ſepulchre* ought to have it on the ſame; while *ſepulture*, on the contrary, being formed from *ſepultura*, by dropping a ſyllable the accent removes to the firſt, (ſee ACADEMY). As a confirmation that the current pronunciation of *Sepulchre* was with the accent on the ſecond ſyllable, every old inhabitant of London can recollect always having heard the Church called by that name ſo pronounced; but the antepenultimate accent ſeems now ſo fixed, as to make an alteration hopeleſs. Dr. Johnſon, Mr. Elphinſton, Mr. Sheridan, Mr. Scott, Dr. Kenrick, Dr. Aſh, Mr. Perry, Barclay, Entick, and W. Johnſton, place the accent on the firſt ſyllable both of this word and *ſepulture*. Fenning places the accent on the ſecond ſyllable of *Sepulchre* when a noun, and on the firſt when a verb. Mr. Sheridan reverſes this order: W. Johnſton places the accent on the ſecond ſyllable of *Sepulture*; and Bailey on the ſecond of both. All our orthöepiſts place the accent on the ſecond ſyllable of *ſepulchral*, except Dr. Aſh and Barclay, who place it analogically upon the ſame ſyllable as in *Sepulchre*; and the uncouth pronunciation this accentuation produces, is a freſh proof of the impropriety of the common accent.

☞ The corrupt pronunciation of this word is become univerſal, though in Junius's time it ſhould ſeem to have been confined to London; for under the word *Shore* he ſays, "*Common* "*ſhore*, Londinenſibus ita corruptè dicitur, the "*common ſewer*." Johnſon has given us no etymology of this word; but Skinner tells us, "Non infeliciter *Cowellus* declinat à verb "*Iſſue* dictumque putat quaſi *Iſſuer* abjectâ "initiali ſyllabâ." Nothing can be more natural than this derivation; the *s* going into *ſh* before *u*, preceded by the accent, is agreeable to analogy (452); and the *u* in this caſe being pronounced like *ew*, might eaſily draw the word into the common orthography, *ſewer*; while the ſound of *ſh* was preſerved, and the *ew* as in *ſhew*, *ſtrew*, and *ſew*, might ſoon ſlide into *o*, and thus produce the preſent anomaly.

☞ The pronunciation of this word is very irregular, as it is the only pure Engliſh word in the language where the final *e* does not produce the long diphthongal ſound of *i* when the accent is on it. But this irregularity is ſo fixed as to give the regular ſound a pedantic ſtiffneſs; Mr. Sheridan, Mr. Scott, and Buchanan, however, have adopted this ſound, in which they have been followed by Mr. Smith; but Mr. Elphinſton, Dr. Lowth, Dr. Kenrick, Mr. Perry, and Barclay, are for the irregular ſound; W. Johnſton gives both, but places the irregular firſt: and the Grammar called Bickerſtaff's, recommended by Steele, adopts this ſound, and gives this rule:

"To ſound like double *(e) (i)* does incline;
"As in *Machine*, and *Shire*, and *Magazine*:
"Like *(a)* in *Sirrah*; but writ *(oi)* in *join*."

It may likewiſe be obſerved, that this word, when unaccented at the end of words, as *Nottinghamſhire*, *Wiltſhire*, &c. is always pronounced with the *i* like *ee*.

☞ This was the ancient mode of writing and pronouncing this word. Stow, indeed, writes it *ſhrive*; but it is highly probable that the *i* had exactly the ſound of *ie* in *grieve*, *thieve*, &c. and the common people of London to this day have preſerved this old pronunciation, though it is wearing away faſt among them. That this is the true etymological manner of writing and pronouncing it, we need but attend to the Saxon word from which it is derived to be convinced, NEVE, or *Reeve*, ſignifies a ſteward; and *Shrieve* is but a contraction of *Shire Reeve*, or *Shire Steward*. But however juſt this orthography and pronunciation may be in other reſpects, it wants the true ſtamp of polite uſage to make it current; it is now grown old and vulgar, and Pope's uſe of this word,

"Now Mayors and *Shrieves* all huſh'd and ſa-
"tiate lay"——

muſt only be looked upon as aſſiſting the humour of the ſcene he deſcribes.

SHRIEVALTY, shrēē'val-tē.
The office of a ſheriff.

☞ By a caprice, common in language, this compound is not nearly ſo antiquated as its ſimple; though it ſhould ſeem, that if the old root be taken away, and another planted in its ſtead, the branches ought to ſpring from the latter, and not the former. But though we ſeldom hear *Shrieve* for Sheriff, except among the lower claſſes of people in London, we not unfrequently hear, even among the better ſort, *Shrievalty* for *Sheriffalty*; and Junius, in one of his letters to the Duke of Grafton, ſays, "Your next appearance in "office is marked with his election to the "*Shrievalty*." Public Advertiſer, July, 9, 1771. This is certainly an inaccuracy; and ſuch an inaccuracy, in ſuch a writer as Junius, is not a little ſurpriſing.

☞ A very extraordinary pronunciation of this word prevails in London, and, what is more extraordinary, on the Stage, ſo different from every other word of the ſame form as to make it a perfect oddity in the language. This pronunciation approaches to the word *ſcythe*; and the only difference is, that *ſcythe* has the flat aſpiration as in *this*; and *ſigh* the ſharp one, as in *thin*. It is not eaſy to conjecture what could be the reaſon of this departure from analogy, unleſs it were to give the word a ſound, which ſeems an echo to the ſenſe; and if this intention had gone no farther than the lengthening or ſhortening of a vowel, it might have been admitted, as in *fearful*, *cheerful*, *pierce*, *fierce*, *great*, *leiſure*, and ſome others; but pronouncing *gh* like *th* in this word is too palpable a contempt of orthography to paſs current without the ſtamp of the beſt, the moſt univerſal, and permanent uſage on its ſide. The Saxon combination *gh*, according to the general rule, both in the middle and at the end of the word, is ſilent. It had anciently a guttural pronunciation, which is ſtill retained in great part of Scotland, and in ſome of the northern parts of England: but every guttural ſound has been long ſince baniſhed from the language; not, however, without ſome efforts to continue by changing theſe letters, ſometimes into the related guttural conſonant *k*, as in *lough*, *bough*, &c. and ſometimes into a conſonant entirely unrelated to them, as in *laugh*, *cough*, &c. Theſe are the only tranſmutations of theſe letters; and theſe eſtabliſhed irregularities are quite ſufficient without admitting ſuch as are only candidates for confuſion. If it be pleaded that *ſithe* better expreſſes the emiſſion of breath in the act of ſighing, it may be anſwered, that nothing can be more erroneous, as the tongue and teeth have nothing to do in this action. Mr. Sheridan has, indeed, to aſſiſt this expreſſion, ſpelt the word *ſih*, as an aſpiration muſt neceſſarily accompany the act of ſighing; but (to take no notice that, in this caſe, the *h* ought to be before the *i*) (397), though ſuch expreſſion may be very proper in oratory, when accompanied by paſſion, it would be as affected to give it this aſpiration in ordinary ſpeech, as to pronounce the word *fearful* with a tremor of the voice and a faultering of the tongue; or to utter the word *laugh* with a convulſive motion of the breaſt and lungs. To theſe reaſons may be added the laws of rhyme; which neceſſarily exclude this affected pronunciation, and oblige us to give the word its true analogical ſound:

"Love is a ſmoke, rais'd with the fume of *ſighs*;
"Being purg'd, a fire, ſparkling in lovers' eyes."
Shakeſpeare.

☞ It is with ſome reluctance I have given this word, as Dr. Johnſon has written it, a place in this Dictionary; not becauſe it is not generally pronounced in this manner, but that I think conforming our ſpelling to a prevailing pronunciation, when this pronunciation is contrary to analogy, is pregnant with the greateſt evils that can happen to a language. While the original landmark is ſtanding, the true pro-

prietor may claim his rights; but when once that is effaced, there is no hope of a reſumption. How Dr. Johnſon could remove this landmark is aſtoniſhing. It is one of thoſe unaccountable abſurdities that ſometimes enter into the characters of men, whoſe underſtandings are as much above the reſt of the world in ſome things, as they are below them in others. The truth is, this great man troubled himſelf little about pronunciation; he ſeems to have cared as little for etymologies, and even grammatical diſquiſitions ſeem not to have been his favourite ſtudy; but when words were to be preciſely defined, when the boundaries of their ſignifications were to be fixed, and their moſt delicate ſhades of meaning to be diſtinguiſhed and exemplified, this taſk, ſo difficult to the ſtrongeſt mind, ſeemed to preſent him with an operation worthy of his powers: in this labour he was, indeed, a literary Hercules, and in this he has toiled with honour to himſelf, and to the eſſential improvement of the Engliſh language.

To SOLDER, sŏl'dûr. v. a.
To unite or faſten with any kind of metallick cement; to mend, to unite any thing broken.

☞ Dr. Johnſon ſeems to favour writing this word without the *l*, as it is ſometimes pronounced: but the many examples he has brought where it is ſpelt with *l*, ſhow ſufficiently how much this orthography is eſtabliſhed. It is highly probable, that omitting the ſound of *l* in this word began with mechanicks; and as the word has been lately little uſed, except in mechanical operations, this pronunciation has crept into our Dictionaries, but ought not to be extended to the liberal and metaphorical uſe of the word. It is derived from the Latin *ſolidare*, the Italian *ſoldare*, or the French *ſouder*: and when other things are equal, Dr. Johnſon's rule of deriving words rather from the French than the Latin, is certainly a good one, but ought not to overturn a ſettled orthography, which has a more original language than the French in its favour. Though our orthöepiſts agree in leaving out the *l*, they differ in pronouncing the *o*. Sheridan ſounds the *o* as in *ſod*; W. Johnſton as in *ſober*; and Mr. Nares as the diphthong *aw*. Mr. Smith ſays, that Mr. Walker pronounces the *l* in this word, but every workman pronounces it as rhyming with *fodder*; to which it may be anſwered, that

workmen ought to take their pronunciation from ſcholars, and not ſcholars from workmen. See CLEFF.

☞ A very improper, though a very prevailing miſaccentuation of the paſſive participle of the word to *ſubject*, has obtained, which ought to be corrected. All the authorities in Johnſon place the accent of *ſubjected* on the ſame ſyllable as the verb, except one from Milton:

"He *ſubjected* to man's ſervice angel wings."

But in another paſſage Milton accents this word as it ought to be, even when an adjective:

"_____The angel
"Led them direct and down the cliff as faſt
"To the *ſubjected* plain."

But as the word *ſubject* is an adjective as well as a verb, and when an adjective has always the accent on the firſt ſyllable, the participle has not only caught the accent of the adjective, but as one error commonly generates another ſeems to have communicated the impropriety to the verb; which we ſometimes hear, contrary to all analogy and authority, accented on the firſt ſyllable likewiſe. ☞ Mr. Sheridan is the only orthöepiſt who has accented this word on the firſt ſyllable as I have done; for Dr. Johnſon, Dr. Aſh, Dr. Kenrick, Barclay, Fenning, Bailey, and Entick, accent the ſecond. Its companion, *Deſultory*, is accented on the firſt ſyllable by Mr. Sheridan, Dr. Johnſon, Mr. Nares, Mr. Smith, and Fenning: but on the ſecond by Dr. Aſh, Dr. Kenrick, Mr. Scott, W. Johnſton, Mr. Perry, Buchanan, Bailey, and Entick. As theſe two words muſt neceſſarily be accented alike, we ſee Dr. Johnſon and Fenning are inconſiſtent. But though the majority of authorities are againſt me in both theſe words, I greatly miſtake if analogy is not clearly on my ſide. See Principles, No. 512.

☞ This orthography ſeems to prevail over *ſubſtract*. The vanity of deriving words from the Latin rather than a living language is very prevalent: but the *s* in this word intervening between the two mutes certainly makes the word flow more eaſily, and the alteration is therefore to be regretted.

☞ This word is not unfrequently pronounced with the accent on the ſecond ſyllable, as if it were formed from *ſucceſs*; but this accentuation, though agreeable to its Latin original, has, as in *Confeſſor*, yielded to the prevailing power of the Engliſh antepenultimate accent. Dr. Johnſon, M. Sheridan, Mr. Elphinſton, and Entick, accent this word on the firſt ſyllable; and Dr. Aſh, Dr. Kenrick, W. Johnſton, Mr. Perry, Buchanan, and Bailey, on the ſecond; Barclay and Fenning give both, but prefer the firſt: Mr. Scott gives both, and prefers the ſecond: but from the opinion that is gone forth, that we ought to accent words as near the beginning as poſſible, there is little doubt that the antepenultimate accent will prevail.

For though we ſometimes hear it ſo written *ſud-jeſt*, the moſt correct ſpeakers generally preſerve the firſt and laſt *g* in the ſound and ſeparate ſounds.

Mr. Sheridan, Mr. Scott, and Mr. Nares, pronounce the *g* in both ſyllables ſoft as if written *ſud-jeſt*. Dr. Kenrick, Mr. Perry, and Barclay, make the firſt *g* hard, and the ſecond ſoft, as if written *ſug-geſt*, as I have done; for as the accent is not on theſe conſonants, there is not the ſame apology for pronouncing the firſt ſoft as there is in *exaggerate*; which ſee.

☞ This word had long been a vagabond in converſation, and was not to be found in any of our Dictionaries till it was lately admitted to a place in Entick's, and, from its very frequent uſe, may now be conſidered as a denizen of the language. Mr. Colman had, many years ago, made uſe of it in his Prologue to The Wife in the Right, where he ſays—

"No *ſulky* critick to the Playhouſe drawn,
"Whom modern Comedy provokes to yawn."

And this writer's authority alone is a ſufficient proof of the propriety and utility of the word. It may, perhaps, be objected, that the word *ſullen* is perfectly equivalent, and renders this word uſeleſs. Thoſe, however, who conſider language philoſophically know that there are no words perfectly ſynonimous, and conſequently that there are no uſeleſs words. If it be aſked what is the difference between theſe words, I would anſwer, that ſullenneſs ſeems to be an habitual ſulkineſs, and ſulkineſs a temporary ſullenneſs. The former may be an innate diſpoſition; the latter, a diſpoſition occaſioned by recent injury. The one has a malignancy in it threatening danger; the other, an obſtinate averſeneſs to pleaſure. Thus we are in a ſullen mood, and in a ſulky fit; Men and Women are ſaid to be ſullen,

and Children ſulky; ſullenneſs ...edicated of inanimate objects, ſu... ...y of ſuch as are animated.

" No cheerful breeze this *ſullen* region knows;
" The dreadful Eaſt is all the wind that blows."
Pope.

If theſe diſtinctions are juſt, there is good reaſon for receiving the word in queſtion, and incorporating it into the language, even though it had not been adopted by the reſpectable writer I have quoted.

To SURVEY, sûr-vā'. v. a.
To overlook, to have under the view; to overſee as one in authority; to view as examining.

SURVEY, sûr-vā', or sûr'vā. ſ.
View, proſpect.

☞ This ſubſtantive was, till within theſe few years, univerſally pronounced with the accent on the laſt, like the verb: but ſince Johnſon and Lowth led the way, a very laudable deſire of regulating and improving our language has given the ſubſtantive the accent on the firſt ſyllable according to a very general rule in the language, (492); but this has produced an anomaly in pronunciation for which, in my opinion, the accentual diſtinction of the noun and verb does not make amends: if we place the accent on the firſt ſyllable of the noun, the *ey* in the laſt muſt neceſſarily be pronounced like *ey* in *barley*, *attorney*, *journey*, &c. Notwithſtanding therefore this accentuation has numbers to ſupport it, I think it but a ſhort-ſighted emendation, and ought not to be adopted. All our orthöepiſts pronounce the verb with the accent on the laſt, except Fenning, who accents the firſt. Mr. Sheridan, Mr. Scott, Mr. Nares, Dr. Aſh, Perry, and Entick, accent the firſt ſyllable of the noun; but Dr. Johnſon and Bailey, the original lexicographers, accent the laſt. Dr. Kenrick does not accent the noun, and Barclay has not inſerted it.

To cheat under the pretence of trading or trafficking.

☞ This word has been in very general uſe for near twenty years, and has not yet found its way into any of our dictionaries.

From the recent introduction of this word one ſhould be led to believe, that this country was, till lately, a ſtranger to this ſpecies of fraud; but that it ſhould be imported to us by ſo honeſt a people as the Germans, is ſtill more ſurpriſing. That a language is a map of the ſcience and manners of the people who ſpeak it, will ſcarcely be queſtioned by thoſe who conſider the origin and progreſs of the human underſtanding; and if ſo, it is impoſſible that the manners ſhould not influence the manners, and that the language ſhould not correſpond to the manners. From this reaſoning therefore we may conclude, that the faith of traffick was more ſacred in England than in Germany, though Germany might in other reſpects be leſs vicious than England.

To ſuffer a ſuſpenſion of thought and ſenſation, to faint.

☞ This word ſhould be carefully diſtinguiſhed in the pronunciation from *ſoon*: the *w*, as Mr. Nares juſtly obſerves, is effective, and ſhould be heard. It would have been beneath a dictionary of the leaſt credit to take notice of a vulgar pronunciation of this word as if written *ſound*, if it had not been adopted by one of our orthöepiſts. The ſame obſervation holds good of the following word, which muſt not be pronounced exactly like *ſoop*.

☞ I ſee no good reaſon why we ſhould not write and pronounce *ſwordſman* and *gownsman* rather than *ſwordman* and *gownman*, though Johnſon produces his authorities for the latter orthography from good authors. The *s* ſeems to have intervened naturally between the mute and the liquid to facilitate the pronunciation, as in *ſtateſman*, *ſportſman*, *huntſman*, and ſometimes between the two liquids, as *townſman*, *ſaleſman*, &c. But Dr. Johnſon's ſenſe of the word *ſwordman*, meaning a man of the profeſſion of the ſword, or a ſoldier, is now obſolete; we now never hear the word but as ſignifying a man expert in the uſe of the ſword; and in this ſenſe it is always called a *ſwordſman*.

The learned author ſays, "The "moſt extraordinary *tautophony* which he "[Euſtathius] mentions, is that of the vowels "ι and η, in the proper names of the goddeſſes Ιρις and Ηρη." ☞ The quantity of *e* in the firſt ſyllable of this word, and its relatives *tenet*, *tenor*, and *tenure*, is one of the moſt puzzling difficulties of pronunciation. How differently this letter is pronounced by different ſpeakers may be gathered from a view of thoſe orthöepiſts who have marked the quantity of the vowels:

Sheridan,	*tēnable*,	*tēnet*,	*tĕnor*,	*tēnure*.
Kenrick,	*tĕnable*,	*tĕnet*,	*tĕnor*,	*tĕnure*.
Nares,	*tēnable*,	——	*tĕnor*,	*tĕnure*.
Aſh,	*tēnable*,	*tēnet*,	*tĕnor*,	*tēnure*.
Scott,	*tĕnable*,	*tēnet*,	*tĕnor*,	*tēnure*.
Entick,	*tēnable*,	*tĕnet*,	*tĕnor*,	*tĕnure*.
Perry,	*tĕnable*,	*tĕnet*,	*tĕnor*,	*tĕnure*.
W. Johnſton,	*tēnable*,	*tēnet*,	*tĕnor*,	*tēnure*.
Bailey,	——	——	——	*tēnure*.
Buchanan,	*tĕnable*,	——	*tĕnor*,	*tĕnure*.
Fry,	*tēnable*,	*tĕnet*,	*tĕnor*,	*tēnure*.
Smith,	——	*tĕnet*,	——	——
Elphinſton,	——	——	*tĕnor*,	——

From this ſurvey of our dictionaries we find them uniform only in the word *tenor*. They are nearly equally divided on the word *tenet*; and if ſimilitude were to decide, it would be clearly in favour of the ſhort vowel, in this word, as well as in *tenor*. They are both Latin words, and both have the vowel ſhort in the original. This, however, is no reaſon with thoſe who underſtand the analogy of Engliſh pronunciation, (for *tremor*, *minor*, &c. have the firſt vowel ſhort in Latin) (544); but it ſufficiently ſhows the partiality of the ear to the ſhort vowel in words of this form, as is evident in the word *tenant*. The word *tenable* ſeems rather derived from the French *tenable* than the Latin *teneo*, and, being of a different form, comes under a different analogy. The termination *able*, though derived from the Latin *abilis*, is frequently annexed to mere Engliſh words, as *pleaſurable*, *paſturable*, &c. and therefore makes no alteration in the accent or quantity of the word to which it is ſubjoined, (501). But as *tenable* muſt be conſidered as a ſimple in our language, the ſhortening power of the antepenultimate accent alone ſeems to determine the quantity of the firſt ſyllable of this word, which, like *gelable*, *probable*, &c. has the ſhort quantity of the original Latin to plead; a plea which ſeems to have ſome weight in words of this termination, where the antepenultimate accent appears to have leſs influence than in moſt of the other claſſes of words. See PLACABLE. The word *tenure* ſeems inclined to lengthen the firſt vowel in order to diſtinguiſh itſelf from *tenor*; and as there are no good reaſons for ſhortening it, this reaſon ſeems ſufficient to turn the balance in its favour, even if it had not an analogy and ſuch a weight of uſage on its ſide.

TETHER, tĕTH'ŭr. ſ. (469).
A ſtring by which cattle are held from paſturing too wide.

☞ All our lexicographers ſeem to prefer this word to *tedder*, except Barclay and Junius, who refer us from *thether* to *tedder*; and yet nothing can be clearer than its derivation from the Belgic word *tudder*, which Junius explains to be a rope by which horſes or other cattle are tied to keep them from ſtraying; and this, he ſays, undoubtedly comes from the Iriſh *tead*, a rope. While Skinner, without his uſual judgment, derives it from the Latin *tentor*, becauſe it reſtrains cattle from ſtraying. But though *tether* is much more in uſe than *tedder*, it is certainly not ſo legitimately formed, and ought not to have the preference.

THAT, THăt. pronoun demonſtrative.
Not this, but the other; it ſometimes ſerves to ſave the repetition of a word or words foregoing; oppoſed to This, as The Other to One; when This and That relate to foregoing words, This is referred to the latter, and That to the former; ſuch as; that which, what; the thing; by way of eminence. (50).

☞ When this word is uſed as a pronoun demonſtrative it has always an accent on it, and is heard diſtinctly rhyming with *hat*, *mat*, &c. Thus in Pope's Eſſay on Criticiſm, v. 5.

"But of the two, leſs dang'rous is th' offence
"To tire our patience, than miſlead our ſenſe:
"Some few in *that*, but numbers err in this;
"Ten cenſure wrong, for one who writes amiſs."

Here the word *that* is as diſtinctly pronounced as any other accented word in the language.

THAT, THăt. pronoun relative.
Which, relating to an antecedent thing; who, relating to an antecedent perſon.

☞ When this word is a relative pronoun, and is arranged in a ſentence with other words, it never can have an accent, and is therefore much leſs diſtinctly pronounced than the foregoing word. In this caſe the *a* goes into that obſcure ſound it generally has when unaccented (88), as may be heard in pronouncing it in the following paſſage from Pope's Eſſay on Criticiſm, v. 297.

"True wit is nature to advantage dreſs'd,
"What oft was thought, but ne'er ſo well expreſs'd;
"Something, whoſe truth, convinc'd at ſight, we find,
"*That* gives us back the image of our mind."

Here we find the *a* ſo obſcured as to approach nearly to ſhort *u*; and, without any perceptible difference in the ſound, the word might be written *thut*. (92).

THAT, THăt. conjunct. (50) (466).
Becauſe; noting a conſequence; noting indication; noting a final end, in That, as being.

☞ What has been obſerved of the pronunciation of this word, when a relative pronoun, is perfectly applicable to it when a conjunction; in either caſe it never has the accent, and neceſſarily goes into an obſcure ſound like

ſhort *u*. Thus in the following paſſage from Pope's Eſſay on Criticiſm:

" The vulgar thus through imitation err:
" As oft' the learn'd, by being ſingular:
" So much they ſcorn the crowd, *that* if the
" throng
" By chance go right, they purpoſely go wrong."

Here the conjunction *that* is pronounced with exactly the ſame degree of obſcurity as when a relative pronoun.

The word *that*, by being ſometimes a demonſtrative pronoun, ſometimes a relative, and ſometimes a conjunction, may produce a quadruple repetition of the ſame word, which, though not elegant, is ſtrictly grammatical; a repetition, which is, perhaps, peculiar to the Engliſh language. This is humorouſly exemplified by Mr. Steele in the Spectator, No. 80, in the Juſt remonſtrance of affronted THAT, where he brings in this word, declaring how uſeful it had been to a great orator, who, in a ſpeech to the Lords, had ſaid, " My Lords, with humble ſubmiſſion, *that* " that I ſay, is; that *that* that *that* gentleman " has advanced is not *that* that he ſhould " have proved to your Lordſhips." In the pronunciation of this paſſage it is plain, that the word *that*, which is not printed in italicks, is pronounced nearly as if written *thut*. I am ſenſible of the delicacy of the obſcure ſound of this *a*, and therefore do not offer *u* as a perfect equivalent, but as the neareſt approach to it; and as the means of pointing out the power of the accent and its importance in aſcertaining the ſenſe; for if all theſe words were pronounced equally diſtinct, it is plain the ſenſe would be obſcured: and ſo liable are the relative, the conjunction, and the demonſtrative, to be confounded, that ſome writers have diſtinguiſhed the latter by printing it in italicks. Thoſe who wiſh to ſee the moſt profound and ingenious inveſtigation of the grammatical origin of theſe words muſt conſult Horne Tooke's *Diverſions of Purley*.

To THATCH, *th*ătſh. v. a.

To THAW, *th*âw. v. n. (466).

To THAW, *th*âw. v. a.
To melt what was congealed.

THAW, *th*âw. ſ.
Liquifaction of any thing congealed; warmth, ſuch as liquifies congelation.

THE, THĒ, or THĔ. article. (466).
The article noting a particular thing; before a vowel E is commonly cut off in verſe.

☞ Mr. Sheridan has given us theſe two modes of pronouncing this word, but has not told us when we are to uſe one, and when the other. To ſupply this deficiency, therefore, it may be obſerved, that when *the* is prefixed to a word beginning with a conſonant it has a ſhort ſound, little more than the ſound of *th* without the *e*; and when it precedes a word beginning with a vowel, the *e* is ſounded plainly and diſtinctly. This difference will be perceptible by comparing *the pen*, *the hand*, &c. with *the oil*, *the air*, &c.; or the difference of this word before *ancients* and *moderns* in the following Couplet of Pope:

" Some foreign writers, ſome our own deſpiſe;
" *The* ancients only, or *the* moderns prize."

A very imperfect way of pronouncing this word very frequently ariſes in verſe, where the poet, for the preſervation of the metre, cuts off *e* by an apoſtrophe, and unites the article to the following word. This pronunciation depraves the ſound of the verſe without neceſſity, as the ſyllable formed by *e* is ſo ſhort as to admit of being ſounded with the preceding ſyllable, ſo as not to increaſe the number of ſyllables to the ear, or to hurt the melody.

" 'Tis hard to ſay if greater want of ſkill
" Appear in writing, or in judging ill.
" But of the two, leſs dang'rous is *th'* offence
" To tire our patience, than miſlead our ſenſe."
Pope.

" ——————Him, the Almighty Power,
" Hurl'd headlong flaming from *th'* ethereal ſky,
" With hideous ruin and combuſtion, down
" To bottomleſs perdition, there to dwell
" In adamantine chains and penal fire,
" Who durſt defy *th'* Omnipotent to arms."
Milton.

In theſe examples we ſee the particle *the* may either form a diſtinct ſyllable, or not. In the third line from Pope the firſt *the* forms a diſtinct ſyllable, but the ſecond is ſunk into the ſucceeding noun. The ſame may be obſerved of this particle in the firſt, ſecond, and ſixth, lines of the paſſage from Milton: but what appears ſtrange is, that though the particle *the* before a vowel, and ſhortened by an apoſtrophe, does not augment the number of ſyllables, it is really pronounced longer than where it forms a ſyllable, and is not thus ſhortened by eliſion. This is apparent in the third line from Pope,

" But of the two, leſs dang'rous is *th'* offence."

The reaſon why the firſt *the*, though pronounced ſhorter than the ſecond, forms a ſyllable, and the ſecond does not, ſeems to ariſe from the coaleſcence of the vowels, which, though lengthened in ſound, may ſtill be pronounced with one impulſe of the breath. Thus when a conſonant follows the particle *the*, we find two diſtinct impulſes, though the *e* is dropped; but when a vowel follows *the*, the impulſe on this particle ſlides over, as it were, to the conſonant of the ſucceeding ſyllable, without forming two diſtinct impulſes, nearly as if a *y* were interpoſed, and the words were written *th'yof-fence*, *th'Yomnipotent*, &c.

I would not, however, be ſuppoſed to diſapprove of the practice of eliding the *e* before a vowel to the eye when the verſe requires it; this practice is founded on good ſenſe; and the firſt line in the paſſage from Milton ſhows the neceſſity of making the diſtinction, when it is, and when it is not, to be elided; what I wiſh to reform is, the practice of ſhortening the *e* to the ear, and thus mincing and impoveriſhing the ſound of the verſe without neceſſity.

THY, THĪ, or THĕ. pronoun. (466).
Of thee, belonging to thee.

☞ From what has been already obſerved under the pronoun *my*, we are naturally led to ſuppoſe, that the word *thy*, when not emphatical, ought to follow the ſame analogy, and be pronounced like *the*, as we frequently hear it on the ſtage; but if we reflect that reading or reciting is a perfect picture of ſpeaking, we ſhall be induced to think that, in this particular, the ſtage is wrong. The ſecond perſonal pronoun *thy* is not like *my* the common language of every ſubject; it is uſed only where the ſubject is either raiſed above common life, or ſunk below it into the mean and familiar. When the ſubject is elevated above common life, it adopts a language ſuitable to ſuch an elevation, and the pronunciation of this language ought to be as far removed from the familiar as the language itſelf. Thus, in prayer, pronouncing *thy* like *the*, even when unemphatical, would be intolerable; while ſuffering *thy*, when unemphatical, to ſlide into *the* in the pronunciation of ſlight and familiar compoſition, ſeems to lower the ſound to the language, and form a proper diſtinction betweeen different ſubjects. If, therefore, it ſhould be aſked why, in reciting epic or tragic compoſition, we ought always to pronounce *thy* rhyming with *high*, while *my*, when unemphatical, ſinks into the ſound of *me*, it may be anſwered, becauſe *my* is the common language of every ſubject, while *thy* is confined to ſubjects either elevated above common life, or ſunk below it into the negligent and familiar. When, therefore, the language is elevated, the uncommonneſs of the word *thy*, and its full ſound rhyming with *high*, is ſuitable to the dignity of the ſubject: but the ſlender ſound like *the* gives it a familiarity only ſuitable to the language of endearment or negligence, and for this very reaſon is unfit for the dignity of epic or tragic compoſition. Thus in the following paſſages from Milton:

" Say firſt, for heav'n hides nothing from *thy*
" view,
" Nor the deep tract of hell"——
Parad. Loſt. b. 1.

" O thou, that with ſurpaſſing glory crown'd,
" Look'ſt from *thy* ſole dominion, like the God
" Of this new world; at whoſe ſight all the
" ſtars
" Hide their diminiſh'd heads; to thee I call,
" But with no friendly voice, and add *thy* name,
" O ſun, to tell thee how I hate *thy* beams."
Parad. Loſt. b. 4.

Here pronouncing the pronoun *thy*, like the word *the*, would familiarize and debaſe the language to proſe. The ſame may be obſerved of the following paſſage from the tragedy of Cato.

" Now, Cæſar, let *thy* troops beſet our gates,
" And bar each avenue; *thy* gathering fleets
" O'erſpread the ſea, and ſtop up ev'ry port;
" Cato ſhall open to himſelf a paſſage,
" And mock *thy* hopes"———

Here the impropriety of pronouncing *thy* like *the* is palpable: nor would it be much more excuſable in the following ſpeech of Portius, in the firſt ſcene of the ſame tragedy;

" Thou ſee'ſt not that *thy* brother is *thy* rival;
" But I muſt hide it, for I know *thy* temper.
" Now, Marcus, now *thy* virtue's on the proof;
" Put forth *thy* utmoſt ſtrength, work ev'ry
" nerve,
" And call up all *thy* father in *thy* ſoul"——.

As this pronoun is generally pronounced on the ſtage, it would be difficult for the ear to diſtinguiſh whether the words are,

" Thou know'ſt not that *thy* brother is *thy* rival"
or,
" Thou know'ſt not that *the* brother is *the* " rival," &c.

And this may be one reaſon why the ſlender pronunciation of *thy* ſhould be avoided as much as poſſible.

Perhaps it will be urged, that though theſe paſſages require *thy* to be pronounced ſo as to rhyme with *high*, there are other inſtances in tragedy where the ſubject is low and familiar, which would be better pronounced by ſounding *thy* like *the*: to which it may be anſwered, that when tragedy lowers her voice, and deſcends into the mean and familiar, as is frequently the caſe in the tragedies of Shakeſpeare, the ſlender pronunciation of *thy* may be adopted, becauſe, though the piece may have the name of a tragedy, the ſcene may be really comedy. The only rule, therefore, that can be given, is a very indefinite one; namely, that *thy* ought always to be pronounced ſo as to rhyme with *high* when the ſubject is raiſed, and the perſonage dignified; but when the ſubject is familiar, and the perſon we addreſs, without dignity or importance, if *thy* be the perſonal pronoun made uſe of, it ought to be pronounced like *the*: thus, if in a familiar way, we ſay to a friend, *Give me thy hand*, we never hear the pronoun *thy* ſounded ſo as rhyme with *high*: and it is always pronounced like *the* when ſpeaking to a child; we ſay, *Mind thy book*, *Hold up thy head*, or *Take of thy hat*. The phraſeology we call *thee and thouing* is not in ſo common uſe with us as the *tutoyant* among the French: but as the ſecond perſonal pronoun *thou*, and its poſſeſſive *thy* is indiſpenſable in compoſition, it ſeems of ſome importance to pronounce them properly.

THYSELF, THĪ-sĕlf'. pronoun reciprocal. It is commonly uſed in the oblique caſes or following the verb; in poetical or ſolemn language it is ſometimes uſed in the nominative.

☞ As this word, when it ſignifies a rank or row, is univerſally pronounced like *tear*, a drop from the eye, it ought always to be written *tier*; which would prevent a groſs irregularity. This is the more to be wiſhed, not only as its derivation from the old French *tiere* ſeems to require this ſpelling, but to diſtinguiſh it from the word *tire*, a head-dreſs; which, probably, being a corruption either of the word *tiara*, an ornament for the head, or of the Engliſh word *attire*, ought to be written and pronounced like the word *tire*, to fatigue. Dr. Kenrick is the only orthöepiſt who has attended to this diſtinction. See BOWL.

☞ What has been obſerved of the word *The*, reſpecting the length of the *e* before a vowel

and its ſhortneſs before a conſonant, is perfectly applicable to the prepoſition, and the adverb *To*. This will be palpable in the pronunciation of the verb *to begin* and *to end*, and in the phraſe, I went *to* London, he went *to* Eaton. It may be obſerved too, that this word, though deprived of its *o* to the eye, always preſerves it to the ear. Whether we ſee it elided, as in Pope's Eſſay on Man:

"Say what the uſe were finer optics giv'n,
"T' inſpect a mite, not comprehend the
"heav'n?"

Or preſerved with an apoſtrophe after it, as in Milton:

"For ſtill they knew, and ought t'have ſtill re-
"member'd,
"The high injunction not to taſte that fruit,
"Whoever tempted."

In both theſe inſtances the word *to* ought to be pronounced in exactly the ſame manner; that is, like the number *two*.

☞ I am much miſtaken if general uſage does not incline to the ſhort ſound of the diphthong in theſe words; and that this ſound ought to be indulged, is palpable to every Engliſh ear; which finds a repugnance at giving the French ſound to any word that is not newly adopted. *Journey*, *nouriſh*, *courage*, and many other words from the French, have long been angliciſed; and there is no good reaſon why this word ſhould not fall into the ſame claſs. Mr. Sheridan, Mr. Scott, Dr. Kenrick, and Mr. Perry, give the firſt ſound of this word; and Buchanan and W. Johnſton, the ſecond. Junius and Skinner ſpell the word *Turnament*.

☞ Notwithſtanding our poets almoſt univerſally accent this word on the firſt ſyllable, and the poets are pretty generally followed by good ſpeakers, there are ſome, and thoſe not of the loweſt order, who ſtill place the accent on the ſecond. Theſe ſhould be reminded, that as *inwards*, *outwards*, *backwards*, *forwards*, and every other word of the ſame form, have the accent on the firſt ſyllable, there is not the leaſt reaſon for pronouncing *towards* with the accent on the laſt. All our orthöepiſts place the accent upon the firſt ſyllable of *toward* when an adjective. *Towards* being always a prepoſition has the accent on the firſt ſyllable by Mr. Scott; but Mr. Perry, Barclay, and Fenning, place it on the ſecond. From the coaleſcence of the *o* with the *w* this word is pronounced generally in one ſyllable, though Dr. Kenrick ſays otherwiſe. Mr. Sheridan ſo pronounces it: Mr. Nares and Mr. Smith rhyme it with *boards*: Bailey accents the firſt ſyllable of *toward*, and Entick the ſame ſyllable on the ſame word, and on *towards* as a prepoſition.

☞ In this word we have a ſtriking inſtance of the averſion of the language to what may be called a Tautophony, or a ſucceſſive repetition of the ſame ſound. We find no repugnance at aſpirating the *d* in *Comedian*, and pronouncing it as if written *Co-me-je-an*; but there is no ear that would not be hurt at pronouncing *Tragedian*, as if written *Tra-je-je-an*. The reaſon is evident. The *ge* that immediately precedes being exactly the ſame ſound as *di*, when aſpirated into *je*, the ear will not ſuffer the repetition, and therefore diſpenſes with the laws of aſpiration, rather than offend againſt thoſe of harmony. To the ſame reaſon we muſt attribute giving the ſound of *zh* to the double *s* in *Abſciſſion*, and to the *ti* in *Tranſition*. The ſame averſion to the repetition of ſimilar ſounds makes us drop the firſt aſpiration in *Diphthong*, *Triphthong*, *Ophthalmy*, &c. See OPHTHALMICK.

☞ I prefer the firſt mode of pronouncing this word to the ſecond; though, at firſt ſight, it appears not ſo regular. My reaſon is, the averſion our language has to a repetition of exactly ſimilar ſounds. The *s* in the prefix *trans* is always ſharp and hiſſing, and that inclines us to vary the ſucceeding aſpiration, by giving it the flat inſtead of the ſharp ſound. This is the beſt reaſon I can give for the very prevailing cuſtom of pronouncing this termination in this word contrary to analogy. When I aſked Mr. Garrick to pronounce this word, he, without premeditation, gave it in the firſt manner; but when I deſired him to repeat his pronunciation, he gave it in the ſecond:

"As one who in his journey bates at noon,
"Though bent on ſpeed, ſo here th' Archangel paus'd,
"Betwixt the world deſtroy'd and world reſtor'd,
"If Adam ought perhaps might interpoſe,
"Then with *tranſition* ſweet new ſpeech reſumes." *Milton.*

I think, however, it may be claſſed among thoſe varieties where we ſhall neither be much applauded for being right, nor blamed for being wrong.

This is evident in *tripartite*, *triplicate*, and a thouſand other words, notwithſtanding the ſpecific meaning of the firſt ſyllable, which, in words of two ſyllables, when the accent is on the firſt, and in polyſyllables when the accent is on the ſecond, ought, according to analogy, to have the *i* long. See Principles, No. 530, 535.

☞ The firſt mode of pronouncing this word is that which is adopted by Mr. Sheridan, Dr. Kenrick, Bailey, Buchanan, and Perry; and the ſecond, by Dr. Aſh, Mr. Nares, Mr. Scott, Entick, and Fry. I do not heſitate to pronounce the former the moſt agreeable to Engliſh analogy; not only becauſe the prefixes, *bi* and *tri*, when no other law forbids, ought to be made as diſtinct as poſſible, but becauſe all words of two ſyllables with the accent on the firſt, and having one conſonant between two vowels, ought, if cuſtom does not abſolutely forbid, to have the vowel in the firſt ſyllable long. This is the genuine Engliſh analogy; the mode in which we pronounce all Latin words of this form, let the quantity be what it will (544); and the mode in which we ſhould have pronounced all Engliſh words of this form, if an affectation of Latinity had not often prevented us. For the ſame reaſon, therefore, that we pronounced *biped*, *trigon*, and *trident*, with the *i* long, we ought to adopt the firſt pronunciation of the word in queſtion, and not the ſecond. See DRAMA.

☞ Mr. Sheridan leaves out the *l* in this word, in the word *vault*, to leap, and all their compounds; but my ear groſsly deceives me if this *l* is ever ſuppreſſed, except in the ſenſe of a *cellar for wine*, &c. In this I am ſupported by all our orthöepiſts, from whom the ſounds of the letter can be gathered; and Mr. Scott and Mr. Perry preſerve the *l* in every word of this form. This, I think, is not agreeable to general uſage with reſpect to the exception I have given; though I think it might be diſpenſed with for the ſake of uniformity, eſpecially as the old French *voulte*, the Italian *volta*, and the lower Latin *voluta*, from which the word is derived, have all of them the *l*; nor do I think the preſervation of it in the word in queſtion would incur the leaſt imputation of pedantry.

☞ In the first edition of this Dictionary I accented this word on the first syllable contrary to the example of Dr. Johnson, Dr. Ash, and Mr. Sheridan; but upon a revisal of the various analogies of accentuation, was inclined to think this accentuation somewhat doubtful. The word *veneno*, from which this is formed, has the penultimate long; and in verbs of this termination derived from the Latin, and preserving the same number of syllables, we often preserve the same accent, as in *arietate*, *coacervate*, *denigrate*, &c.; but this is so often neglected in favour of the antepenultimate accent, as in *decorate*, *defatigate*, *delegate*, *desolate*, &c. that general usage seems evidently leaning to this side; and as in *perpetrate* and *emigrate*, from *perpetro* and *emigro*, where the penultimate vowel is doubtful, we always place the accent on the antepenultimate; so in this and similar words, where custom does not decide, I would always recommend a similar accentuation. See Principles, No. 503.

☞ A shameful corruption of this word by entirely sinking the *i*, has reduced it to two syllables. Mr. Sheridan pronounces it in three; Dr. Kenrick gives it in three, but tells us it is usually heard in two. Mr. Scott gives it both ways; Mr. Perry only as it is contracted; and Mr. Elphinston supposes the *i* in this word as much lost as in *business*.

It is highly probable this corruption is of long standing; for though Shakespeare, in *As You Like It*, says,

"Come, shall we go and kill us *venison?*"

Yet Chapman pronounces this word in two syllables,

"To our *venzon*'s store
"We added wine till we could wish no more.',

And Dryden after him,

"He for the feast prepar'd,
"In equal portions with the *ven'son* shar'd."

To these instances we may add an excellent poet of our own time:

"Gorgonius sits abdominous and wan,
"Like a fat squab upon a Chinese fan;
"He snuffs far off th' anticipated joy;
"Turtle and *ven'son* all his thoughts employ."

Poetry will ever consider this word, like many others, either as of two or three syllables; but solemn prose, such as the language of Scripture will always give the word its due length. For however we may be accustomed to hear *ven'son* in common conversation, what disgust would it give us to hear this word in the pulpit, when Isaac says to his son:

"Now therefore take, I pray thee, thy weapons,
"thy quiver, and thy bow, and go out to
"the field, and take me some *ven'son*."

In short, my opinion is, that this word, in spite of the general corruption, ought always to be pronounced in three syllables by correct speakers, and that the contraction should be left to the poets.

☞ This word is perfectly angliciſed, and therefore ought to have its laſt ſyllable pronounced according to Engliſh analogy, like *Centre*, *Sceptre*, *Mitre*, &c. See Principles, No. 416. There is a common miſtake in the uſe of the Latin word from which this is derived, which it may not be improper to rectify. *Vertebra* is not unfrequently uſed to ſignify the whole collection of joints which form the back bone, while in reality it means only one of thoſe joints; the plural is *Vertebræ*, and this ought to be uſed for the whole ſpine, if we denominate it by a Latin word; but if we ſpeak Engliſh, it ought to be *Ver-*

tebres, and pronounced as if written *Verteburs*.

A giddineſs, a ſenſe of turning in the head.

☞ This word is exactly under the ſame predicament as *Serpigo* and *Lentigo*. If we pronounce it learnedly, we muſt place the accent in the firſt manner (503). If we pronounce it modiſhly, and wiſh to ſmack of the French or Italian, we muſt adopt the ſecond; but if we follow the genuine Engliſh analogy, we muſt pronounce it in the laſt manner. See Principles, No. 112.

The authorities for the firſt pronunciation are, Mr. Elphinſton, Mr. Sheridan, Bailey, and Entick; for the ſecond, Dr. Kenrick, Mr. Nares, Mr. Scott, and W. Johnſton; and for the third, Dr. Johnſon, Dr. Aſh, Mr. Perry, Buchanan, Barclay, and Fenning. This too was Swift's pronunciation, as we ſee by Dr. Johnſon's quotation:

"And that old *vertigo* in's head,
"Will never leave him till he's dead."

In this word we ſee the tendency of the accent to its true center in its own language. *Vertigo* with the accent on the *i*, and that pronounced long as in *title*, has ſo Latin a ſound that we ſcarcely think we are ſpeaking Engliſh: this makes us the more readily give into the foreign ſound of *i*, as in *fatigue*. This ſound a correct Engliſh ear is ſoon weary of, and ſettles at laſt with the accent on the firſt ſyllable, with the *i* ſounded as in *indigo*, *portico*, &c.

Sometimes we find the word in queſtion written *villanny*; and it is certain, that it either ought to be written ſo from the old French *villonnie*, with double *l* and double *n*, or from the modern French with theſe letters ſingle: or if we muſt form it from our own word *villain*, (which we ſeldom chooſe to do if we can diſcover the moſt remote relation to other languages); in this caſe, I ſay, we ought, according to our own analogy, to ſpell the word *villainy*.

☞ This word, ſays Johnſon, *Minſhew*, with great applauſe from Skinner, derives from *un pere*: in French, a *father*. But whatever may be its derivation, one ſhould think, in pronunciation, it ought to claſs with *empire*: and yet we find our orthöepiſts conſiderably divided in the ſound of the laſt ſyllable of both theſe words.

Empire, Dr. Kenrick, Mr. Scott, W. Johnſton, and Mr. Perry, rhyme it with *fire*; but Mr. Sheridan and Buchanan, with the firſt of *pyr-a-mid*.

Umpire, Mr. Sheridan and W. Johſton rhyme it with *fire*; but Mr. Perry, Mr. Scott, and Buchanan, with *fear*: and Dr. Kenrick with the firſt of *pyr-a-mid*.

Amidſt this variety and inconſiſtency we find a preponderancy to the long ſound of *i*, as in *fire*: and this, in my opinion, is the moſt eligible.

Rampire and *Vampyre* follow the ſame analogy; and *Satire* and *Samphire* may be looked on as irregular.

☞ This word is not in Johnſon; but by its having a place in Junius, Skinner, Philips, Aſh, and Barclay, it ſeems to have been once a living part of the language. It is at preſent, however, only heard in the mouths of the vulgar, from which ſtate few words ever return into good uſage. Junius explains it by *ſolitary*, and with great probability ſuppoſes it is a corruption of *uncooth*; but Skinner ſpells it *unkward*, and ſays it is a ſlight alteration of ſenſe from the Teutonic *Ungehewer*, which ſignifies a monſter, a terrible or horrible thing, as ſolitude is ſuppoſed to be. Whatever its

etymology may be, its utility can ſcarcely be diſputed; for it has a ſhade of meaning peculiar to itſelf, which expreſſes a diſagreeable paſſive ſtate, ariſing from a concurrence of jarring circumſtances. Thus we ſometimes hear the common people ſay, I found myſelf very *unked*; it was very *unked* to do ſo. Now though *irkſome* is the neareſt word, and might ſupply the ſecond phraſe, it is quite incompatible with the firſt. Nor is it a perfect equivalent to *unked* in the ſecond; for *irkſome* implies a much more diſagreeable ſtate than *unked*, which ſeems to mean a diſagreeable ſtate ariſing from obſtacle, and therefore ſeems to form a middle ſenſe between *uncooth* and *irkſome*. In this ſenſe the word appears to have been uſed by Charles Butler of Magdalen College, Oxford, in his Engliſh Grammar, 1634, where, ſpeaking of the neceſſity of altering the orthography, he ſays, "Nevertheleſs, "ſo powerful is the tyrant cuſtom, oppoſing "and overſwaying right and reaſon, that I do "eaſily believe this little change (though "never ſo right, reaſonable and profitable), "will ſeem to ſome, harſh and *unked* at the "firſt: but, after a while, being inured thereunto, I ſuppoſe they will rather wonder, "how our ancient, eloquent, noble language, "in other reſpects equalizing the beſt, could "ſo long endure theſe groſs and diſgraceful "barbariſms." Preface to the Reader.

Johnſton, for want of attending to the rule laid down in Principles, No. 85, makes *waſt* rhyme with *ſoft*: Mr. Nares has not got the word; but by omitting it in claſſes where the *a* is pronounced as in *father* and *water*, ſhows he is of opinion it ought to have the ſound I have given it.

☞ Theſe two modes of pronunciation have been long contending for ſuperiority, till at laſt the former ſeems to have gained a complete victory, except in the territories of rhyme. Here the poets claim a privilege, and readers ſeem willing to grant it them, by pronouncing this word when it ends a verſe, ſo as to rhyme with the word it is coupled with,

"For as in bodies, thus in ſoul we find,
"What wants in blood and ſpirits, fill'd with
"*wind*."

But in proſe this regular and analogical pronunciation borders on the antiquated and pedantic.

What could have been the cauſe of this deviation from the general rule in this word and *gold* it is not eaſy to gueſs; they were both bound to their true ſound in the fetters of rhyme; but theſe fetters, which are ſuppoſed to alter the pronunciation of ſome words by linking diſſimilar ſounds, have not been ſtrong enough to reſtrain theſe from a capricious irregularity. It is not improbable that the firſt deviation began in the compounds, ſuch as *Goldſmith*, *Goldfinch*, *Windmill*, *Windward*, &c. (as it is a prevailing idiom of pronunciation to ſhorten ſimples in their compounds, ſee Principles, No. 515, and the word *Knowledge*) and theſe at laſt corrupted the ſimples. But whatever may have been the cauſe, the effect is now become ſo general, that reducing them to their true ſound ſeems almoſt impracticable. Mr. Sheridan tells us, that Swift uſed to jeer thoſe who pronounced *wind* with the *i* ſhort, by ſaying, "I have a great *mĭnd* "to *fĭnd* why you pronounce it *wĭnd*." A very illiberal critic retorted this upon Mr. Sheridan, by ſaying, "If I may be ſo *boold*, I "ſhould be glad to be *toold* why you pro-"nounce it *goold*." The truth is, every child knows how theſe words ought to be pronounced according to analogy; but it requires ſome judgment, and an extenſive acquaintance with polite and literary circles, to know which is the moſt current pronunciation. Where analogy is not ſo evident, and yet as real as in theſe words, it is ſome credit to a ſpeaker to depart a little from cuſtom in favour of analogy; but where every one knows as well as ourſelves what ought to be the pronunciation; and yet where every one pronounces in oppoſition to it, we ſhall get nothing but contempt in departing from the general voice. With reſpect to the words in queſtion, my obſervation fails me, if *wind*, as a ſingle word, is not more fixed in the ſound of ſhort *i* than *gold* in the ſound of *oo*; the true ſound of this laſt word ſeems not quite irrecoverable, except in the compound *goldſmith*; but the compounds of *wind*, ſuch as *windy*, *windmill*, *windward*, &c. muſt, in my opinion, be given up. Nor till ſome ſuperior ſpirit, uniting the politeneſs of a Cheſterfield with the genius of a Swift, deſcends to vindicate the rights of an injured word, do I think that *wind* will, in proſe and familiar language, ever be a faſhionable pronunciation. The language of Scripture ſeems to have native dignity and ſolemnity ſufficient to authorize the long ſound, but no other. Mr. Sheridan and Mr. Scott give the ſame preference to the firſt ſound of this word that I have done. Dr. Kenrick and Mr. Barclay give only the ſhort ſound. Mr. Perry joins them in this ſound; but ſays, in dramatic ſcenes, it has the long one. Mr. Nares ſays it has certainly the ſhort ſound in common uſage, but that all our beſt poets rhyme it with *mind*, *kind*, &c. and Mr. Smith obſerves, that it is now the polite pronunciation, though againſt analogy.

☞ Mr. Elphinſton is ſingular in pronouncing this word ſo as to rhyme with *but*; Mr. Sheridan, Mr. Scott, W. Johnſton, Mr. Perry, and Mr. Smith, rhyme it with *not*.

WOVE, wōve. The preterit and participle paſſive of Weave.

WOVEN, wō'v'n. (103). The participle paſſive of Weave.

WOULD, wŭd. (320). The preterit of Will; it is generally uſed as an auxiliary verb with an infinitive, to which it gives the force of the ſubſtantive mood; was or am reſolved, wiſh or wiſhed to; it is a familiar for Wiſh to do, or to have. See BEEN.

WOUND, wōond, or wound. f. (315)
A hurt given by violence.
☞ The firſt pronunciation of this word, though generally received among the polite world, is certainly a capricious novelty. A novelty either generated by falſe criticiſm to diſtinguiſh it from the preterit of the verb to *wind*, of which there was not the leaſt danger of interference (ſee BOWL); or more probably from an affectation of the French ſound of this diphthong, which, as in *pour*, and ſome other words, we find of late to have prevailed. The Stage is in poſſeſſion of this ſound; and what Swift obſerves of newſpapers with reſpect to the introduction of new and fantaſtical words, may be applied to the Stage, with reſpect to new and fantaſtical modes of pronunciation (ſee SIGH). That the other pronunciation was the eſtabliſhed ſound of this word, appears from the poets, who rhyme it with *bound*, *found*, *ground*, and *around*, and is ſtill ſo among the great bulk of ſpeakers, who learn this ſound at ſchool, and are obliged to unlearn it again when they come into the converſation of the polite world. Mr. Sheridan and Mr. Scott adopt the firſt ſound of this diphthong; Dr. Kenrick and W. Johnſton the ſecond: Mr. Perry gives both, but prefers the firſt; and though Mr. Smith, in his Vocabulary, has claſſed it with *found* and *found*, ſays *wound* is the common pronunciation. I am, however, of Mr. Nares's opinion, who ſays this pronunciation ought to be entirely baniſhed. But where is the man bold enough to riſk the imputation of vulgarity by ſuch an expulſion?

To WRAP, răp. v. a. (474).
To roll together, to complicate; to involve; to cover with ſomething rolled or thrown round; to compriſe, to contain; to Wrap up, to involve totally; to tranſport, to put in ecſtaſy.
☞ This word is often pronounced *rop*, rhyming with *top*, even by ſpeakers much above the vulgar. They have a confuſed idea, that a preceding *w* makes the *a* broad, and do not attend to the intervening *r*, which bars the power of the *w*, and neceſſarily preſerves the *a* in its ſhort Italian ſound. Mr. Sheridan, Mr. Scott, W. Johnſton, Dr. Kenrick, Mr. Perry and Mr. Smith, pronounce it as I have done.

WRAPPER, răp'pûr. ſ. (98).
One who wraps; that in which any thing is wrapped.

WRATH, rŏth, or răth. ſ. (474).
Anger, fury rage.
☞ The firſt pronunciation of this word is by far the more uſual, but the laſt is more analogical. The *w* has no power over the *a*, for the ſame reaſon as in the preceding word. A want of attending to this, and, perhaps confounding this word with the obſolete adjective *wroth*, are the reaſons of the preſent currency of this erroneous pronunciation. Mr. Sheridan, Mr. Scott, W. Johnſton, Dr. Kenrick, Mr. Nares, and Mr. Smith, adopt the firſt ſound; and Mr. Perry alone the laſt; but in a caſe where analogy is ſo clear, his authority ought, in my opinion, to outweigh them all.

☞ I have placed what I think the leaſt uſual mode of pronouncing this word firſt, becauſe I think it ſo much more agreeable to analogy than the ſecond. Nouns and verbs throughout the whole language ſeem to be diſtinguiſhed by the ſharp or flat ſound of the final hiſſing conſonant. See Principles, No. 437, 467, 499.

☞ Mr. Sheridan, Mr. Scott, W. Johnſton, Mr. Smith, and Mr. Fry, pronounce this word ſo as to rhyme with *nay*, *pay*, &c. But Steele or Brightland, Dr. Jones who wrote *The new Art of Spelling* in Queen Anne's time, Dr. Kenrick and Mr. Perry, pronounce it like the pronoun *ye*. Though numbers are againſt me, I do not heſitate to pronounce the latter mode the beſt; firſt, as it is more agreeable to the general ſound of the diphthong; next, as it is more related to its familiar ſubſtitute *yes*; and laſtly, unleſs my memory greatly fails me, becauſe it is always ſo pronounced when contraſted with *nay*; as in that precept of the Goſpel, "Let your communication "be *yea*, *yea*, and *nay*, *nay*."

☞ It is commonly pronounced, ſays Johnſon, and often written *Yolk*. To which we may add, that when the word is ſo written, the *l* is ſilent, and the word pronounced *yoke*. But Johnſon ſeems juſtly to have preferred the former mode of writing and pronouncing this word as more agreeable both to etymology and the beſt uſage.

☞ Mr. Sheridan, Mr. Nares, Mr. Scott, Dr. Jones, and Mr. Fry, pronounce this word as if written *yallow*, rhyming with *tallow*. But Dr. Kenrick, W. Johnſton, Mr. Smith, and Mr. Perry, preſerve the *e* in its pure ſound, and rhyme the word with *mellow*. The latter mode is, in my opinion, clearly the beſt, both as more agreeable to analogy, and the beſt uſage; For I am much deceived if the former pronunciation does not border cloſely on the vulgar.

YEOMAN, yō′măn. ſ. (260).
A man of a ſmall eſtate in land, a farmer, a gentleman farmer; it ſeems to have been an-

ciently a kind of ceremonious title given to ſoldiers, whence we have Yeomen of the guard; it was probably a freeholder not advanced to the rank of a gentleman.

☞ Junius gives us a great variety of derivations of this word, but ſeems moſt to approve of that from *gaeman* in the old Friſick, ſignifying a countryman or villager; and this word is derived farther by Junius from the Greek γαῖα, γαία, γῆ, which he tells us does not only ſignify the earth in general, but any great portion of land. Skinner ſays it may be derived from the Anglo-Saxon *Gemæne*, or the Teutonic *Gemein*, a common man, or one of the commonality; or from *Eowεman*, a ſhepherd; from *Goodman*, an appellation given to inferior people; from *Gemana*, a companion; from *Geongman*, a young man; from *Yeman*, an ordinary man, or any body; like the Spaniſh *Hidalgo*; but he prefers its derivation from the Anglo-Saxon *Guma*, a painful or laborious man.

But however etymologiſts are divided in the derivation of this word, orthöepiſts are not leſs different in their pronunciation of it. Mr. Sheridan, Mr. Scott, Mr. Coote, (author of the Elements of Grammar), Steele's Grammar, publiſhed in Queen Anne's time, Mr. Barclay, Mr. Smith, and Buchanan, pronounce it with the diphthong ſhort, as if written *yĕmman*; Dr. Kenrick pronounces it as if written *yŭmman*; Mr. Elphinſton, (who quotes Langham, the famous reformer of orthography in Queen Elizabeth's time, for the ſame pronunciation), ſounds the *eo* like *ee*; and Dr. Jones, the author of the New Art of Spelling in Queen Anne's time, pronounces it in the ſame manner. To which we may add Ben Jonſon, who ſays, that *yeoman*, *people*, and *jeopardy*, were truer written *yéman*, *péple*, *jépardy*. But W. Johnſton, Mr. Perry, Entick, and Fry, pronounce the *eo* like long open *o*, as if written *yōman*: and this laſt appears to me to be the moſt received pronunciation. It is that which we conſtantly hear applied to the King's body guard, and it is that which has always been the pronunciation on the Stage; an authority which, in this caſe, may not, perhaps, improperly be called the beſt echo of the public voice. I well remember hearing Mr. Garrick pronounce the word in this manner, in a ſpeech in King Lear: "Tell me, fellow, is a madman "a gentleman or a *yeōman?*"

YEOMANRY, yō′măn-rē. ſ. (260).
The collective body of yeomen.

YES, yĕs. ad. (101).
A term of affirmation; the affirmative particle oppoſed to No.

☞ This word is worn into a ſomewhat ſlenderer ſound than what is authoriſed by the orthography; but *e* and *i* are frequently interchangeable, and few changes can be better eſtabliſhed than this. W. Johnſton and Mr. Perry are the only orthöepiſts who give the ſound of the vowels, that do not mark this change; but Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Nares, Mr. Smith, and Dr. Jones in his *New Art of Spelling*, confirm this change, and rhyme it with *hiſs*, *miſs*, *bliſs*, &c. See BEEN and DESPATCH.

YEST, yĕst. ſ.
The foam, ſpume, or flower of beer in fermentation; barm; the ſpume on a troubled ſea.

☞ Dr. Johnſon has very properly ſpelled this word *yeſt*, from the Saxon *geſt*, and not *yeaſt* as we ſometimes ſee it; and this ſpelling decides its pronunciation. Dr. Jones ſpells it *yeaſt*, and gives the diphthong its long ſound; Mr. Nares pronounces the word in the ſame manner, but ſpells it *yeſt*; Dr. Kenrick ſpells it *yeſt*, but rhymes it with *miſt*; Mr. Barclay pronounces it *yeeſt*; Mr. Perry writes it *yēaſt* and *yēſt*; but Mr. Sheridan, Mr. Scott, and Mr. Smith, write it as Dr. Johnſon has done, and pronounce it as I have done; and I think not only more agreeably to analogy, which forbids us to pronounce *e* long, when followed by *ſt* in the ſame ſyllable, (ſee LEST), but, if I miſtake not, more conſonant to polite uſage. The vulgar do not only pronounce the diphthong long, but ſink the *y*, and reduce the word to *eaſt*.

YESTER, yĕs′tŭr. a.

☞ Though *yes*, from its continual uſe, is allowably worn into the ſomewhat eaſier ſound of *yis*, there is no reaſon why *yeſterday* ſhould adopt the ſame change; and though I cannot pronounce this change vulgar, ſince Mr. Sheridan, Dr. Kenrick, Mr. Nares, and Mr. Scott have adopted it, I do not heſitate to pronounce the regular ſound given by W. Johnſton as the more correct, and agreeable to the beſt uſage.

YESTERNIGHT, yĕs′tŭr-nīte. ſ.
The night before this night.

YET, yĕt. conjunct.
Nevertheleſs, notwithſtanding, however.

☞ The *e* in this word is frequently changed by incorrect ſpeakers into *i*; but though this change is agreeable to the beſt and moſt eſtabliſhed uſage in the word *yes*; in *yet* it is the mark of incorrectneſs and vulgarity.

Dr. Kenrick is the only orthöepiſt who gives any countenance to this incorrectneſs, by admitting it as a ſecond pronunciation; but Mr. Sheridan, Mr. Scott, W. Johnſton, Mr. Perry, and Mr. Smith, give the regular ſound only.

YET, yĕt. ad.
Beſide, over and above; ſtill, the ſtate ſtill remaining the ſame; once again; at this time, ſo ſoon, hitherto, with a negative before it; at leaſt; it notes increaſe or extenſion of the ſenſe of the words to which it is joined; ſtill, in a new degree; even, after all; hitherto.

YOUR, yōōr. pronoun.
Belonging to you; Yours is uſed when the ſubſtantive goes before or is underſtood, as this is Your book, this book is Yours.

☞ This word is nearly under the ſame predicament as the pronoun *My*. When the emphaſis is upon this word, it is always pronounced full and open like the noun *Ewer*; as, "The moment I had read *Your* letter I "ſat down to write *Mine*;" but when it is not emphatical it generally ſinks into *yur*, exactly like the laſt ſyllable of *Law-yer*; as, "I had juſt anſwered *yur* firſt letter as *yur* "laſt arrived." Here if we were to ſay, "I "had juſt anſwered *your* firſt letter as *your* "laſt arrived," with *your* ſounded full and open like *Ewer*, as in the former ſentence, every delicate ear would be offended. This obſcure ſound of the poſſeſſive pronoun *your* always takes place when it is uſed to ſignify any ſpecies of perſons or things in an indeterminate ſenſe. Thus Addiſon, ſpeaking of thoſe metaphors which profeſſional men moſt commonly fall into, ſays, "*Your* men of bu- "ſineſs uſually have recourſe to ſuch inſtances "as are too mean and familiar. Spectator No. 421.

YOURSELF, yŭr-sĕlf′. ſ.

One paſſionately ardent in any cauſe. Generally uſed in diſpraiſe.

☞ There are few words better confirmed by authority in their departure from the ſound of their ſimple than this and the following word. Dr. Aſh and Bailey are the only lexicographers who (if we may judge of the poſition of the accent) give the long ſound to this word, as in *zeal*; and even theſe give the ſhort ſound to *zealous*. Dr. Kenrick gives both ſounds to both words, but prefers the ſhort ſound by placing it firſt: but Mr. Elphinſton, Mr. Sheridan, Mr. Scott, W. Johnſton, Mr. Nares, Mr. Smith, Mr. Perry, Barclay, and Entick, give both theſe words the ſhort ſound. As the word *zealous* may either come from the Latin *zelus*, (or rather *zeloſus*), or be a formative of our own from *zeal*, as *villanous*, *libellous*, &c. from *villain*, *libel*, &c. analogy might very allowably be pleaded for the long ſound of the diphthong; and if cuſtom were leſs decided, I ſhould certainly give my vote for it; but as propriety of pronunciation may be called a compound ratio of uſage and analogy, the ſhort ſound muſt in this caſe be called the proper one. See KNOWLEDGE, and Principles, No. 515.

ZEALOUS, zĕl'ŭs, or zē'lŭs. a.

ZEALOUSLY, zĕl'ŭs-lē, or zē'lŭs-lē. ad. With paſſionate ardour.

ZENITH, zē'nĭth. ſ.

☞ I had never called in doubt the pronunciation of this word, till I was told that mathematicians generally made the firſt ſyllable ſhort. Upon conſulting our orthöepiſts, I find all who have the word, and who give the quantity of the vowels, make the *e* long, except Entick. Thus Sheridan, Kenrick, Scott, Buchanan, W. Johnſton, and Perry, pronounce it long; and if this majority were not ſo great and ſo reſpectable; the analogy of words of this form ought to decide. See Principles, No. 544. See CLEF and CONSTRUE.

ZIGZAG, zĭg'zăg. ſ.
Any thing compoſed of ſhort turns. *Aſh.*

☞ This is a word of ludicrous formation, but, like others of the ſame kind, very expreſſive, and frequently uſed by the beſt authors. Pope has very happily exemplified the uſe of it in his Dunciad, where he ſays:

" Round him much embryo, much abortion lay,
" Much future ode and abdicated play;
" Nonſenſe precipitate like running lead,
" That ſlipp'd through cracks and *zig-zags* of
" the head." *Dunciad*, book i. v. 121.

SUPPLEMENT

OF CORRECTIONS AND ADDITIONS.

APOTHEOSIS. This word, like *Metamorphoſis*, has deſerted its Latin accentuation on the penultimate ſyllable, and returned to the original Greek accent on the antepenultimate. See Principles, No. 503, page 49. The other words in this termination, as *Anadiploſis*, *Antiptoſis*, &c. retain the Latin accent, though all theſe words in Greek have the accent on the antepenultimate. This accentuation is ſo agreeable to the genius of our own tongue, that it is no wonder it is ſo prevalent. Johnſon, Sheridan, Kenrick, Aſh, Scott, Buchanan, Bailey, and Perry, have adopted it as I have done; and only Smith, Entick, and Barclay, accent the penultimate.

"Allots the prince of his celeſtial line,
"An *apotheoſis*, and rites divine."——*Garth.*

AXILLARY. This word is accented improperly on the ſecond ſyllable inſtead of the firſt: for the reaſons, ſee MAXILLARY and MAMMILLARY.

BUCOLIC? Upon a more mature conſideration of the analogies of the language, I think this word ought to have the accent on the ſecond rather than the firſt ſyllable; for though few rules are more uniform than that which removes the accent a ſyllable higher, when a final ſyllable is dropped in the original, (ſee ACADEMY, and No. 503,) yet the termination in *ic* generally attracts the accent to the preceding ſyllable: and though there are ſeveral exceptions, as may be ſeen No. 510, yet they are ſuch deviations as ought not to be indulged.

CAPABLE. After this word, ſee INCAPABLE.

CAPILLARY. This word ought to have been accented on the firſt ſyllable: for the reaſons, ſee MAXILLARY and MAMMILLARY.

CHILIAEDRON ought to have the accented *e* long, as in PENTAEDROUS; not on account of the quantity in the Greek word, but becauſe where no rule forbids, we ought to make the vowel accented on the penultimate long (542), when followed by a ſingle conſonant, or a mute and liquid.

CONCAVATION. As the ſecondary accent is on the firſt ſyllable of this word, and the *n* comes before hard *c*, it has the ringing ſound as much as if the principal accent were upon it, and ought therefore to have been ſo marked in the notation. See Principles, 408, 409. 432.

DECOROUS. The laſt word of the obſervation under this word ought to have been ſhort inſtead of long.

DENIGRATE. In the accentuation of this word I have followed the general voice of all our orthöepiſts, except Johnſon; but did not recollect that the *i* in the Latin *denigro* might be pronounced either long or ſhort: for when this is the caſe, we generally adopt the ſhort ſound in words derived from that language. See Principles, No. 503, page 50, 51; and Principles, No. 545, page 60.

DESULTORY. After this word, ſee SUBSULTORY.

DIASTYLE. The reaſon why this word is pronounced in three ſyllables, and *Diaſtole* in four, is, that the latter is perfect Greek διαστολὴ, and the former is a compound of our own, formed from δια and στυλος, a pillar. The ſame reaſon holds good for pronouncing *Apocope*, as divided into *A-poc-o-pe*, and *Oſteoſcope* into *Oſ-te-o-ſcope*.

DISSOLUBLE. After this word, ſee RESOLUBLE.

DOCIBLE. The firſt ſyllable of this word ought to have the *o* ſhort, as in *Droſs*. See INDOCIL.

EITHER and NEITHER. For the different pronunciations of theſe words, and the authorities for each, ſee Principles, No. 252.

GUERDON. Since I wrote the obſervations on this word, I have found that Ben Jonſon claſſes the *gu* with the ſame letters in *anguiſh*: but as theſe letters are unaccented in the laſt word, the analogy is different; and the ſound I have given remains ſtill the moſt agreeable to rule.

IDYL. As there is ſometimes an erroneous pronunciation of this word by making the *i* ſhort, as in *idiot*, I have thought it neceſſary here to add the authorities for pronouncing it long, as in *idle*: namely, Mr. Sheridan, Mr. Scott, Mr. Perry, Buchanan, and Entick. Dr. Aſh, Barclay, and Fenning, do not diſtinguiſh it from the *i* in *idiot*; and Dr. Kenrick, as uſual with him when any thing difficult occurs, does not divide it into ſyllables. But the authorities I have produced are ſufficient to vindicate the long ſound of *i*, without recurring to the diphthong in εἰδυλλιον; as the Greek and Latin quantity are very uncertain, and fallacious guides in the quantity of Engliſh words. See Principles, No. 544, 545, &c.

INTERSTICE. To the liſt of words, which ſhow the impropriety of pronouncing this word with the accent on the ſecond ſyllable, might have been added the word *ſuperfice*.

INSITION. This word, like *Tranſition*, and for the ſame reaſon, would certainly have gone into *inſizhon*, had it not been for the interference of this pronunciation with *inciſion*; a word of very different ſignification.

MAMMILLARY. There is an error of the preſs in ſpelling this word with ſingle *m*.

MEMOIR. This word appears to me to be ſufficiently angliciſed to admit of one pronunciation; which is, that which rhymes with *devoir*. Mr. Sheridan has given the two ways of pronouncing it; and by placing this firſt, ſeems to prefer it.

OPTATIVE. Upon a more mature recollection of the analogies of the language, I am ſtill more convinced of the juſtneſs of the deciſion on the accentuation of this word. A critic, with whom I lately converſed upon it, contended, that the accent ought to be upon the *a*, becauſe it was on that letter in the preterperfect tenſe of the verb *opto*, *optavi*. I deſired him to put his argument into form, and tell me whether all words of this termination were to have the ſame accent as in the preterperfect tenſe of the verb—here he could go no farther: I could have immediately confronted him with *tentative*, from *tento*, *tentavi*; with *negative*, from *nego*, *negavi*; with *vocative*, from *voco*, *vocavi*; and twenty other examples, which would have ſhown the weakneſs of his reaſon: and yet this gentleman is a real ſcholar, and a man of good ſenſe and great acuteneſs. See Principles, No. 503, on the influence of the Greek and Latin accent on that of the Engliſh; No. 544, on the influence of the Greek and Latin quantity on that of the Engliſh; and No. 512, on the terminations *ative* and *atory*.

OXYTONE. As I have frequently met with this word in writers on proſody, I have made uſe of it in the Principles, No. 499; but not having met with it in any Dictionary, I forgot to inſert it, though *Barytone* has not eſcaped me. It will be neceſſary therefore to tell the inſpector, that *Oxytone* comes from the Greek word ὀξύτονος, and ſignifies having an acute accent on the laſt ſyllable. For what the acute accent means, ſee BARYTONE.

SATIRE. At line 51 of this article, after the full ſtop, read, except the vowel be *u*. See Principles, No. 507, 508, 509. To which we may add, that though poets often bend the rhyme to their verſe, when they cannot bring their verſe to the rhyme; yet, where cuſtom is equivocal, they certainly are of ſome weight. In this view we may look upon Pope's couplet in his Eſſay on Criticiſm:

> "Leave dang'rous truths to unſucceſsful *ſatires*;
> "And flattery to fulſome dedicators."

SCIOMACHY. Dr. Johnſon's folio accents this word properly on the ſecond ſyllable, (ſee Principles, No. 518,) but the quarto on the firſt.

SHORN. This word is improperly ſpelt in the Dictionary with a final *e*; and though this *e* would very conveniently intimate the quantity of the *o* in this, as well as ſome other words; yet till Johnſon's orthography is fairly given up by the public, it ought, in my opinion, to remain the ſtandard of our ſpelling.

☞ Thus, by the aſſiſtance of an able and attentive compoſitor, and a judicious corrector of the preſs, I have at laſt brought this work to a concluſion. It is with ſome regret that I reflect upon the diminiſhed value of the former edition, from the various corrections, improvements, and additions in this; but the candid and judicious obſerver will acknowledge, that a work comprehending ſuch an infinite number of nice diſtinctions and minute particulars (which, as Dr. Lowth obſerves, often eſcape obſervation when they are moſt obvious) could ſcarcely be more complete in a firſt eſſay. I have diſſembled no difficulty, nor have I ſtifled any objection; and have often choſe to riſk the appearance of uncertainty and indeciſion to thoſe who are eaſily impoſed upon by confidence and ſelf-ſufficiency, rather than hazard the cenſure of the judicious few: and this edition, the reſult of much fatigue and anxiety, has, I flatter myſelf, fewer faults, either of the preſs or in the matter, than any work of the ſame delicacy, extent, and complexity; and therefore, with thankfulneſs to God who has ſupported me through the labour of it, I conſign it to the candid and diſcerning public.

THE END.
